The customer/applicant, upon signing this application for water service, or upon the taking of water service, will be bound by the Rules & Regulations of the Company as set forth and approved by the Department of Public utilities.

The applicant for service hereby agrees to pay for the installation of a new service pipe from the water main in the street into the building.

The water meter and connecting valves of size and type to be determined by the Water Company will be furnished and/or installed by the Water Company and the cost will be billed to the owner/applicant. A System Development Charge based on the size of meter will also be charged to applicant. (See rate schedule attached.) As the Water Company is the only agency with franchise to maintain water pipes in the public ways of Milford, ownership of the service pipe from water main to property line, and meter, will remain with the Water Company. Responsibility for maintenance or replacement of the service pipe in Public Ways and the meter shall rest with the Water Company, and, ownership and responsibility for maintenance or replacement of the service pipe from property line to building shall rest with the property owner. Responsibility for maintenance or replacement of the service pipe in Private Ways and/or Private Property shall rest with the property owner.

Signed by the Owner/Applicant for service this 28 day of July, 2020.

The customer/applicant, upon signing this application for a private fire service, or upon the taking of private fire service, will be bound by the most current Rules & Regulations of the Company as set forth and approved by the Department of Public utilities.

The entire cost of the labor and materials for installing a private fire service from the main to the premises will be paid for by the Customer. The Customer shall furnish, install, and maintain all new service connections, provided the costs of excavation, backfill and removal, and replacement of paving, walks, curbs, etc., including the hiring of traffic control personnel, and obtaining the street opening permits, necessarily incurred in respect to the new service shall be borne by the Customer or other applicant for service. For replacement of services, the Customer shall bear all costs from the main to the premise. All replacement work performed shall be done by the Company at the Customer's expense or by the Customer or his designee. The designee must be acceptable to the Company. The Company shall perform inspection services at the expense of the Customer.

A gate valve controlling the entire supply will be placed on the fire service between the main and the property line of the premises being served. Any valve pit or vault, which is required, will be furnished at the expense of the Customer.

The private fire service connection is furnished for the purpose of supplying water for the extinguishment of fires only and no use of water from such connection for any other purpose shall be made without approval of the Company.

The Customer shall notify the Company within a period of seventy-two (72) hours after any usage of the sprinkler system.
