John Mazzone and Len Morcone approached the Board regarding a sewer backup they experienced at property located at 24-26 Main Street in the past few weeks. It was determined that sewer backed into the property during an unusual period of heavy rain that followed approximately 3 years of drought. The pipes at the property leaked. The property is situated as such that it is on the end portion of the old town sewer line. The grease causing the backup was ordinary household grease and did not originate from a restaurant. The property is at the bottom of the Main Street hill. The problem used to be worse but through the Sewer Department changing the sewer flows and I & I work, the problem has gotten better over the years. It was suggested that a service clean out be put in the side walk. Another suggestion was to bring the service pipe from the property up higher but this would be very costly. It was determined that a check valve would not solve the problem. Mr. Mainini said he would add the property to a list to flush the area once per month and to maintain the area more often during periods of heavy rainfall. The Board assured the owners it is not going to be a continuous problem but was caused by the heavy rain. The owners left the meeting and said they would stay in touch with the Sewer Department.

At 6:58 P.M., Mr. Morelli made a motion to adjourn, seconded by Mr. Cenedella and made unanimous by Mr. Lioce.

Respectfully Submitted,

John Consigli
Administrative Assistant
