Town of Milford
Meeting Notice

Board or Commission: Conservation Commission
Date and Time of Meeting: Wednesday November 18, at 7.00 P. M

Place of Meeting---Pursuant to Governor Baker's March 12, 2020 order suspending certain provisions of the Open Meeting Law, G.L. c. 30A sec. 18, and the Governor's March 15, 2020 Order concerning imposition of strict limitations on the number of people that may gather in one place, this meeting is being conducted via remote participation. No in-person attendance of members of the public will be permitted, but every effort will be made to ensure that the public can adequately access the proceedings as provided for in the Order.

PUBLIC HEARINGS

Public Hearing access now requires advanced registration. Any member of the public may now register to access the zoom meeting as an attendee. Public attendees will be able to view the zoom LIVE and request to speak at the Public Hearing. Please register with zoom at http://tiny.cc/c0d2tz. All testimony at a public hearing, including documents or exhibits, must be in connection with the matter being considered, and confined to the matter at hand, and will be limited to five minutes to allow for the opportunity for others to participate.

M E M O R A N D U M

TO: Mr. Michael Giampietro, Chairman – Conservation Commission

FROM: Michael Dean, P.E. MD

DATE: November 16, 2020

SUBJECT: **Partial Certificate – Whitewood Preserve**
13 Kate Lane (Unit 16)

The Owner / Applicant, Snowflake, LLC, Kevin Lobisser, 1 Charlesview Road, Hopedale, MA 01747, has filed a request for a **Partial** Certificate of Compliance for 1 of the 29- units (Condos) within the **Whitewood Preserve** Planned Residential Community (PRD), DEP File # 223-1122.

The areas adjacent to the unit are not 100 % loamed and/or seeded, however there are several more units in the immediate area that still need to be constructed and it would be highly unlikely that these areas would not be loamed and seeded once final grading is completed, in addition, the request is for a Partial COC.

I recommend the issuance of a Partial Certificate of Compliance for # 13 Kate Lane (Unit 16).

RE: #4 Megan Court, #13 Kate Lane
Whitewood Preserve

Dear Commissioners:

On behalf of the owner, Snowflake, LLC Allen Engineering & Associates, Inc. (AEA) hereby submits a request for a **"Partial"** Certificate of Compliance for #4 Megan Court and #13 Kate Lane (Units 19 and 16, respectively).

CERTIFICATION:

AEA certifies that the work done on-site is in substantial compliance with the Amended Order of Conditions and the associated approved design plans. The entire condominium development will ultimately apply for an overall Certificate of Compliance when all construction activities are complete.

Enclosed are the following items for your review:

1. Partial Certificate of Compliance for #4 Megan Court (prepared on WPA Form 8A).
2. (x2) #4 Megan Court As-Built Plot Plan with grading (1 Sheet @ 11x17).
3. Partial Certificate of Compliance for #13 Kate Lane (prepared on WPA Form 8A).
4. (x2) #13 Kate Lane As-Built Plot Plan with grading (1 Sheet @ 11x17).

Please contact me with any questions or concerns at (508) 381-3212 x108 or Brian@Allen-EA.com.

Sincerely,

ALLEN ENGINEERING & ASSOCIATES, INC.

Brian Hassett, E.I.T.

Michael Dean, P.E.
Town Engineer

November 17, 2020

Mr. Michael Giampietro, Chairman
Conservation Commission
52 Main Street
Milford, MA, 01757

Re: **Request for Certificate of Compliance – 1 National Street (Amazon)**
DEP **File # 222-1167**

Dear Mr. Giampietro:

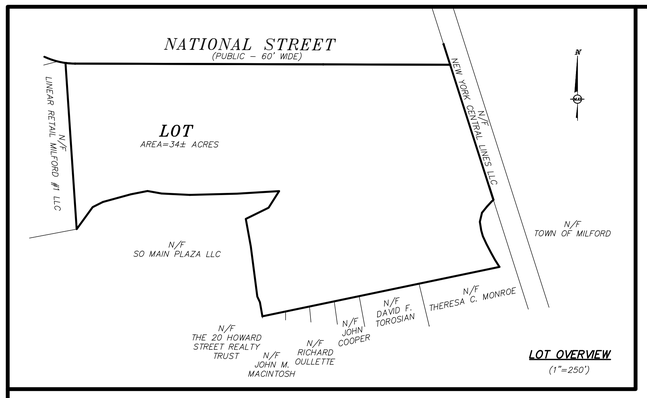
I have reviewed the Request for a Certificate of Compliance 1 National Street, the Applicant is Milford National LLC, Gregory Schain, 1 National Street, Milford, MA 01757.

Following a site inspection, it was discovered a couple of the drainage structures have been paved over. These structures are associated with the drainage located in the eastern portion of the site, in the main truck entrance off of the end of National Street. I recommend the two or three structures have rims and covers installed and that they are brought to existing grade.

I recommend the issuance of the Certificate of Compliance (COC) and to hold the COC until a final inspection is performed on the above-mentioned drainage structures and the as-built plan is updated.

Sincerely,

Michael Dean, P.E.
Town Engineer



LOT OVERVIEW
(1"=250')

NOTES:

1. THE TOPOGRAPHY, SITE DETAIL & SURFACE IMPROVEMENTS DEPICTED HEREON WERE OBTAINED FROM AN INSTRUMENT SURVEY CONDUCTED ON THE GROUND BY MERIDIAN ASSOCIATES, INC. (MAI) BETWEEN OCTOBER 9 & 21, 2020.
2. THE SUBJECT PROPERTY IS LOCATED IN ZONE HIGHWAY INDUSTRIAL B.
3. THE SUBJECT PROPERTY IS DEPICTED AS LOT 9 ON TOWN OF MILFORD ON ASSESSOR'S MAP 58.
4. THE LOCATION OF ALL UNDERGROUND UTILITIES SHOWN ARE APPROXIMATE AND ARE BASED UPON A PARTIAL FIELD SURVEY AND COMPILATION OF PLANS OF RECORD. MERIDIAN ASSOCIATES, INC. DOES NOT WARRANTY NOR GUARANTEE THE LOCATION OF ALL UTILITIES DEPICTED OR NOT DEPICTED. THE CONTRACTOR, PRIOR TO COMMENCEMENT OF CONSTRUCTION, SHALL VERIFY THE LOCATION OF ALL UTILITIES AND CONTACT DIG SAFE AT 811.
5. THIS PLAN DOES NOT SHOW ANY UNRECORDED OR UNWRITTEN EASEMENTS WHICH MAY EXIST. A REASONABLE AND DILIGENT ATTEMPT HAS BEEN MADE TO OBSERVE ANY APPARENT, VISIBLE USES OF THE LAND; HOWEVER, THIS DOES NOT CONSTITUTE A GUARANTEE THAT NO SUCH EASEMENTS EXIST.
6. THE ELEVATIONS DEPICTED HEREON WERE BASED ON PLAN ENTITLED "1 NATIONAL STREET SITE IMPROVEMENTS BY PLANNER DESIGNERS ARCHITECTS, INC (PDA), SURVEY DONE BY GUERRIERE AMD HALNON IN 2014".

Mr. Michael Giampietro, Chairman
Conservation Commission
52 Main Street
Milford, MA, 01757

Re: **Request for Certificate of Compliance – Godfrey Brook Improvement Project - Congress Terrace and Main Street Culvert Replacement Project**
DEP **File # 222-1067**

Dear Mr. Giampietro:

I have reviewed the Request for a Certificate of Compliance for the Godfrey Brook Improvement Project - Congress Terrace and Main Street Culvert Replacement Project, the Applicant is the Town of Milford.

This project is associated with the Hazard Mitigation Grant program (HMGP), grant funding from FEMA through MEMA. The project was constructed in 2015 and finalized in 2016 with inspections by MEMA and final sign off by FEMA.

The certificate of compliance will also clear title to privately owned properties that are along the Godfrey Brook and associated with this project. I recommend the issuance of a Certificate of Compliance.

Sincerely,

Michael Dean, P.E.
Town Engineer

RE: Request for Certificate of Compliance – Congress Terrace and Main Street Culvert Replacements Project, MassDEP File No. 223-1067

Dear Commission Members:

On behalf of the Town of Milford Highway Department, GZA GeoEnvironmental, Inc. (GZA) is providing this Request for a Certificate of Compliance (WPA Form 8A) for the Congress Terrace and Main Street Culvert Replacements Project Order of Conditions (MassDEP File No. 223-1067).

GZA's final inspection in the Spring of 2016 confirmed that work was completed in substantial compliance with the project drawings.

Very truly yours,
GZA GEOENVIRONMENTAL, INC.

Rosalie T. Starvish
Rosalie T. Starvish, P.E.
Project Manager

Thomas E. Jenkins, P.E.
Associate Principal

Attachment: WPA Form 8A – Request for Certificate of Compliance

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands

WPA Form 8A – Request for Certificate of Compliance

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

DEP File Number:

Provided by DEP

A. Project Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. This request is being made by:

Scott Crisafulli
Name

12 Front Street
Mailing Address

Milford | MA | 01757
City/Town | State | Zip Code

Phone Number

2. This request is in reference to work regulated by a final Order of Conditions issued to:

Town of Milford Highway Department
Applicant

1/16/2015 | 223-1067
Dated | DEP File Number

Upon completion of the work authorized in an Order of Conditions, the property owner must request a Certificate of Compliance from the issuing authority stating that the work or portion of the work has been satisfactorily completed.

3. The project site is located at:

Congress Terrace to W. Walnut St; Main St. | Milford
Street Address | City/Town

see attached list |
Assessors Map/Plat Number | Parcel/Lot Number

4. The final Order of Conditions was recorded at the Registry of Deeds for:

see attached list
Property Owner (if different)

 | 53419 | 262
County | Book | Page

Certificate (if registered land)

5. This request is for certification that (check one):

☒ the work regulated by the above-referenced Order of Conditions has been satisfactorily completed.

☐ the following portions of the work regulated by the above-referenced Order of Conditions have been satisfactorily completed (use additional paper if necessary).

☐ the above-referenced Order of Conditions has lapsed and is therefore no longer valid, and the work regulated by it was never started.

A. Project Information (cont.)

6. Did the Order of Conditions for this project, or the portion of the project subject to this request, contain an approval of any plans stamped by a registered professional engineer, architect, landscape architect, or land surveyor?

   ☒ Yes — If yes, attach a written statement by such a professional certifying substantial compliance with the plans and describing what deviation, if any, exists from the plans approved in the Order.

   ☐ No

B. Submittal Requirements

Requests for Certificates of Compliance should be directed to the issuing authority that issued the final Order of Conditions (OOC). If the project received an OOC from the Conservation Commission, submit this request to that Commission. If the project was issued a Superseding Order of Conditions or was the subject of an Adjudicatory Hearing Final Decision, submit this request to the appropriate DEP Regional Office (see http://www.mass.gov/eea/agencies/massdep/about/contacts/find-the-massdep-regional-office-for-your-city-or-town.html).

CONGRESS TERRACE/WESTBROOK STREET UTILITY COORDINATION NOTES

WATER MAIN: THE FOLLOWING SEQUENCE OF ACTIVITIES SHALL BE COORDINATED BY THE CONTRACTOR WITH THE MILFORD WATER COMPANY. ALL EXCAVATION, BACKFILL, DEWATERING, TRAFFIC CONTROL, AND ANCILLARY WORK SHALL BE PERFORMED BY CONTRACTOR. AT CONGRESS TERRACE THE PIPE MAY BE INCREASED TO 8" AND WILL GO OVER THE CULVERT. AT WESTBROOK STREET THE WATER LINE WILL GO UNDER THE CULVERT.

1. THE MILFORD WATER COMPANY WILL CUT AND CAP THE EXISTING WATER MAIN ON EACH SIDE OF THE CULVERT CROSSING.
2. THE CONTRACTOR SHALL REMOVE AND DISPOSE OF THE EXISTING WATER MAIN BETWEEN THE TWO CUTS.
3. THE MILFORD WATER COMPANY WILL FURNISH SECTIONS OF D.I. WATER MAIN AND GATE VALVES.
4. THE CONTRACTOR SHALL INSTALL THE D.I. WATER MAIN AND GATE VALVES CROSSING THE NEW CULVERT FOR FUTURE USE BY THE WATER COMPANY.

GAS MAIN: THE FOLLOWING SEQUENCE OF ACTIVITIES SHALL BE COORDINATED BY THE CONTRACTOR WITH NSTAR GAS COMPANY. ALL EXCAVATION, BACKFILL, DEWATERING, TRAFFIC CONTROL, AND ANCILLARY WORK SHALL BE PERFORMED BY CONTRACTOR. THERE IS NO GAS MAIN IN WESTBROOK STREET. IN CONGRESS TERRACE, NSTAR HAS PROPOSED TO RELOCATE THE GAS MAIN OVER THE NEWLY INSTALLED CULVERT UPSTREAM OF THE CURRENT GAS MAIN ALIGNMENT & RECONNECT PRIOR TO SHUTTING DOWN THE EXISTING LINE. ALTERNATIVELY, THE CONTRACTOR MAY TEMPORARILY SUPPORT & PROTECT THE EXISTING GAS MAIN IN PLACE.

1. UNDER THE RELOCATION OPTION, CONTRACTOR SHALL PHASE CULVERT INSTALLATION WITH NSTAR RELOCATING THE GAS MAIN OVER THE PORTION OF THE CULVERT PRIOR TO COMPLETING THE CULVERT INSTALLATION.
2. UNDER THE TEMPORARY SUPPORT OPTION, CONTRACTOR SHALL PROVIDE A TEMPORARY SUPPORT & PROTECTION PLAN & SCHEDULE TO NSTAR FOR APPROVAL. EXPOSED GAS LINE SHALL BE PROTECTED WITH STEEL PLATES AT ALL TIMES.

CONGRESS TERRACE/WESTBROOK STREET GENERAL NOTES

1. BASE SURVEY FOR THIS PROJECT WAS PROVIDED BY GUERRIERE AND HALNON, INC., MILFORD, MASSACHUSETTS, DATED 4/29/2010. HORIZONTAL DATUM IS MASS. COORD. NAD–83. VERTICAL DATUM IS NAVD 88. COMPLETE TOPOGRAPHICAL PLANS FROM THIS SURVEY WORK CAN BE OBTAINED FROM THE TOWN OF MILFORD. FIELD UPDATED BY GZA 4/20/14. WESTBROOK STREET WAS RECONSTRUCTED IN THE VICINITY OF THE CULVERT AFTER THIS SURVEY.

2. THE ACCURACY AND COMPLETENESS OF UNDERGROUND AND OVERHEAD UTILITIES AS SHOWN ON THE PLANS ARE NOT GUARANTEED. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DETERMINE THE EXACT LOCATION, SIZE, TYPE, ETC. OF ALL UTILITIES THAT MAY BE AFFECTED BY THE WORK OF THIS PROJECT. ALL DRAIN AND SANITARY SEWER STRUCTURES OWNED BY THE TOWN OF MILFORD SHALL BE ADJUSTED TO NEW LINE AND GRADE BY THE CONTRACTOR, AS DIRECTED BY THE PLANS OR BY THE ENGINEER. DE–ENERGIZING OVERHEAD WIRES IS NOT POSSIBLE AT WESTBROOK STREET NOR CONGRESS TERRACE. OSHA DOES NOT ALLOW CRANES TO OPERATE UNDER ENERGIZED OVERHEAD WIRES. POLES WILL BE RELOCATED BY THE APPLICABLE UTILITY COMPANY. ALTERATIONS TO UTILITIES NOT OWNED BY THE TOWN OF MILFORD SHALL BE MADE BY THE APPLICABLE UTILITY OWNERS, AS COORDINATED BY THE CONTRACTOR, AS DESCRIBED IN "UTILITY COORDINATION NOTES".

3. ALL MATERIALS AND CONSTRUCTION METHODS AND DETAILS FOR THIS PROJECT SHALL CONFORM TO THE LATEST EDITION OF THE "STANDARD SPECIFICATIONS FOR HIGHWAYS AND BRIDGES", MASSACHUSETTS HIGHWAY DEPARTMENT (MHD), AS AMENDED, REFERRED TO HEREIN AS THE "STANDARD SPECIFICATIONS".

4. THE CONTRACTOR MAY USE A CERTAIN PORTION OF THE ILIDIO M. CARNEIRO PROPERTY AT 4 CONGRESS TERRACE AS A STAGING AREA. AT THE END OF THIS PROJECT, THE CONTRACTOR SHALL REPLACE THE EXISTING RETAINING WALL WITH A NEW CONCRETE WALL AND RESTORE DISTURBED LAWN USING SOD. ANY OTHER STAGING AREAS SHALL BE PROCURED BY THE CONTRACTOR AT THEIR OWN EXPENSE. ANY DAMAGE TO PRIVATE PROPERTY IS THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

5. ALL PROPOSED CATCH BASIN AND DROP INLET FRAMES AND COVERS SHALL BE AS LEBARON FOUNDRY, INC. MODEL NO. LF–248–2, OR EQUIVALENT. ALL PROP. CATCH BASINS SHALL BE AS SHOWN IN MHD (SD) 201.4.0 EXCEPT THAT THE SUMP SHALL BE 4'–0" DEEP. ALL CATCH BASINS SHALL BE EQUIPPED WITH HOODS AS PER MHD (SD) 201.12.0. ALL CATCH BASIN GRATES SHALL BE MARKED WITH LETTERING CAST INTO THE GRATE, "DUMP NO WASTE! DRAINS TO WATERWAYS".

6. ALL PROP. DRAINAGE AND SAN. SEWER STRUCTURES SHALL BE SUPPORTED WITH A 12" CRUSHED STONE (M2.01.1) FOUNDATION.

7. ALL REINFORCED CONCRETE PIPE USED ON THIS PROJECT SHALL BE CLASS IV, UNLESS OTHERWISE DESIGNATED ON THE PLANS.

8. ALL EXISTING DRAIN AND SAN. SEWER LINES TO BE REPLACED SHALL BE ABANDONED IN PLACE. IF THEY CONFLICT WITH ANY PROP. WORK THEY SHALL BE REMOVED.

9. WHERE LINES OR STRUCTURES ARE ABANDONED IN PLACE, THE CONTRACTOR SHALL ENSURE THAT ALL CONNECTING PIPES, INLETS, AND OUTLETS ARE PLUGGED. ALL LIVE CONNECTIONS SHALL BE CONNECTED TO NEW WORK TO THE SATISFACTION OF THE ENGINEER.

10. CATCH BASIN, DROP INLET, AND MANHOLE FRAMES AND GRATES/COVERS SHALL CLEARLY ALIGN WITH THE OPENINGS IN THE PRECAST STRUCTURES.

11. ALL EXISTING PAVEMENT MARKINGS SHALL BE REPLACED IN KIND AFTER FINAL PAVING OF ROAD RECONSTRUCTION AREAS UNDER THIS CONTRACT.

12. ALL STRUCTURE STATIONS AND OFFSETS ARE TO THE CENTER POINT OF THE PROP. GRATE OR COVER.

13. ALL PROPOSED GRANITE CURBING SHALL BE MADOT TYPE VB AND SHALL INCLUDE REMOVAL OF EXISTING GRANITE CURBING, WHERE APPLICABLE, UNLESS OTHERWISE DESIGNATED ON THE PLANS.

14. NEW SIDEWALKS, WHEELCHAIR RAMPS, PRIVATE WALKS AND DRIVEWAYS SHALL BE CONSTRUCTED TO THE NEAREST SCORE LINE OR EXPANSION JOINT IN THE EXISTING ADJACENT SURFACES OR AS DIRECTED BY THE ENGINEER. PROP. CEMENT CONCRETE SIDEWALKS SHALL INCLUDE REMOVAL OF EXISTING SIDEWALK SURFACES.

15. ALL WHEELCHAIR RAMPS SHALL MEET THE LATEST REQUIREMENTS OF THE MASSACHUSETTS ARCHITECTURAL ACCESS BOARD AND THE LATEST STANDARDS OF THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION.

16. ALL DRIVEWAY REPAIRS SHALL BE "TYPICAL DRIVEWAYS" AS SHOWN IN THE DETAILS.

17. IN EXCAVATION AREAS, ALL TOPSOIL SHALL BE REMOVED TO A DEPTH OF 12" (MINIMUM) OR AS DIRECTED BY THE ENGINEER AND SHALL BE STOCKPILED FOR RESPREADING AFTER BACKFILLING IS COMPLETED.

18. MAILBOXES, FENCES, STREET SIGNS, LANDSCAPING FEATURES, ETC. THAT NEED TO BE REMOVED AND RESET OR RELOCATED SHALL BE DONE SO TO THE SATISFACTION OF THE ENGINEER. ALL ITEMS SHALL BE SET TO MHD STANDARDS. ELECTRIC DOG FENCES ENCOUNTERED DURING THE WORK SHALL BE PROTECTED OR RESTORED.

19. CONTRACTOR SHALL COMPLY IN ALL RESPECTS WITH ALL ENVIRONMENTAL PERMITS ISSUED FOR THIS PROJECT.

20. SOME GODFREY BROOK FIELDSTONE WALLS HAVE BEEN REPLACED WITH CONCRETE WALLS.

21. IF ANY ARTIFACTS OR HUMAN REMAINS ARE FOUND DURING GROUND DISTURBING ACTIVITIES, THE CONTRACTOR SHALL CEASE WORK AND IMMEDIATELY NOTIFY THE ENGINEER.

22. ALL DISTURBED AREAS NOT OTHERWISE SURFACED SHALL RECEIVE 6" LOAM AND SEED AND BE ESTABLISHED AS LAWNS.

Re: Ariana Estates – 11 & 13 Ariana Circle (Lot 2)
Notice of Intent for an Individual Lot

Dear Mr. Giampietro:

The submittal is a Notice of Intent for 11 & 13 Ariana Circle, an individual lot of Ariana Estates Residential Subdivision. The Applicant is Claro Construction Corp., 81 Camp Street, Milford, MA 01757.

The site consists of 18,005 SF of land, Zoned as General Residential (RA). The parcel refers to the Town Assessors Map 52, Block 293, Lot 2.

This project / Lot has already been in front of the commission at the last meeting on October 21, 2020. The hearing was opened and discussions took place between the commission, applicants representative and abutters. During the meeting the commission had raised some concerns and asked for additional information, specifically, the existing elevations of the brook and elevations of the abutting land on the south side of the brook. The commission then asked the Town Engineer to research any existing files / plans that may contain the above referenced information.

I have reviewed the files and found a filing for a pool installation at 7 Carven Road, the plans have no topography or spot elevations, as this filing was simply to convert a lawn area into an inground pool area. The Town's GIS shows the abutting land at an approximate elevation of 270, see the attached Exhibit.

Following a review of the submitted documents I offer the following:

- The submitted plans (and previous subdivision plans) show some level of detail of the brook and what appears to be boulders along the edge of said brook. This detail work may possibly contain the information pertaining to the above referenced request by the commission (existing elevations of the brook and elevations of the abutting land on the south side of the brook). There may be a possibility that the original survey has the spot elevations of such detail work, this should be further researched and the elevations should be provided per the commission's request.
- The plans show a proposed driveway over the existing underground detention basin. The applicants engineer shall provide a detail of the **existing** basin with the proposed driveway and certify the **existing** underground basin is built to accommodate traffic loading (H-20). The detail should include items such as the type of the existing chambers, model number, the amount of crushed stone, amount of cover materials and type, etc.

The above items should be addressed prior to approval.

Sincerely,

Michael Dean, P.E.
Town Engineer

GENERAL NOTES:

1. LOCATION OF EXISTING UNDERGROUND UTILITIES/OBSTRUCTIONS/SYSTEMS SHOWN HEREON ARE APPROXIMATE ONLY. ALL UTILITIES/OBSTRUCTIONS/SYSTEMS MAY NOT BE SHOWN. LOCATE AND PROTECT ALL UNDERGROUND UTILITIES/OBSTRUCTIONS/SYSTEMS, WHETHER OR NOT SHOWN HEREON.
2. INSTALL ALL NEW UTILITIES UNDERGROUND, UNLESS SPECIFICALLY INDICATED OTHERWISE.
3. BURIED UTILITIES SHALL BE INSTALLED IN ACCORDANCE WITH THEIR RESPECTIVE COMPANY.
4. CONSTRUCTION LAYOUT OF BUILDING AND/OR SITE IMPROVEMENTS SHALL BE PERFORMED BY A LICENSED LAND SURVEYOR. LOCATIONS OF EXISTING FEATURES OR PROPOSED IMPROVEMENTS DERIVED BY SCALING DRAWINGS MAY NOT BE ACCURATE. PROPERTY LINES SHOWN HEREON ARE APPROXIMATE. SEE PLAN REFERENCE HEREON.
5. CONTRACTOR IS RESPONSIBLE FOR SAFETY MEASURES, CONSTRUCTION METHODS, AND CONTROL OF WORK.
6. CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIRS AND/OR REPLACEMENT OF ANY EXISTING IMPROVEMENTS DAMAGED DURING CONSTRUCTION THAT ARE NOT DESIGNATED FOR DEMOLITION AND/OR REMOVAL HEREON. DAMAGED UTILITIES OR STRUCTURES SHALL BE REPAIRED TO THE SATISFACTION OF THEIR RESPECTIVE OWNERS.
7. ANY INTENDED REVISION OF HORIZONTAL AND/OR VERTICAL LOCATION OF IMPROVEMENTS TO BE CONSTRUCTED AS SHOWN HEREON SHALL BE REVIEWED AND APPROVED BY THE ENGINEER PRIOR TO IMPLEMENTATION.
8. CONTRACTOR SHALL NOTIFY ENGINEER UPON COMMENCEMENT OF CONSTRUCTION IN ORDER TO ENSURE THAT REQUIRED INSPECTIONS ARE PERFORMED IN A TIMELY AND EFFICIENT MANNER.
9. CONTRACTOR SHALL PROMPTLY NOTIFY ENGINEER UPON DISCOVERY OF ANY UNFORESEEN SURFACE OR SUBSURFACE CONDITIONS THAT MAY IMPACT SITE CONSTRUCTION.
10. FINISH RIM ELEVATIONS SHOULD MATCH FINISH PAVEMENT, GRADING OR LANDSCAPING SURFACE, UNLESS SPECIFICALLY INDICATED OTHERWISE.
11. WHERE EXISTING UTILITY LINES/STRUCTURES ARE TO BE CUT/BROKEN DOWN/ABANDONED, LINES/STRUCTURES SHALL BE PLUGGED/CAPPED/FILLED IN ACCORDANCE WITH UTILITY OWNER REQUIREMENTS.
12. EROSION CONTROL MEASURES SUCH AS SILT FENCE OR HAY BALES AS MAY BE SHOWN HEREON, SHALL BE INSTALLED BEFORE EARTH DISTURBANCE OCCURS WITHIN BUFFER ZONES, AND SHALL SERVE AS THE LIMIT OF WORK.
13. WHERE THE WORD "INSTALL" IS USED HEREIN, IT IS INTENDED TO DIRECT CONTRACTOR TO FURNISH, INSTALL AND PLACE IN OPERATION" THE COMPONENT REFERRED TO.
14. LIMIT OF WORK SHALL BE STAKED IN THE FIELD PRIOR TO COMMENCEMENT OF CONSTRUCTION.
15. WHERE SHOWN, CONSTRUCTION NOTES ARE INTENDED TO SUMMARIZE AND CLARIFY MAJOR ITEMS OF WORK. THESE NOTES SHOULD NOT BE CONSTRUED AS AN EXHAUSTIVE LISTING OF ALL WORK REQUIRED. CONTRACTOR SHOULD CONTACT ENGINEER WHEN FURTHER CLARIFICATION OF DEPICTED WORK IS DESIRED.
16. WHERE DIMENSIONS INVOLVE CURB, DIMENSIONS ARE TO FACE OF CURB. WHERE SLOPED GRANITE CURB OR CAPE COD BERM IS SPECIFIED, FACE OF CURB IS EDGE OF FINISH PAVEMENT AT TOE OF CURB.
17. NO DEBRIS, JUNK RUBBISH OR OTHER NON-BIODEGRADABLE MATERIALS, FILL CONTAINING HAZARDOUS MATERIALS OR WASTES, OR STUMPS SHALL BE BURIED ON ANY LAND ON THIS SITE, OR LEFT ON ANY LOT OR ON THE STREET RIGHT OF WAY.

REGULATORY NOTES:

1. CONTRACTOR SHALL CONTACT DIG-SAFE FOR UNDERGROUND UTILITY MARKING AT 888-344-7233 AT LEAST 72 HOURS PRIOR TO COMMENCEMENT OF ANY WORK. CONTRACTOR SHALL GIVE 24-HOUR NOTICE TO PERTINENT TOWN DEPARTMENTS BEFORE COMMENCING ANY WORK IN THE FIELD.
2. CONTRACTOR SHALL COORDINATE AND OBTAIN ALL CONSTRUCTION PERMITS REQUIRED BY REGULATORY AUTHORITIES.
3. CONTRACTOR SHALL BE AWARE OF ALL CONSTRUCTION REQUIREMENTS, CONDITIONS, AND LIMITATION IMPOSED BY PERMITS AND APPROVALS ISSUED BY REGULATORY AUTHORITIES PRIOR TO COMMENCEMENT OF ANY WORK.
4. COMPLETE ALL PIPING WORK THAT IS OUTSIDE OF BUILDING AND LESS THAN 10 FEET FROM THE INSIDE FACE OF BUILDING FOUNDATION IN CONFORMANCE WITH THE UNIFORM STATE PLUMBING CODE OF MASSACHUSETTS, 248 CMR 2.00.
5. UTILITY EASEMENTS ARE PREVIOUSLY RECORDED. SEE PB 942, PL 41 AT THE WORCESTER REGISTRY OF DEEDS FOR EASEMENT INFORMATION.

Notice of Intent – Facility Expansion

Dear Mr. Giampietro:

Following my letter dated November 12, 2020, the plans have been revised and all of my concerns have been addressed.

I recommend the issuance of an Order of Conditions.

Sincerely,

Michael Dean, P.E.
Town Engineer

Re: 125 Fortune Boulevard – Nitto Denko Avecia, Inc.
Notice of Intent – Facility Expansion

Dear Mr. Giampietro:

The submittal is a Notice of Intent for an expansion to the existing manufacturing facility at 125 Fortune Boulevard. The applicant is Nitto Denko Avecia, Inc., 155 Fortune Boulevard, Milford, MA. The site consists of a 15.28 Acre parcel of land Zoned Highway Industrial B (IB), Assessors Map 28, Block 98, Lot 4.

The proposed project consists of a 50,000 SF addition, a covered tank farm and loading area, both located in the southern portion of the site (rear portion).

Following a review of the submitted documents I have been in contact with the applicant's engineers and several items have already been addressed and the plans have been revised to address the concerns.

Items already discussed and addressed:

1. The drainage analysis (utilizing HydroCAD Software) has been revised using a Type – III storm event, the applicants engineer also adjusted some of the post drainage areas, per my request. The drainage design has been revised as needed. **These items are completed.**

2. The outlet from the proposed detention basin has been redesigned to direct flows towards the existing wetland / drainage system located in the eastern portion of the site. This is consistent with the drainage analysis for the overall industrial park / development "Quarry Square". **These items are completed.**

The last remaining item that should be addressed is:

3. The erosion control detail should be changed to also include **Silt Fence with** the Mulch Sock.

I have worked with the applicant's engineers to address me my concerns, item number 3 above should be addressed, I recommend the issuance of an order of conditions.

Sincerely,

Michael Dean, P.E.
Town Engineer

Re: **Response to Comments**
125 Fortune Boulevard
MassDEP File No. CE 223-1183
(Pare Project No. 20115.00)

NOTICE OF INTENT REVIEW RESPONSES TO COMMENTS

RESPONSES TO TOWN ENGINEER'S REPORT DATED NOVEMBER 12, 2020:

1. **COMMENT:** The drainage analysis (utilizing HydroCAD Software) has been revised using a Type III storm event, the applicants engineer also adjusted some of the post drainage areas, per my request. The drainage design has been revised as needed. **These items are completed.**

   RESPONSE: *Noted.*

2. **COMMENT:** The outlet from the proposed detention basin has been redesigned to direct flows towards the existing wetland / drainage system located in the eastern portion of the site. This is consistent with the drainage analysis for the overall industrial park / development "Quarry Square." **These items are completed**.

   RESPONSE: *Noted.*

3. **COMMENT:** The erosion control detail should be changed to also include silt fence with the mulch sock.

   RESPONSE: *The erosion control detail on Sheet C-601 Civil Details 1 has been revised to include silt fence with the compost filter sock.*

RESPONSES TO MASSACHUSETTS DEPARTMENT OF ENVIRONMENTAL PROTECTION COMMENTS E-MAILED ON NOVEMBER 12, 2020:

1. **COMMENT:** In regards to the southern part of the detention basin, a significant excavation of up to 13 feet appears to be proposed, the applicant should provide additional information that construction of the basin will not intercept bedrock/groundwater in this area as TP-2 is not well centered.

   RESPONSE: *According to the data collected for TP-2, there was no well-defined redox observed that would be indicative of the estimated seasonal high groundwater (ESHGW), therefore the ESHGW was determined to be at the bottom of the pit at elevation 330.0, which is 4.0 feet below the bottom of the detention basin. Note #4 on the test pit log says that there was possible redox observed at 44" deep (elevation 332.3) which is consistent with the depth of redox observed in test pits TP-1 and TP-3 in the surrounding area. If this were the elevation of the ESHGW there would still be 1.7 feet of separation below the bottom of the detention basin. Therefore, even with the most conservative estimate, the bottom of the detention basin is still above the ESHGW table. Bedrock was encountered in TP-2 at elevation 330.0, or 4.0 feet below the bottom of basin. It is expected that bedrock will be excavated on the southern side of the basin into the rocky knoll which is not expected to have groundwater higher than the elevation observed in the surrounding test pits based on the characteristics of this feature.*

2. **COMMENT:** Additional proposed contours are needed in the area north of the detention basin to demonstrate proposed grade and how that area will drain

   RESPONSE: *The proposed grading is designed to maintain as much natural vegetation as possible. Minor revisions to the proposed grading north of the detention basin have been made to allow the area to drain with a minimum 2% slope from the existing 341.0 contour at the tree line to the 339.0 contour at the top of the bank of the detention basin.*

3. **COMMENT:** Applicant should confirm that the stormwater system can be isolated from the tank farm in the event of a tank failure, clarify if there is a turn-off valve, and consider lining the detention basin as a redundant protective measure.

   RESPONSE: *The tanks in the tank farm are single-walled and the tank farm itself is recessed and surrounded by a concrete wall designed as a containment area that is sized to store 110% of the volume of the largest tank, plus 20 minutes of deluge fire water collection. Any incidental rainwater in the potentially contaminated area of truck unloading and tank farm will be collected and pumped into one of the waste tanks for off-site disposal at a licensed facility. Therefore, if a tank failure occurred, any spillage would be contained until properly disposed off-site and would not enter the detention basin.*

Pare has prepared a revised plan set incorporating comments with a revision date of November 16, 2020. Should you have any other questions related to this matter, please feel free to contact me.

Sincerely,

Jenna R. Rioux, P.E.
Project Engineer

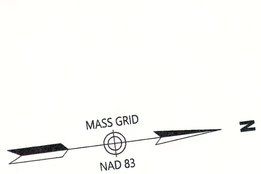
AMENDED SITE PLAN SUBMISSION
SEPTEMBER 30, 2020
REVISED OCTOBER 20, 2020
REVISED NOVEMBER 16, 2020

APPROVED BY THE PLANNING BOARD:

PLANNING BOARD, CHAIR
TOWN OF MILFORD

DATE



General Notes

1) THE PROPERTY LINES SHOWN ON THIS PLAN ARE BASED UPON AN ACTUAL FIELD SURVEY CONDUCTED BY VHB, INC. IN MARCH, 2020 AND FROM DEEDS AND PLANS OF RECORD.
2) THE EXISTING CONDITIONS SHOWN ON THIS PLAN ARE BASED UPON AN ACTUAL ON-THE-GROUND INSTRUMENT SURVEY PERFORMED BY VHB, INC. IN MARCH, 2020.
3) THE LOCATIONS OF EXISTING UNDERGROUND UTILITIES SHOWN ON THIS PLAN ARE BASED ON FIELD OBSERVATIONS AND INFORMATION OF RECORD. THEY ARE NOT WARRANTED TO BE EXACTLY LOCATED NOR IS IT WARRANTED THAT ALL UNDERGROUND UTILITIES OR OTHER STRUCTURES ARE SHOWN ON THIS PLAN.
4) HORIZONTAL DATUM IS BASED ON MASS. GRID SYSTEM, NAD 1983. ELEVATIONS SHOWN ON THIS PLAN REFER TO NAVD OF 1988.
5) BOTH PARCELS LIE ENTIRELY WITHIN ZONE X (UNSHADED) (AREAS TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN) AS SHOWN ON THE FLOOD INSURANCE RATE MAP FOR WORCESTER COUNTY, MASSACHUSETTS, MAP NUMBER 25017C0867E, EFFECTIVE DATE JULY 4, 2011.
6) THE LOT LIES ENTIRELY WITHIN THE HIGHWAY INDUSTRIAL DISTRICT (IB) AS SHOWN ON THE "ZONING DISTRICT MAP OF MILFORD, MASSACHUSETTS". DIMENSIONAL REQUIREMENTS FOR A (IB) AT THE TIME OF THIS SURVEY ARE:

	REQUIRED
MINIMUM LOT AREA	80,000 S.F.
MINIMUM FRONTAGE	230 FEET
MINIMUM FRONT YARD SETBACK	50 FEET
MINIMUM SIDE YARD SETBACK	25 FEET
MINIMUM REAR YARD SETBACK	30 FEET
MAXIMUM BUILDING HEIGHT	60 FEET

7) THE WETLANDS SHOWN ON THIS PLAN WERE FLAGGED BY VHB ENVIRONMENTAL DEPARTMENT AND FIELD SURVEYED BY VHB IN MARCH, 2020. THE WETLANDS ALSO REFLECT COMMENTS MADE IN A MEMO DATED 9-11-2020 BY PARE CORP.
8) THE TREE SYMBOL OUTLINE SHOWN ON THIS PLAN DOES NOT REPRESENT THE ACTUAL TREE CANOPY.
9) THIS SURVEY WAS PREPARED WITHOUT THE BENEFIT OF A CURRENT TITLE REPORT AND MAY BE SUBJECT TO ADDITIONAL INFORMATION DISCLOSED IN SUCH.

3. WETLAND FLAGS IDENTIFYING WETLAND RESOURCE AREAS WERE PLACED BY VHB ON FEBRUARY 11, 2020, AND REVIEWED AND LOCATED BY PARE CORPORATION ON JULY 23, 2020.

GENERAL NOTES

1. THE COMMONWEALTH OF MASSACHUSETTS STANDARD SPECIFICATIONS FOR HIGHWAYS AND BRIDGE CONSTRUCTION, 2020 EDITION OR LATEST REVISION, AND THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION CONSTRUCTION STANDARD DETAILS ARE MADE A PART HEREOF AS FULLY AND COMPLETELY AS IF ATTACHED HERETO. ALL WORK SHALL MEET OR EXCEED THE MASSACHUSETTS STANDARD SPECIFICATIONS FOR HIGHWAY AND BRIDGE CONSTRUCTION, WITH LATEST REVISIONS. THE LATEST REVISION OF THE STANDARD SPECIFICATIONS MAY BE OBTAINED AT THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION.
2. THE CONTRACTOR SHALL MAKE ALL NECESSARY CONSTRUCTION NOTIFICATIONS AND APPLY FOR AND OBTAIN ALL NECESSARY CONSTRUCTION PERMITS, PAY ALL FEES AND POST ALL BONDS ASSOCIATED WITH THE SAME, AND COORDINATE WITH THE ENGINEER AND OWNER'S REPRESENTATIVE AS REQUIRED.
3. THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR JOB SITE SAFETY. THE CONTRACTOR SHALL PROVIDE TEMPORARY FENCING AND/OR BARRIERS AROUND ALL OPEN EXCAVATED AREAS IN ACCORDANCE WITH OSHA FEDERAL, STATE, AND LOCAL REQUIREMENTS.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THAT THE PROPOSED IMPROVEMENTS SHOWN ON THE PLANS DO NOT CONFLICT WITH ANY KNOWN EXISTING OR OTHER PROPOSED IMPROVEMENTS. IF ANY CONFLICTS ARE DISCOVERED, THE CONTRACTOR SHALL NOTIFY THE OWNER AND THE ENGINEER PRIOR TO INSTALLATION OF ANY PORTION OF THE SITE WORK WHICH WOULD BE AFFECTED. NO FIELD ADJUSTMENTS IN THE LOCATION OF SITE ELEMENTS SHALL BE MADE WITHOUT THE ENGINEERS APPROVAL.
5. IF ANY DEVIATION OR ALTERATION OF THE WORK PROPOSED ON THESE DRAWINGS IS REQUIRED, THE CONTRACTOR SHALL IMMEDIATELY CONTACT AND COORDINATE ANY DEVIATIONS WITH THE ENGINEER AND OWNER.
6. ANY AREA OUTSIDE OF THE LIMIT OF WORK THAT IS DISTURBED SHALL BE RESTORED TO ITS ORIGINAL CONDITION AT NO ADDITIONAL COST TO THE OWNER.
7. ALL SITE WORK SHALL MEET OR EXCEED THE SITE WORK SPECIFICATIONS PREPARED FOR THIS PROJECT.
8. ALL SIGNS SHALL BE REFLECTORIZED TYPE III SHEETING AND CONFORM WITH THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES, LATEST REVISION.
9. ALL UTILITIES (LOCATION AND ELEVATION) DEPICTED SHALL BE CONSIDERED APPROXIMATE ONLY. BEFORE COMMENCING SITE WORK IN ANY AREA, CONTACT "DIG SAFE" AT 1-888-DIG-SAFE (1-888-344-7233) TO ACCURATELY LOCATE UNDERGROUND UTILITIES. ALL DAMAGE TO EXISTING UTILITIES OR STRUCTURES, AND THE COST TO REPAIR THE DAMAGES TO INITIAL CONDITIONS, AS SHOWN ON THE PLANS SHALL BE THE CONTRACTOR'S RESPONSIBILITY.
10. NO EXCAVATION SHALL BE DONE UNTIL COMPANIES ARE PROPERLY NOTIFIED IN ADVANCE. NOTE THAT NOT ALL EXISTING UNDERGROUND UTILITIES ARE SHOWN. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL RESPECTIVE UTILITY COMPANIES TO VERIFY AND LOCATE EXISTING UTILITIES.

LAYOUT NOTES

1. ALL LINES ARE PERPENDICULAR OR PARALLEL TO THE LINES FROM WHICH THEY ARE MEASURED UNLESS OTHERWISE INDICATED.
2. ACCESSIBLE RAMPS SHALL BE PER THE AMERICAN WITH DISABILITIES ACT (ADA) ACCESSIBILITY GUIDELINES AND CODE OF MASSACHUSETTS REGULATIONS (CMR) TITLE 521 OF THE ARCHITECTURAL ACCESS BOARD REGULATIONS.
3. PRIOR TO COMMENCING WORK, THE CONTRACTOR SHALL PERFORM BENCHMARK FIELD LEVEL VERIFICATION AND COORDINATE LAYOUT CHECK. THE CONTRACTOR SHALL CONTACT PARE CORPORATION IF ANY DISCREPANCIES ARE FOUND.
4. DIMENSIONS OF PARKING SPACES AND DRIVEWAYS ARE FROM FACE OF CURB TO FACE OF CURB. DIMENSIONS FROM BUILDING ARE FROM FACE OF BUILDING TO FACE OF CURB.
5. ALIGN WALKWAYS ON DOORWAYS THEY SERVE TO PROVIDE MINIMUM REQUIRED MANEUVERING CLEARANCE IN ACCORDANCE WITH THE AMERICAN WITH DISABILITIES ACT (ADA) ACCESSIBILITY GUIDELINES AND CODE OF MASSACHUSETTS REGULATIONS (CMR) TITLE 521 OF THE ARCHITECTURAL ACCESS BOARD REGULATIONS.

DEMOLITION NOTES

1. THE CONTRACTOR SHALL COORDINATE ALL DEMOLITION OF STRUCTURES, PAVEMENT AND CONCRETE MATERIALS, AND UTILITIES WITH APPROPRIATE PROPOSED SITE GENERAL, GRADING, AND UTILITY DRAWINGS.
2. ALL NOTED UTILITIES TO BE REMOVED AND DISPOSED OF, RELOCATED OR CAPPED REPRESENT ALL KNOWN SITE CONDITIONS TO BE DEMOLISHED. THE CONTRACTOR SHALL COORDINATE ALL UNFORESEEN CONDITIONS WITH THE PROJECT ENGINEER, OWNER AND/OR RESPECTIVE UTILITY COMPANIES PRIOR TO PROCEEDING WITH WORK.
3. WATER, SEWER, DRAINAGE, GAS, AND OTHER SITE UTILITIES SERVICING THE EXISTING FACILITIES ARE TO REMAIN ACTIVE THROUGHOUT CONSTRUCTION.
4. THERE SHALL BE NO INTERRUPTION OF UTILITY SERVICES DURING THE CONSTRUCTION OPERATION WITHOUT APPROVAL OF THE OWNER.

GRADING AND UTILITY NOTES

1. UNDERGROUND UTILITIES DEPICTED WERE COMPILED FROM AVAILABLE RECORD PLANS AND SHALL BE CONSIDERED APPROXIMATE ONLY. BEFORE COMMENCING SITE WORK IN ANY AREA, CONTACT "DIG SAFE" AT 1-888-DIG-SAFE (1-888-344-7233) TO ACCURATELY LOCATE UNDERGROUND UTILITIES. ANY DAMAGE TO EXISTING UTILITIES OR STRUCTURES DEPICTED OR NOT DEPICTED ON THE PLANS SHALL BE THE CONTRACTOR'S RESPONSIBILITY. COSTS TO REPAIR SUCH DAMAGES SHALL BE THE CONTRACTOR'S RESPONSIBILITY. NO EXCAVATION SHALL BE DONE UNTIL UTILITY COMPANIES ARE PROPERLY NOTIFIED.
2. ALL WORK PERFORMED AND ALL MATERIALS FURNISHED SHALL CONFORM WITH THE LINES AND GRADES ON THE PLANS AND SITE WORK SPECIFICATIONS.
3. AT ALL LOCATIONS WHERE EXISTING CURBING OR PAVEMENT ABUT NEW CONSTRUCTION, THE EDGE OF THE EXISTING CURB OR PAVEMENT SHALL BE SAW CUT TO A CLEAN, SMOOTH EDGE. BLEND NEW PAVEMENT AND CURBS SMOOTHLY INTO EXISTING BY MATCHING LINES, GRADES AND JOINTS.
4. ALL UTILITY COVERS, GRATES, ETC. SHALL BE ADJUSTED TO BE FLUSH WITH THE SURROUNDING SURFACE OR PAVEMENT FINISH GRADE. RIM ELEVATIONS OF STRUCTURES AND MANHOLES ARE APPROXIMATE. FINAL ELEVATIONS ARE TO BE SET FLUSH AND CONSISTENT WITH THE GRADING PLANS.
5. THE CONTRACTOR SHALL MAKE ALL ARRANGEMENTS FOR THE ALTERATION OF PRIVATE UTILITIES BY THE UTILITY COMPANIES, AS REQUIRED.
6. WHERE AN EXISTING UTILITY IS FOUND TO CONFLICT WITH THE PROPOSED WORK, THE LOCATION, ELEVATION AND SIZE OF THE UTILITY SHALL BE ACCURATELY DETERMINED WITHOUT DELAY BY THE CONTRACTOR AND THE INFORMATION SHALL BE PROVIDED ON A SKETCH TO SCALE OF THE EXISTING UTILITY WITH TIES TO KNOWN POINTS, PHOTOS AND FURNISHED TO THE ENGINEER FOR RESOLUTION.
7. THE CONTRACTOR SHALL PROTECT ALL UNDERGROUND DRAINAGE, SEWER AND UTILITY FACILITIES FROM EXCESSIVE VEHICULAR LOADS DURING CONSTRUCTION. ANY DAMAGE TO THESE FACILITIES RESULTING FROM CONSTRUCTION LOADS SHALL BE RESTORED TO ORIGINAL CONDITION.
8. GAS, ELECTRIC, AND COMMUNICATIONS ROUTING ARE SUBJECT TO REVIEW AND APPROVAL BY APPROPRIATE UTILITY COMPANIES.
9. DURING CONSTRUCTION OPERATIONS, THE CONTRACTOR SHALL PROTECT EXISTING UTILITIES BY PROVIDING TEMPORARY SUPPORTS OR SHEETING AS REQUIRED AT NO ADDITIONAL COST TO THE OWNER.
10. ALL GRAVITY SANITARY PIPING SHALL BE SDR-35 PVC. ALL SEWER CONSTRUCTION SHALL CONFORM TO THE RULES AND REGULATIONS OF THE MILFORD SEWER DEPARTMENT.
11. ALL WATER LINE BENDS AND TEES SHALL BE REINFORCED WITH THRUST BLOCKS. ALL WATER DISTRIBUTION PIPING AND FITTINGS MUST ADHERE TO THE MILFORD WATER COMPANY SPECIFICATIONS AND SHALL BE INSPECTED BEFORE, DURING, AND AFTER CONSTRUCTION PRIOR TO TAPPING THE SERVICE MAIN.
12. EXCAVATION REQUIRED WITHIN THE PROXIMITY OF EXISTING UTILITY LINES SHALL BE DONE BY HAND. CONTRACTOR SHALL REPAIR ANY DAMAGE TO EXISTING UTILITY LINES OR STRUCTURES INCURRED DURING CONSTRUCTION OPERATIONS AT NO COST TO THE OWNER.
13. PITCH EVENLY BETWEEN SPOT GRADES. ALL PAVED AREAS MUST PITCH TO DRAIN AT A MIN. OF 1/8" PER FOOT UNLESS SPECIFIED.
14. THE PROPOSED WALKWAYS SHALL HAVE A MAXIMUM CROSS SLOPE OF 2% AND A MAXIMUM RUNNING SLOPE OF 5% AS SHOWN ON CONSTRUCTION DETAILS AND GRADING PLAN.

STORMWATER MANAGEMENT SYSTEM INSPECTION AND MAINTENANCE NOTES

DURING CONSTRUCTION (CONTRACTOR'S RESPONSIBILITY)

1. THE CONTRACTOR SHALL REMOVE SEDIMENT AND DEBRIS FROM ALL CATCH BASINS, MANHOLES, AND THE DRAINAGE SYSTEM ON A ROUTINE BASIS, IMMEDIATELY FOLLOWING SITE STABILIZATION, AND PRIOR TO PROJECT COMPLETION AND ACCEPTANCE.
2. THE CLOSED DRAINAGE SYSTEM AND ASSOCIATED STRUCTURES SHALL BE CLEANED AND FLUSHED BY THE CONTRACTOR AT THE COMPLETION OF CONSTRUCTION, AND THE CONTRACTOR SHALL BE RESPONSIBLE FOR INSPECTION AND MAINTENANCE OF THE DRAINAGE SYSTEM UNTIL ACCEPTANCE OF THE SYSTEM BY THE ENGINEER AND THE TOWN OF MILFORD. FOLLOWING ACCEPTANCE OF THE PROPOSED DRAINAGE SYSTEM, THE OWNER OF THE SITE SHALL BE RESPONSIBLE FOR THE LONG-TERM INSPECTION AND MAINTENANCE OF THE DRAINAGE SYSTEM.
3. ANY ACCUMULATION OF PONDING WATER IN AREAS WITHIN THE LIMITS OF DISTURBANCE, OTHER THAN DESIGNATED AREAS, SHALL BE REMOVED ACCORDINGLY AND PREVENTED IN THE FUTURE.

POST CONSTRUCTION (OWNER'S RESPONSIBILITY)

1. TRASH, LITTER, SEDIMENT AND OTHER DEBRIS SHALL BE REMOVED FROM ANY STORMWATER MANAGEMENT SYSTEM FACILITY (INCLUDING BUT NOT LIMITED TO CATCH BASINS, MANHOLES, INLET, OUTLET AND DIVERSION STRUCTURES, AND STORMWATER BEST MANAGEMENT PRACTICES (BMPs)) A MINIMUM OF TWO TIMES PER YEAR, PREFERABLY IN THE SPRING AND FALL.
2. THE PARKING LOT AND ENTRY DRIVE SHALL BE SWEPT BY THE OWNER AS EARLY AS POSSIBLE EVERY SPRING AND ONCE IN THE FALL TO REMOVE SEDIMENTS.
3. ALL CLEANING AND MAINTENANCE OF STORMWATER MANAGEMENT SYSTEMS POST-CONSTRUCTION SHALL BE THE RESPONSIBILITY OF THE OWNER.

CATCH BASINS WITH SUMPS INSPECTION, MAINTENANCE, AND REPAIR NOTES

1. INSPECTIONS SHALL BE PERFORMED A MINIMUM OF TWO TIMES PER YEAR (SPRING/FALL). UNITS SHALL BE CLEANED ANNUALLY AND WHENEVER THE DEPTH OF SEDIMENT IS GREATER THAN OR EQUAL TO HALF THE SUMP DEPTH.
2. THE INLET GRATE SHALL NOT BE WELDED TO THE FRAME OR PAVED OVER SO THAT THE SUMP CAN BE EASILY INSPECTED AND MAINTAINED.
3. CARE SHALL BE TAKEN TO AVOID DAMAGING AND DISPLACING HOODS PLACED ON HOODED OUTLETS DURING CLEANING.

EROSION AND SEDIMENTATION CONTROL NOTES - MASSACHUSETTES

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ESTABLISHING AND MAINTAINING ALL TEMPORARY SOIL EROSION AND SEDIMENT CONTROLS IN ACCORDANCE WITH THE ENVIRONMENTAL PROTECTION AGENCY'S (EPA) NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) CONSTRUCTION GENERAL PERMIT (CGP) AND THE CONTRACT DOCUMENTS.
2. THE CONTRACTOR SHALL PREPARE AND SUBMIT A STORMWATER POLLUTION PREVENTION PLAN (SWPPP) PRIOR TO CONSTRUCTION.
3. THE CONTRACTOR SHALL PREPARE AND SUBMIT AN ELECTRONIC NOTICE OF INTENT (eNOI) WITH THE EPA IN ACCORDANCE WITH THE NDPES PERMIT REQUIREMENTS PRIOR TO CONSTRUCTION.
4. SOIL EROSION AND SEDIMENTATION CONTROLS SHALL BE PROVIDED IN ACCORDANCE WITH THE "MASSACHUSETTS EROSION AND SEDIMENT CONTROL GUIDELINES FOR URBAN AND SUBURBAN AREAS" AND THE NOTES AND DETAILS SHOWN IN THIS PLAN SET.
5. THE EROSION AND SEDIMENTATION CONTROLS SHOWN ON THE PLANS ARE INTENDED TO REPRESENT THE MINIMUM CONTROLS NECESSARY TO MEET ANTICIPATED SITE CONDITIONS. ADDITIONAL MEASURES SHALL BE IMPLEMENTED AS CONDITIONS WARRANT OR AS DIRECTED BY THE OWNER OR OWNER'S REPRESENTATIVE.
6. REQUIRED PERIMETER CONTROL SHALL BE PROPERLY ESTABLISHED, CLEARLY VISIBLE AND IN OPERATION PRIOR TO INITIATING ANY LAND CLEARING ACTIVITY AND/OR OTHER CONSTRUCTION RELATED WORK. SUCH FACILITIES SHALL REPRESENT THE LIMIT OF WORK. WORKERS SHALL BE INFORMED THAT NO CONSTRUCTION ACTIVITY IS TO OCCUR BEYOND THE LIMIT OF WORK AT ANY TIME THROUGHOUT THE CONSTRUCTION PERIOD.
7. AS FEASIBLE, CONSTRUCTION SHALL BE PHASED TO LIMIT THE AREA OF EXPOSED SOIL AND THE DURATION OF EXPOSURE. ALL DISTURBED AREAS SHALL BE TEMPORARILY AND/OR PERMANENTLY STABILIZED WITHIN 14 DAYS FOLLOWING COMPLETION OF GRADING ACTIVITIES.
8. THE CONTRACTOR SHALL INSPECT AND MAINTAIN ALL EROSION AND SEDIMENTATION CONTROL MEASURES IN ACCORDANCE WITH THE CONTRACT DOCUMENTS.
9. EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE INSPECTED AND MAINTAINED ON A WEEKLY BASIS AND AFTER EACH STORM EVENT OF 0.25 INCH OR GREATER DURING CONSTRUCTION TO ENSURE THAT THE EROSION CONTROL BARRIERS ARE INTACT.
10. CLEAN AND MAINTAIN SEDIMENTATION CONTROL BARRIERS WHEN SEDIMENT ACCUMULATES TO ONE HALF THE HEIGHT OF THE BARRIER. MATERIAL COLLECTED FROM THE SEDIMENTATION BARRIER SHALL BE REMOVED AS NECESSARY AND DISPOSED IN AN UPLAND AREA.
11. THE CONTRACTOR SHALL MAINTAIN A SUFFICIENT RESERVE OF VARIOUS EROSION CONTROL MATERIALS ONSITE AT ALL TIMES FOR EMERGENCY PURPOSES OR ROUTINE MAINTENANCE.
12. THE CONTRACTOR SHALL SCHEDULE HIS WORK TO ALLOW THE FINISHED SUB GRADE ELEVATIONS TO DRAIN PROPERLY WITHOUT PUDDLING. SPECIFICALLY, ALLOW WATER TO ESCAPE WHERE PROPOSED CURB MAY RETAIN RUNOFF PRIOR TO PAVING. PROVIDE TEMPORARY POSITIVE DRAINAGE, AS REQUIRED, TO STABILIZED DISCHARGE POINTS.
13. SOIL AND OTHER MATERIALS RESULTING FROM SITE CLEARING MAY BE RECYCLED AND/OR REUSED ON THE SITE AS APPROPRIATE. WASTE MATERIALS SHALL BE REMOVED FROM THE SITE.
14. CRUSHED STONE CONSTRUCTION ENTRANCES SHALL BE ESTABLISHED AT ALL POINTS OF INGRESS AND EGRESS.
15. TEMPORARY DIVERSIONS (TD) MAY CONSIST OF A DITCH OR SWALE, OR MAY BE ACHIEVED USING WOOD CHIP PILES, COIR LOGS, OR SIMILAR MATERIALS.
16. TEMPORARY SEDIMENT TRAPS (TST) AND TEMPORARY SWALES (TS) SHALL BE SIZED BY THE CONTRACTOR USING THE PARAMETERS CONTAINED IN THE MASSACHUSETTS EROSION AND SEDIMENT CONTROL GUIDELINES.
17. DUST SHALL BE CONTROLLED BY SPRINKLING OR OTHER APPROVED METHODS AS NECESSARY, OR AS DIRECTED BY THE OWNER OR OWNER'S REPRESENTATIVE.
18. CATCH BASINS AND STORM DRAINS SHALL BE PROTECTED WITH HAY BALES OR SEDIMENT BAGS IN PAVED AREAS UNTIL CONTRIBUTING AREA IS PERMANENTLY STABILIZED.
19. DEWATERING WASTEWATER PUMPED FROM EXCAVATIONS SHALL BE CONVEYED BY HOSE TO AN UPLAND AREA AND DISCHARGED INTO A DEWATERING BASIN, HAY BALE CORRALS, OR SEDIMENTATION BAGS.
20. CONSTRUCTION SITE WASTE MATERIALS SHALL BE PROPERLY CONTAINED ONSITE AND DISPOSED OFF SITE AT A LOCATION IN ACCORDANCE WITH THE LOCAL AND STATE REGULATIONS.
21. RIPRAP OR OTHER ENERGY DISSIPATERS SHALL BE USED WHERE NECESSARY TO CONTROL EROSION.
22. ANY EQUIPMENT THAT IS NOT READILY MOBILE (TRACK MACHINERY) SHALL BE PARKED WITHIN THE PROJECT LIMIT OF DISTURBANCE. LARGE AND/OR BULKY MATERIALS SHALL BE STORED SUCH THAT THEY DO NOT INTERFERE WITH THE ONGOING CONSTRUCTION ACTIVITIES OR EROSION CONTROL MEASURES.
23. NEWLY VEGETATED AREAS SHALL BE REGULARLY INSPECTED AND MAINTAINED TO ENSURE THE ESTABLISHMENT OF STABLE VEGETATED SURFACES.
24. THE CONTRACTOR SHALL NOT REMOVE ANY COMPOST FILTER SOCKS OR OTHER EROSION CONTROLS UNTIL THE CONTRIBUTING AREA IS PERMANENTLY STABILIZED.
25. ALL DRAINAGE STRUCTURES SHALL BE CLEARED OF ACCUMULATED SEDIMENT PRIOR TO ACCEPTANCE OF THE FINAL PROJECT. THE CONTRACTOR SHALL SCHEDULE HIS WORK TO ALLOW THE FINISHED SUB GRADE ELEVATIONS TO DRAIN PROPERLY WITHOUT PONDING. SPECIFICALLY, ALLOW WATER TO ESCAPE WHERE PROPOSED CURB MAY RETAIN RUNOFF PRIOR TO APPLICATION OF SURFACE PAVING. PROVIDE TEMPORARY POSITIVE DRAINAGE, AS REQUIRED, TO STABILIZED DISCHARGE POINTS.
26. INSTALLATION OF THE EROSION CONTROL BARRIERS AS ILLUSTRATED IS INTENDED TO REPRESENT THE MINIMUM SEDIMENTATION CONTROL FACILITIES NECESSARY TO MEET ANTICIPATED SITE CONDITIONS. ADDITIONAL EROSION CONTROL MEASURES SHALL BE IMPLEMENTED AS CONDITIONS WARRANT OR AS DIRECTED BY THE OWNER OR OWNER'S REPRESENTATIVE.
27. ALL DISTURBED AREAS SHALL BE STABILIZED WITHIN 14 DAYS UPON COMPLETION OF WORK IN THAT AREA.

SEDIMENT FOREBAY INSPECTION, MAINTENANCE, AND REPAIR NOTES

FOLLOWING CONSTRUCTION, THE COMPLETION OF THE INSPECTION AND MAINTENANCE REQUIREMENTS BELOW SHALL BE THE RESPONSIBILITY OF THE OWNER.

1. SEDIMENT FOREBAY SHALL BE INSPECTED A MINIMUM OF TWO TIMES PER YEAR AND AFTER EVERY STORM OF 2.7" INCH OR GREATER FOR TRASH, DEBRIS, SEDIMENT, EROSION, STANDING WATER, AND OVERALL PERFORMANCE. DEFECTS SHALL BE REPAIRED BY THE OWNER.
2. SEDIMENT FOREBAYS SHALL BE CLEANED IF SEDIMENT REACHES HALF THE DESIGN DEPTH.
3. SEDIMENT FOREBAY CHECK DAMS SHALL BE REPLACED IF DRAWDOWN TIMES WITHIN THE SEDIMENT FOREBAY EXCEED 48 HOURS FOLLOWING THE STORM EVENT.
4. ALL SEDIMENTS REMOVED SHALL BE DISPOSED OF AT AN APPROVED AND PERMITTED LOCATION.
5. VEGETATION SHALL NOT EXCEED 18" IN HEIGHT IN THE SEDIMENT FOREBAYS.

DETENTION BASIN INSPECTION, MAINTENANCE, AND REPAIR NOTES

1. SEDIMENT SHALL BE REMOVED FROM THE DETENTION BASIN WHEN THE SEDIMENT VOLUME EXCEEDS 10 PERCENT OF THE TOTAL BASIN VOLUME. THE REMOVED SEDIMENT SHALL BE DISPOSED OF AT AN APPROVED AND PERMITTED LOCATION.
2. FOLLOWING FIRST 6 MONTHS AFTER CONSTRUCTION
   - INSPECT INFILTRATION PRACTICES AFTER FIRST TWO RAINFALL EVENTS OF 1" OR MORE.
3. BI-ANNUALLY
   - INSPECT DETENTION BASIN A MINIMUM OF TWO TIMES PER YEAR, PREFERABLY ONCE IN APRIL AND ONCE IN OCTOBER.
   - MOW SIDE SLOPES AND BOTTOM OF DETENTION BASIN A MINIMUM OF TWO TIMES PER YEAR. THE VEGETATION SHALL NOT EXCEED 18" IN HEIGHT.
4. QUARTERLY
   - THE DETENTION BASIN OUTLET STRUCTURES AND ALL OUTFLOW CHANNELS SHOULD BE INSPECTED QUARTERLY BY THE OWNER.

DEMOLITION NOTES:

1. UTILITY SERVICE TO THE FACILITY SHALL NOT BE INTERRUPTED DUE TO UTILITY WORK SHOWN HEREON. ALL UTILITIES SHALL BE MAINTAINED THROUGHOUT CONSTRUCTION.
3. PRIOR TO COMMENCING SITE WORK IN ANY AREA, THE CONTRACTOR SHALL LOCATE EXISTING UTILITIES WITH THE PROJECT AREA USING GROUND–PENETRATING RADAR OR OTHER NONDESTRUCTIVE SURVEY METHODS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY EXISTING UTILITIES OR STRUCTURES WITHIN THE PROJECT AREA DEPICTED AND NOT DEPICTED ON THE PLANS. ANY DAMAGE TO EXISTING WORKING UTILITIES OR STRUCTURES NOT INTENDED TO BE REMOVED SHALL BE RESTORED TO ORIGINAL CONDITION AT NO ADDITIONAL COST TO THE OWNER.
4. PRIOR TO ANY UTILITY AND/OR DRAINAGE SYSTEM DEMOLITION, PROVISIONS FOR MAINTAINING THE UTILITY SHALL BE APPROVED BY THE OWNER OR THE OWNER'S REPRESENTATIVE BEFORE ANY RELATED WORK MAY COMMENCE.
5. ALL TEMPORARILY CUT UTILITIES SHALL BE PROTECTED FROM SEDIMENTATION UNTIL IT IS CONNECTED IN ITS POST–CONSTRUCTION POSITION.
6. REFER TO ELECTRICAL SITE PLAN FOR ALL ELECTRICAL AND TELECOMMUNICATIONS WORK, INCLUDING DEMOLITION.
7. REFER TO "CIVIL NOTES AND LEGEND" FOR ADDITIONAL NOTES.

EROSION & SEDIMENT CONTROL NOTES:

1. THE EROSION AND SEDIMENTATION CONTROLS SHOWN ON THE PLANS ARE INTENDED TO REPRESENT THE MINIMUM CONTROLS NECESSARY TO MEET ANTICIPATED SITE CONDITIONS. ADDITIONAL MEASURES SHALL BE IMPLEMENTED AS CONDITIONS WARRANT OR AS DIRECTED BY THE OWNER OR OWNER'S REPRESENTATIVE.
2. CONTRACTOR SHALL FURNISH, INSTALL, AND MAINTAIN SILT SACKS IN ALL EXISTING AND NEWLY INSTALLED CATCH BASINS UNTIL THE UPSTREAM AREA IS STABILIZED.
3. CONTRACTOR SHALL INSTALL AND MAINTAIN CONSTRUCTION ENTRANCES AT ALL POINTS OF EGRESS FROM THE SITE THROUGHOUT CONSTRUCTION.
4. THE CONTRACTOR SHALL MAINTAIN EROSION CONTROLS THROUGHOUT CONSTRUCTION. THE CONTRACTOR SHALL REPLACE DAMAGED EROSION CONTROLS AT THE OWNER AND ENGINEER'S REQUEST AT NO ADDITIONAL EXPENSE TO THE OWNER.
5. THE CONTRACTOR SHALL NOT LEAVE DISTURBED AREAS UNSTABILIZED FOR PERIODS MORE THAN 14 DAYS. PROVIDE TEMPORARY SEED OR MULCH ON DISTURBED AREAS THAT WILL REMAIN EXPOSED FOR GREATER THAN 14 DAYS.
6. INSTALL EROSION CONTROLS DOWNSTREAM OF ANY DISTURBED AREAS TO REDUCE POTENTIAL FOR EROSION. CONTRACTOR SHALL INDICATE LOCATIONS OF EROSION CONTROLS FOR REVIEW WITH GENERAL CONTRACTOR AND OWNER'S REPRESENTATIVE PRIOR TO COMMENCING WORK.
7. REFER TO "CIVIL NOTES AND LEGEND" FOR ADDITIONAL NOTES.

THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY EXISTING UTILITIES OR STRUCTURES WITHIN THE PROJECT AREA DEPICTED AND NOT DEPICTED ON THE PLANS. ANY DAMAGE TO EXISTING WORKING UTILITIES OR STRUCTURES NOT INTENDED TO BE REMOVED SHALL BE RESTORED TO ORIGINAL CONDITION AT NO ADDITIONAL COST TO THE OWNER.
4. PRIOR TO ANY UTILITY AND/OR DRAINAGE SYSTEM DEMOLITION, PROVISIONS FOR MAINTAINING THE UTILITY SHALL BE APPROVED BY THE OWNER OR THE OWNER'S REPRESENTATIVE BEFORE ANY RELATED WORK MAY COMMENCE.
5. ALL TEMPORARILY CUT UTILITIES SHALL BE PROTECTED FROM SEDIMENTATION UNTIL IT IS CONNECTED IN ITS POST-CONSTRUCTION POSITION.
6. REFER TO ELECTRICAL SITE PLAN FOR ALL ELECTRICAL AND TELECOMMUNICATIONS WORK, INCLUDING DEMOLITION.
7. REFER TO "CIVIL NOTES AND LEGEND" FOR ADDITIONAL NOTES.

EROSION & SEDIMENT CONTROL NOTES:

1. THE EROSION AND SEDIMENTATION CONTROLS SHOWN ON THE PLANS ARE INTENDED TO REPRESENT THE MINIMUM CONTROLS NECESSARY TO MEET ANTICIPATED SITE CONDITIONS. ADDITIONAL MEASURES SHALL BE IMPLEMENTED AS CONDITIONS WARRANT OR AS DIRECTED BY THE OWNER OR OWNER'S REPRESENTATIVE.
2. CONTRACTOR SHALL FURNISH, INSTALL, AND MAINTAIN SILT SACKS IN ALL EXISTING AND NEWLY INSTALLED CATCH BASINS UNTIL THE UPSTREAM AREA IS STABILIZED.
3. CONTRACTOR SHALL INSTALL AND MAINTAIN CONSTRUCTION ENTRANCES AT ALL POINTS OF EGRESS FROM THE SITE THROUGHOUT CONSTRUCTION.
4. THE CONTRACTOR SHALL MAINTAIN EROSION CONTROLS THROUGHOUT CONSTRUCTION. THE CONTRACTOR SHALL REPLACE DAMAGED EROSION CONTROLS AT THE OWNER AND ENGINEER'S REQUEST AT NO ADDITIONAL EXPENSE TO THE OWNER.
5. THE CONTRACTOR SHALL NOT LEAVE DISTURBED AREAS UNSTABILIZED FOR PERIODS MORE THAN 14 DAYS. PROVIDE TEMPORARY SEED OR MULCH ON DISTURBED AREAS THAT WILL REMAIN EXPOSED FOR GREATER THAN 14 DAYS.
6. INSTALL EROSION CONTROLS DOWNSTREAM OF ANY DISTURBED AREAS TO REDUCE POTENTIAL FOR EROSION. CONTRACTOR SHALL INDICATE LOCATIONS OF EROSION CONTROLS FOR REVIEW WITH GENERAL CONTRACTOR AND OWNER'S REPRESENTATIVE PRIOR TO COMMENCING WORK.
7. REFER TO "CIVIL NOTES AND LEGEND" FOR ADDITIONAL NOTES.

LEGEND

- TDS – TEMPORARY DIVERSION SWALE/BERM
- TST – TEMPORARY SEDIMENT TRAP
- TST LIMITS OF WET STORAGE AREA
- TST LIMITS OF DRY STORAGE AREA
- REMOVE & DISPOSE TREE. DISPOSE OF TREE AND STUMP OFF-SITE.
- PROTECT EXISTING TREE TO REMAIN.
- TP — PRIOR TO COMMENCING WORK, CONTRACTOR SHALL EXCAVATE TEST PIT TO CONFIRM LOCATION, ELEVATION, AND SIZE OF UTILITY. PROVIDE INFORMATION TO ENGINEER.

INSTALLATION

THE AREA OF THE EXIT SHOULD BE CLEARED OF ALL VEGETATION, ROOTS, AND OTHER OBJECTIONABLE MATERIAL. THE CRUSHED STONE SHALL BE PLACED TO THE SPECIFIED DIMENSIONS, AS NOTED ABOVE.

MAINTENANCE

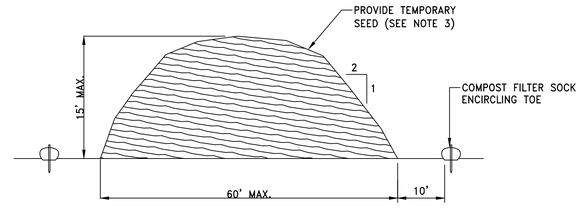
THE EXIT SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOWING OF SEDIMENTS ONTO PUBLIC RIGHT- OF-WAYS THIS WILL REQUIRE PERIODIC TOP DRESSING WITH ADDITIONAL STONE, OR ADDITIONAL LENGTH, AS CONDITIONS DEMAND, AND REPAIR, AND / OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT. ALL SEDIMENT SPILLED, DROPPED, WASHED OR TRACKED ONTO PUBLIC RIGHT-OF-WAYS MUST BE REMOVED IMMEDIATELY.

LOCATION

SEE PROJECT PLANS FOR LOCATION OF CONSTRUCTION EXIT.

CONSTRUCTION EXIT PROTECTION STONE STABILIZATION PAD

NOT TO SCALE



NOTES:

1. PRIOR TO CONSTRUCTION THE CONTRACTOR SHALL PREPARE A PLAN SHOWING THE PROPOSED LOCATION OF ALL STOCKPILE AREAS.
2. STOCKPILE AREA SHALL NOT EXCEED SPECIFIED DIMENSIONS WITHOUT APPROVAL FROM ENGINEER.
3. STOCKPILED ERODIBLE MATERIAL THAT WILL NOT BE USED FOR GREATER THAN 14 DAYS SHALL BE STABILIZED WITH TEMPORARY SEED IMMEDIATELY FOLLOWING PLACEMENT. USE MASSDOT STD. M6.03.1 EROSION SEED).

ERODIBLE MATERIAL STOCKPILE

M E M O R A N D U M

TO: Mr. Michael Giampietro, Chairman – Conservation Commission

FROM: Michael Dean, P.E. MD

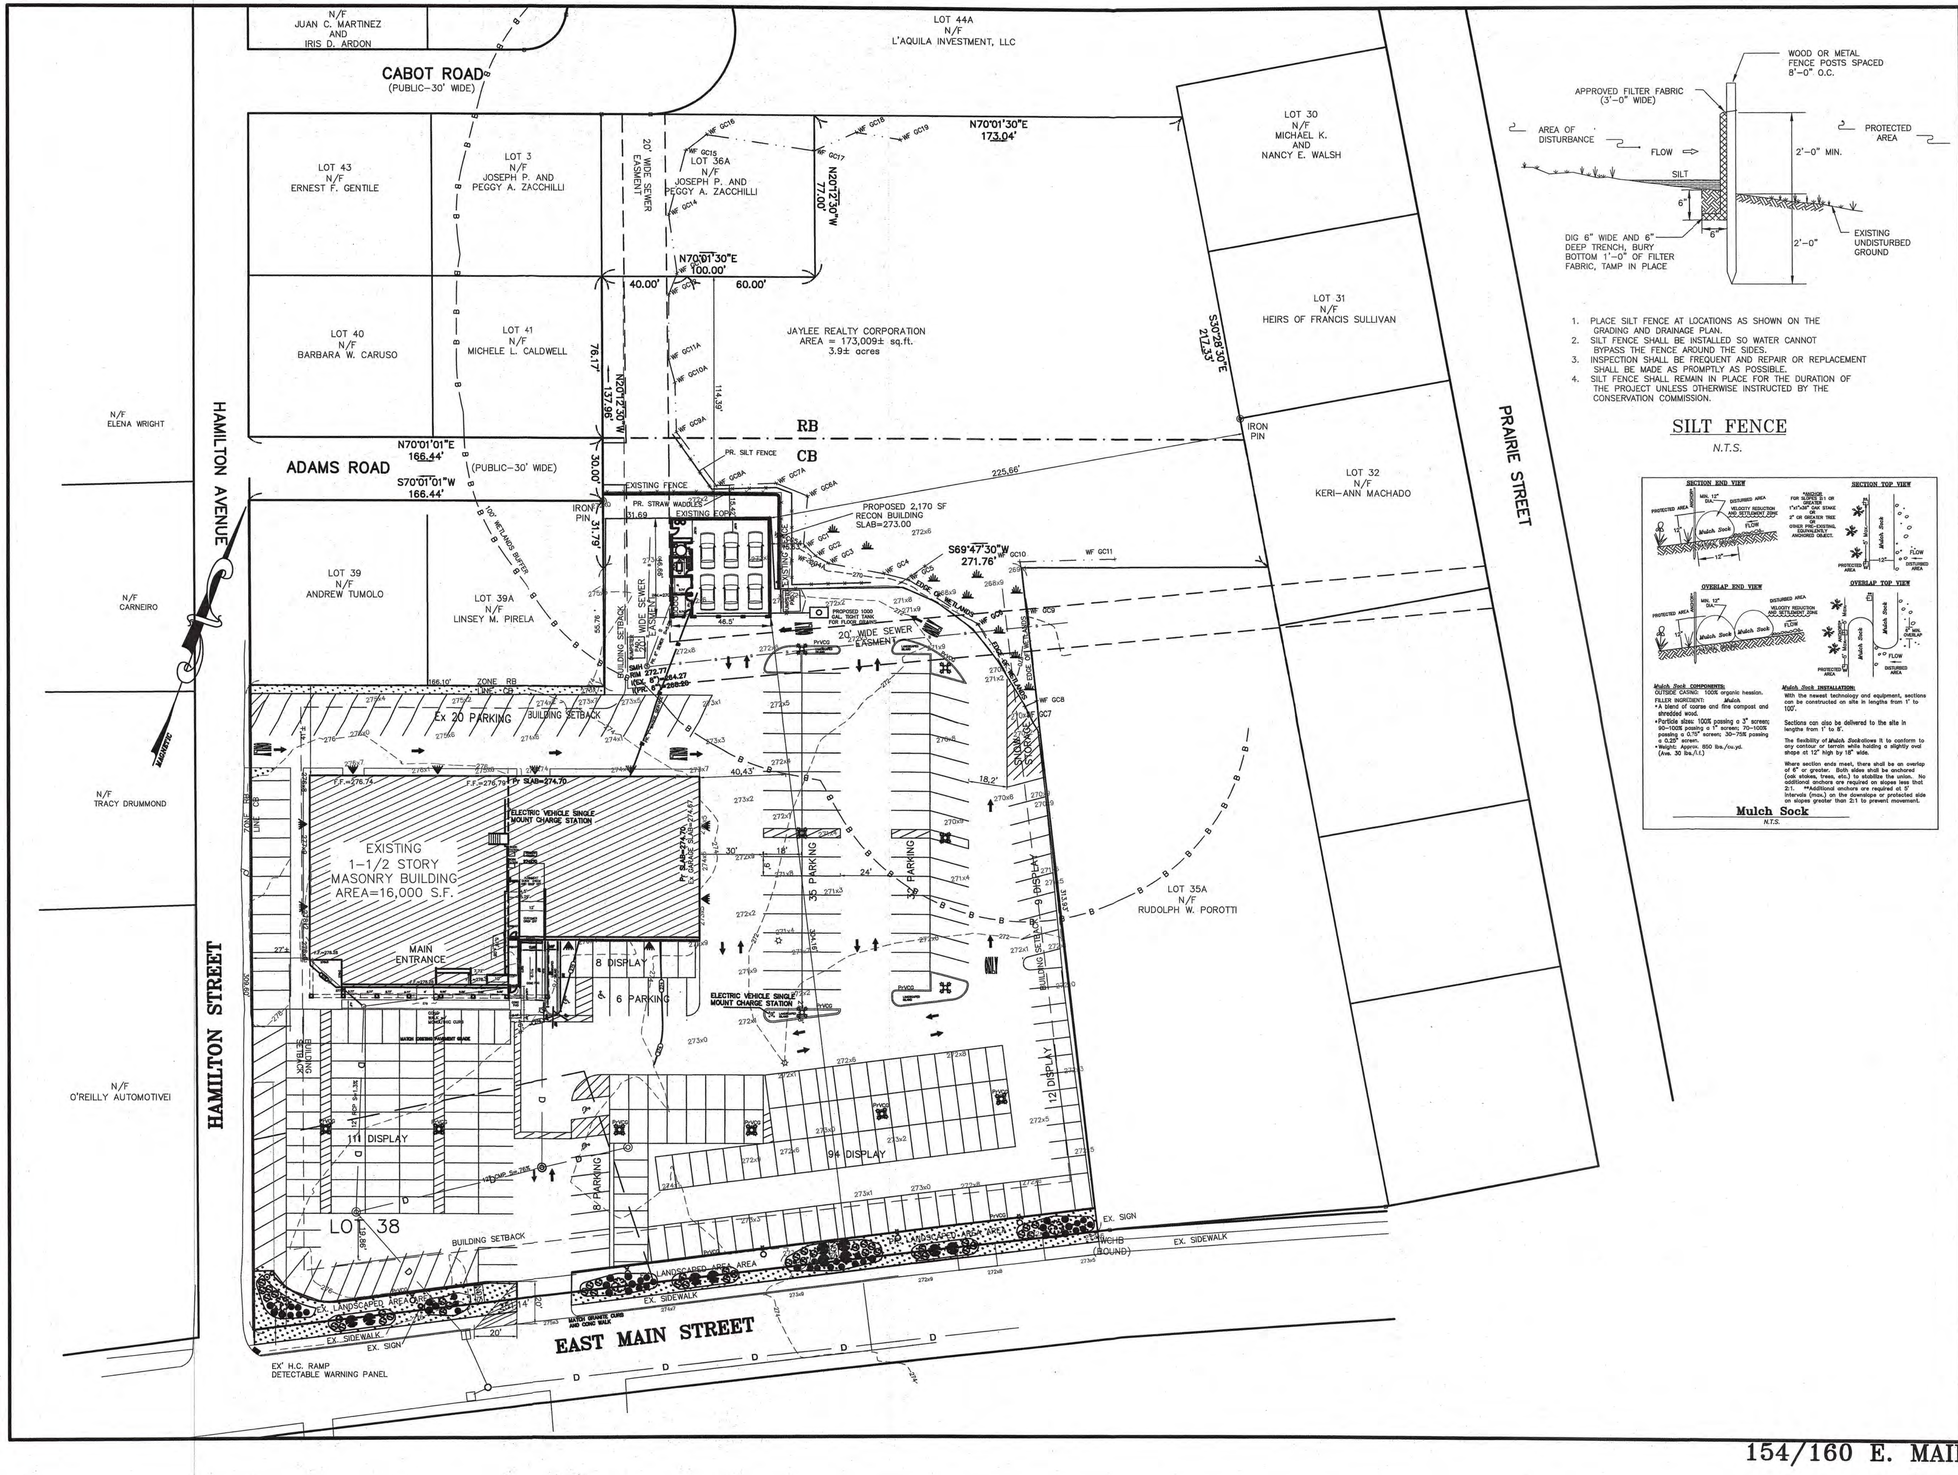
DATE: September 11, 2020

SUBJECT: **158 - 160 East Main Street (formerly #154) – Hyundai Dealership**
Notice of Intent - DEP File # 223-1182

The submittal is for a Notice of Intent associated with the Car Dealership at 158-160 East Main Street, the Applicant is Imperial Hyundai Corp., P O Box 444 Mendon, MA. The Parcels consists of 3.9 Acres, front portion of the parcel is Zoned as Neighborhood Commercial B (CB) and Single Family Residential – RB in the northern portion (rear) of the site. The parcels refer to the Town Assessors Map 33, Block 0, Lots 35, 36, 37 & 38.

This site has been in front of the Conservation Commission a number of times over the years, the current submittal is for a 2,356 SF detached building associated with Automobile Sales and Service. The proposed detached building is in a location that is currently paved.

Following a review of the submitted documents I recommend the issuance of an order of conditions.



1. PLACE SILT FENCE AT LOCATIONS AS SHOWN ON THE GRADING AND DRAINAGE PLAN.
2. SILT FENCE SHALL BE INSTALLED SO WATER CANNOT BYPASS THE FENCE AROUND THE SIDES.
3. INSPECTION SHALL BE FREQUENT AND REPAIR OR REPLACEMENT SHALL BE MADE AS PROMPTLY AS POSSIBLE.
4. SILT FENCE SHALL REMAIN IN PLACE FOR THE DURATION OF THE PROJECT UNLESS OTHERWISE INSTRUCTED BY THE CONSERVATION COMMISSION.

SILT FENCE

N.T.S.

Mulch Sock COMPONENTS:
OUTSIDE CASING: 100% organic hessian.
FILLER INGREDIENTS: Mulch
- A blend of coarse and fine compost and shredded wood.
- Particle sizes: 100% passing a 3" screen; 90–100% passing a 1" screen; 70–100% passing a 0.75" screen; 30–75% passing a 0.25" screen.
- Weight: Approx. 850 lbs./cu.yd. (Ave. 30 lbs./l.f.)

Mulch Sock INSTALLATION:
With the newest technology and equipment, sections can be constructed on site in lengths from 1' to 100'.

Sections can also be delivered to the site in lengths from 1' to 8'.

The flexibility of Mulch Sock allows it to conform to any contour or terrain while holding a slightly oval shape at 12" high by 18" wide.

Where section ends meet, there shall be an overlap of 6" or greater. Both sides shall be anchored (oak stakes, trees, etc.) to stabilize the union. No additional anchors are required on slopes less that 2:1. **Additional anchors are required at 5' intervals (max.) on the downslope or protected side on slopes greater than 2:1 to prevent movement.

Mulch Sock

N.T.S.

CONSTRUCTION ON THIS LOT IS SUBJECT TO ANY EASEMENTS, RIGHTS–OF–WAY, RESTRICTIONS, RESERVATIONS OR OTHER LIMITATIONS WHICH MAY BE REVEALED BY AN EXAMINATION OF THE TITLE.

"WARNING"
EXISTING UTILITY LINES INDICATED OR NOTED ON THESE DRAWINGS ARE SHOWN AS OBTAINED FROM EXISTING INFORMATION AND ARE ONLY APPROXIMATE IN LOCATION. THE CONTRACTOR SHALL TAKE CAUTION IN THESE AREAS TO AVOID DAMAGE TO EXISTING UTILITY LINES AND/OR HARM TO PERSONNEL ENGAGED IN WORKING IN THESE AREAS.
CALL "DIG SAFE" 1–888–DIG–SAFE (1–888–344–7233).

EXISTING LINES OTHER THAN THOSE INDICATED ON THESE DRAWINGS MAY BE ON THE SITE. THE CONTRACTOR IS WARNED TO PROCEED WITH CAUTION WITH ALL WORK, ESPECIALLY EXCAVATION WORK, AND TO MAKE ALL POSSIBLE INVESTIGATIONS AS TO POSSIBLE UNMARKED UTILITY LINES.

NOTES

1. THIS PLAN REFERS TO MILFORD ASSESSORS MAP 33 LOTS 35, 37 & 38.

Milford, MA, 01757

Re: Notice of Intent for **21 Beaver Street - Proposed Transportation Terminal**
DEP **File # 223-** _____

Dear Mr. Giampietro:

I have reviewed the current (3rd) Notice of Intent filing for 21 Beaver Street (lot 25A). The submittal is for a Proposed Transportation Terminal. The applicant is Route 85 Realty Corp., P.O. Box 444, Mendon, MA 01756.

The site consists of 14.58 Acres, Zoned Highway Industrial B (IB) and is located on the west side of Beaver Street (behind McDonald's Restaurant).

The 1st NOI was for Site Preparation (for a future commercial site). The 1st filing has an Order of Conditions, DEP File number 223-1103. The 2nd NOI was for the filling of a small portion of Bordering Vegetated Wetlands (BVW) and a Drainage Ditch / Bank associated with the aforementioned small portion of BVW. The 2nd NOI has an Order of Conditions, DEP File # 223-1132.

The resource areas associated with the parcel are: Bordering Vegetated Wetlands, Bank and 100Year Flood Plain. The resource areas where delineated and re-evaluated by Goddard Consulting, LLC.

Following a review of the above referenced documents I offer the following comments:

1. There is 3,545 SF of Bordering Vegetated Wetland proposed to be filled under this NOI, plus 860 SF previously approved, with a total of 6,489 SF of Wetland Replication, a 1.5:1 Ratio. 40 Lineal feet (LF) of bank is to be filled also. The resource area bank, that is associated with the site is essentially a drainage ditch that carried drainage from the McDonald's site to the main wetlands.

2. Erosion control measures **are** shown on the plan and the detail **does** include Silt Fence with Mulch Sock.

3. The larger full-scale Resource Area Plan **does** include the Replication Procedure / information that is included in the Report by Goddard Consulting.

4. Since the original submittal, the drainage analysis / design has been revised along with a final set of design plans.

I recommend the issuance of an Order of Conditions for the project.

Sincerely,

Michael Dean, P.E.
Town Engineer

RE: Notice of Intent
21 Beaver Street (Map 44, Lot 25A), Milford, MA
(DEP File #233-1132)

Dear Milford Conservation Commission:

Goddard Consulting, LLC is pleased to submit this Notice of Intent (NOI) on behalf of the applicant, Rte. 85 Realty Corporation, for the construction of a parking lot with associated grading and infiltration system. Work includes impacts to Bordering Vegetated Wetlands (BVW), Bank, and Land Under Water Bodies and Waterways (LUW) with wetland replication. This new NOI is being filed as the work proposed is beyond the original extent of the Order of Conditions (DEP File #233-1132) issued in 2017.

Seven hard copies and a digital copy of the NOI application have been submitted for your review. A list of enclosed documents are as follows:

- NOI (WPA Form 3) Application Form
- NOI Wetland Fee Transmittal Form
- Copy of Fee Checks
- Affidavit of Service, Notification to Abutters, Certified Abutters List and Map
- Order of Conditions (WPA Form 5), DEP File #223-1103, 11/17/2017
- USGS Site Locus, Goddard Consulting, LLC. 3/4/2020
- Orthoview of Site, Goddard Consulting, LLC. 10/7/2020
- Wetland Replication Area - Planting Plan, Goddard Consulting, LLC. 10/7/2020
- Stormwater Report for "495 Transportation Terminal", Milford, MA, Guerriere & Halnon, Inc. Revised: 2/19/2020
- Site Plan: *"495 Transportation Depot I" Transportation Terminal Site Plan 21 Beaver Street, Milford MA,* 10 Sheets, Guerriere & Halnon, Inc., 9/8/2020

1.0 Site Permitting History

An Order of Conditions (DEP File #233-1132) was issued for this site in 2017 for clearing, grading and the construction of a temporary stormwater basin. This work included the filling of a non-jurisdictional wetland ditch (480 linear feet) and 860 square feet (SF) of BVW. The Construction of a 4,477 SF wetland replication area with interior Bank restoration was approved to replicate the resource areas impacted. This replication area is yet to be constructed.

2.0 Existing Conditions

The site of the proposed project consists of one parcel totaling approximately 14.58 acres. The northern portion of the site is an open gravel area, created under the OOC for DEP file #223-1132. The ditch (480 linear feet of Bank) and BVW (860 SF) have been filled under the OOC (DEP #223-1132). The temporary stormwater basin is in place and the wetland replication area has been cleared for construction. Erosion controls are in place at the limit of work, preventing sedimentation into BVW, which resides just south of the gravel area. In general, the site is dominated with native species of vegetation (red maple, white pine, red oak, witch hazel, highbush blueberry, sweet pepperbush, ferns, raspberry, greenbrier, and grape) with small pockets disturbed by invasive species (glossy buckthorn and oriental bittersweet).

There is a flagged intermittent stream, near wetland flag WF-GC73, which includes two resource areas: Bank (40 linear feet) and Land Under Water (LUW; 267 SF).

According to the Mass GIS data layers for NHESP, this site is not located within Estimated and/or Priority Habitat of Rare Wildlife and has no mapped potential or certified vernal pools. The site is not located in an ACEC. There are Zone AE and X FEMA Flood Zones located both within and outside of the delineated BVW boundary. The resource area, Bordering Land Subject to Flooding (BLSF), extends from the delineated wetland line up to the 100-year FEMA flood elevation (249.40) at the southeastern portion of the lot.

3.0 Project Summary

The proposed project has complied with the work approved under the OOC for DEP file # 233-1132 and shows cumulative impacts to all of the on-site resource areas. The project involves the construction of a parking lot (264 parking spaces) with associated grading and an underground stormwater infiltration system that will overflow its discharge into the Buffer Zone around wetland flag WF-GC27. Rip-rap is proposed to be installed along the western and southern edges of the parking lot.

To allow for fluid parking areas, the project proposes impacting an additional 3,545 SF of BVW. Total wetland fill (including the 860 SF of fill from DEP #233-1132) equals 4,405 SF. Filling of wetlands is proposed between wetland flags WF-GC17 through WF-GC27, WF-GC37 through WF-GC76, WF-GC98 through WF- GC101, and WF-GC101 through WF-GC105 and will be referred to as BVW fill areas 1, 2, 3, and 4 respectively. BVW fill area 1 hosts two species of invasive vegetation including a dominant shrub (20% cover) and ground cover (20% cover) of glossy buckthorn and abundant oriental bittersweet vines (25% cover) which have weighed down saplings and shrubs within the BVW. BVW fill areas 2, 3 and 4 are noticeably void of any invasive species. The BVW will be replicated by combining the original wetland replication area (4,477 SF) to create 6,489 SF of BVW adjacent to the existing BVW. This results in a 1.45 replication ratio.

BVW fill area 2 encompasses two additional resource areas, Bank (40 linear feet) and Land Under Water (LUW; 267 SF), that are proposed to be impacted by the construction the parking lot.

4.0 Regulatory Compliance

This project will comply with the regulations set forth in the WPA. The following Inland Resource Areas are jurisdictional under the WPA and are proposed to be altered in some form: BVW, Bank, LUW & the 100-foot Buffer Zone to BVW (the Buffer Zone).

4.1 BVW General Performance Standards

General Performance Standards associated with filling BVW must be followed for the project to be permittable. Per the WPA 310 CMR 10.55(4)(b, d, & e), the following performance standards must be met:

(b) Notwithstanding the provisions of 310 CMR 10.55(4)(a), the issuing authority may issue an Order of Conditions permitting work which results in the loss of up to 5000 square feet of Bordering Vegetated Wetland when said area is replaced in accordance with the following general conditions and any additional, specific conditions the issuing authority deems necessary to ensure that the replacement area will function in a manner similar to the area that will be lost:

1. the surface of the replacement area to be created ("the replacement area") shall be equal to that of the area that will be lost ("the lost area");

2. the ground water and surface elevation of the replacement area shall be approximately equal to that of the lost area;

3. The overall horizontal configuration and location of the replacement area with respect to the bank shall be similar to that of the lost area;

4. the replacement area shall have an unrestricted hydraulic connection to the same water body or waterway associated with the lost area;

5. the replacement area shall be located within the same general area of the water body or reach of the waterway as the lost area;

6. at least 75% of the surface of the replacement area shall be reestablished with indigenous wetland plant species within two growing seasons, and prior to said vegetative reestablishment any exposed soil in the replacement area shall be temporarily stabilized to prevent erosion in accordance with standard U.S. Soil Conservation Service methods; and

7. the replacement area shall be provided in a manner which is consistent with all other General Performance Standards for each resource area in Part III of 310 CMR 10.00. In the exercise of this discretion, the issuing authority shall consider the magnitude of the alteration and the significance of the project site to the interests identified in M.G.L. c. 131, § 40, the extent to which adverse impacts can be avoided, the extent to which adverse impacts are minimized, and the extent to which mitigation measures, including replication or restoration, are provided to contribute to the protection of the interests identified in M.G.L. c. 131, § 40.

The proposed project will result in the cumulative loss of less than 5,000 SF (4,405 SF) of BVW and will be replaced in the following way:

1. The surface of the replacement area to be created, “the Wetland Replication Area” (6,489 SF), will be greater than that of the area that will be lost “the wetland fill area” (4,405 SF), exceeding the required 1:1 ratio set forth in 310 CMR 10.55(4)(b)(1).
2. The ground water and surface elevation of the Wetland Replication Area (249, 251) will be approximately equal to that of the wetland fill area (249, 251).

3. The overall horizontal configuration and location of the Wetland Replication Area with respect to the Bank will be similar to that of the wetland fill area.
4. The replacement area will have an unrestricted hydraulic connection to the same water body or waterway associated with the wetland fill area.
5. The replacement area will be located within the same general area of the waterbody or reach of the waterway as the wetland fill area.
6. At least 75% of the surface of the Wetland Replication Area will be reestablished with indigenous wetland plant species within two growing seasons, and prior to said vegetative reestablishment, any exposed soil in the Wetland Replication Area shall be temporarily stabilized to prevent erosion in accordance with standard U.S. Soil Conservation Service methods; and
7. The Wetland Replication Area will be provided in a manner which is consistent with all other General Performance Standards for each resource area in Part III of 310 CMR 10.00.

(d) Notwithstanding the provisions of 310 CMR 10.55(4)(a),(b) and (c), no project may be permitted which will have any adverse effect on specified habitat sites of rare vertebrate or invertebrate species, as identified by procedures established under 310 CMR 10.59.

The proposed project will not have any adverse effects on specified habitat sites of rare vertebrate or invertebrate species according to the MassGIS data layers for the Natural Heritage and Endangered Species Program (NHESP).

(e) Any proposed work shall not destroy or otherwise impair any portion of a Bordering Vegetated Wetland that is within an Area of Critical Environmental Concern designated by the Secretary of Energy and Environmental Affairs under M.G.L. c. 21A, § 2(7) and 301 CMR 12.00: Areas of Critical Environmental Concern. 310 CMR 10.55(4)(e):

1. *supersedes the provisions of 310 CMR 10.55(4)(b) and (c);*
2. *shall not apply if the presumption set forth at 310 CMR 10.55(3) is overcome;*
3. *shall not apply to work proposed under 310 CMR 10.53(3)(l); and*
4. *shall not apply to maintenance of stormwater detention, retention, or sedimentation ponds, or to maintenance of stormwater energy dissipating structures, that have been constructed in accordance with a valid order of conditions.*

The proposed project site is not located within an ACEC and therefore will not destroy or otherwise impair any portion of a BVW that is within an ACEC. The BVW fill impacts will require a Wildlife Habitat Evaluation to comply with the *Massachusetts Wildlife Habitat Protection Guidance for Inland Wetlands* manual. This evaluation will be submitted to the Commission as supplemental information.

4.2 Wetland Replication Plan

The existing wetland fill areas are located along the exiting tree line. The BVW impact areas (4,405 SF) dips in elevation behind the existing gravel lot and is largely connected to BVW from the south. The key features distinguishing this BVW are the soils and vegetation present. Existing soils within the BVW fill areas are generally muck as far down as 8", with gleyed soils (7.5YR 4/1) further beneath. Ground water was located between 2" and 15" below surface elevation 251 and redoximorphic soil features were found at 6" in wetland fill area 3 and deeper

in other areas. The dominant wetland vegetation consists of red maple, yellow birch, winterberry, sweet pepperbush, witch hazel, highbush blueberry, invasive glossy buckthorn, raspberry, blackberry, and cinnamon fern. The wetland fill area currently provides protection of the following interests in relation to the WPA: ground water supply, flood control, erosion control and sedimentation control, stormwater damage prevention, other water damage prevention, wildlife protection, plant or wildlife habitat, and natural character of wetland values.
The wetland replication area is located in an upland feature that is surrounded by BVW on three of its edges. The size of the replicated area will be about 6,487 SF, which far larger than the existing wetland fill area (4,405 SF to be lost). The location of the replication area was selected for the following reasons:

- The area can easily be accessed from the gravel area.
- Ground water was located 12 inches below ground level in the proposed wetland replication area. Only a 2-foot cut in grading will need to occur throughout the area to reach desirable depths for necessary hydric soil conditions.
- Hydric soils were found as low as 12 inches below the surface which hints that the soils will be suitable for wetland indicator species to thrive.
- The connection to BVW will allow the replication area to blend into a similar landscape provided nearby.
- This location allows the replicated wetland to fulfill the same functions and values as the existing BVW. The wetland replication area will provide protection of the following benefits: ground water supply, flood control, erosion control and sedimentation control, storm damage prevention, other water damage prevention, prevention of pollution, wildlife protection, and plant or wildlife habitat.

The following steps may be completed congruently to ensure transplanted vegetation is immediately planted.

Supervision: All work within the replication area shall be supervised by a qualified wetland scientist with a minimum of five years' experience. Wetland scientist shall submit qualification for approval by the Conservation Commission prior to the commencement of work that requires supervision. The supervisor shall submit monitoring reports to the Conservation Commission as described below. Reports shall contain details of all work performed and photographs of completed conditions.

Timing: Work shall take place ideally when the wetland impact area is not saturated. If necessary, a dewatering plan shall be approved by the Conservation Commission. The construction and installation of the replication area should be accomplished during the spring or fall growing seasons (between April 16 and May 31 or between September 16 and October 30). Planting during these periods is highly recommended. The replication area grading is advised not to commence unless the contractor can guarantee completion of the work within the replication area within the same season.

Step 1: Stake Limits of Work, Confirm Wetland Flags in Place & Install ECB – At Replication Area
Stake out limits of work and confirm wetland flags are in place for the replication area. Erosion control barriers shall then be installed in the form of staked siltation fence and mulch sock (or similar invasive-free barrier) placed at the limit of work for the replication area. These will remain in place and be maintained until the areas are completely stabilized and then may be removed after approval of the Conservation Commission. Wetland scientist shall have authority to require additional erosion control measures if deemed necessary.

Step 2a: Identify Shrubs, Woody Debris, and Boulders to be re-used in Replication Area
The wetland scientist shall identify and flag any native wetland shrubs within the replication area and the wetland fill areas that may be dug up and stockpiled for use as additional plantings in the replication area. A few plant species that will likely be flagged include, but are not limited to: red maple, highbush blueberry, winterberry, sweet pepperbush & cinnamon fern. Any flagged specimens shall be removed and carefully stockpiled in a designated area outside the replication area. Any large woody debris (rotting logs and tree stumps), moss covered boulders/rocks, ferns, and other ground cover shall also be identified and flagged for stockpiling and subsequent addition to the replication area. Wetland trees that lie or stand along the edge of the replication area may be preserved at the discretion of the wetland scientist.

Step 2b: Remove Trees and Vegetation
Once flagged trees, shrubs and woody debris specimens have all been removed and stockpiled, clear and remove all remaining vegetation within the replication area and the wetland fill areas in preparation for excavation and grading.

Step 3: Excavation of Wetland Soils at the wetland fill areas
Prior to any soil excavation, a storage area for soil and leaf litter shall be prepared; soil shall not be stored in buffer zone. Topsoil, leaf litter, and subsoil shall be stockpiled separately. Wetland soils from the wetland fill areas will be excavated and transported to the replication area. The soils immediately surrounding the wetland fill area will also be transplanted to the replication area and will be placed along the inner border of the replication area to create a natural transition from wetland to upland soils.

Step 4: Excavation of Replication Area
An excavator or backhoe shall remove existing soils up to the edge of the proposed replication area boundary, to a depth at which redoximorphic features become visible in the C-horizon at the soil surface and at least one foot below proposed final grade, all of which shall be supervised and directed by the wetland scientist. Final grading will range from 249 feet at the deepest desired depth and will elevate to 251 feet further upgradient. Ground water was discovered 12 inches below elevation 251 so it expected that ground water will be revealed as elevations are graded down to 250. Topsoil and subsoil shall be removed from the area for re-use elsewhere in the project site or removed from the site. Subsoil of the C-horizon shall be loosened prior to Step 5 to ensure soils aren't compacted prior to topsoil placement.

Step 5: Final Grading of Replication Area
Upon removal of existing soils down to the proper depth (as determined by the wetland scientist), the organic soil from the wetland fill areas will be placed within the replication area. If soils from the impact area are not sufficient, supplemental soils shall be imported sourced from composted organic materials and shall consist of a 50:50 mix of loam and organic material with an organic content between 12 and 20%. Topsoil shall be placed within the replication area to a depth 6-12" and even with the surrounding proposed elevation on design plan, to be determined by the supervising wetland scientist. Final grade shall be confirmed to be proper by the wetland scientist prior to plantings. Placement of soil shall be such that no equipment drives over or compacts placed soils. Final grading will result in micro relief of pits and mounds. Topography will create areas that pool and flood during heavy rain events and also see water near the surface during the wet season.

Step 6: Place Woody Debris and Boulders
Woody debris and moss-covered boulders shall be randomly placed throughout the replication area to provide cover for wildlife.

Step 7: Planting
Selected species, especially grasses and sedges, may be transplanted from the wetland fill areas into the replication area provided that the time of year and duration of plants' time out of soil is appropriate for survival of transplants. Precise citing of plants may be determined by the wetland scientist in the field prior to installation. All plantings (referenced in the planting list later in the report) shall be distributed randomly throughout the area; trees spaced at 10-15' on center; shrubs spaced at 6-12' on center and herbaceous species 3' or less on center. Shrubs shall be planted in clumps of 3-4 of same species. As a rule, plants of the same species will be placed in groupings that more closely mimic natural conditions. Trees planted on mounds and shrubs and herbaceous cover in depressions. Stockpiled shrubs will be placed first. All other plantings will be removed from burlap sacks, wire cages and plastic containers prior to planting. Each plant will have it roots loosened prior to planting to encourage root growth away from the planting bulb. Leaf litter shall be spread throughout area if available. Wetland seed mix shall be scattered evenly by hand throughout the replication area. Once all work is complete an erosion control barrier will be installed to enclose the replication area on the access side of the replication area.

Step 8: As-built
Interim as-built plans, complete with one-foot contours, spot elevations, surface area, and cross sections of the replication area shall be prepared by a Registered Professional Land Surveyor of the Commonwealth and submitted to the Commission within 30 days of completion of final grading.

Step 9: Erosion Controls Removal
Once replication area is stable a request shall be submitted to the Conservation Commission to remove the erosion controls around wetland replication area. Upon approval of stabilization, erosion controls shall be removed promptly, and any significant disturbance shall be seeded with a wetland seed mix as specified in the planting list.

Step 10: Replication Monitoring

a. **Seasonal monitoring reports** shall be prepared for the replication area by a qualified wetland scientist for a period of 3 additional years after installation or every year until a COC is issued by the Charlton Conservation Commission. This monitoring program will consist of early summer and early fall inspections and will include photographs and details about the vitality of the replication area. Monitoring reports shall be submitted to the Commission by November 15th of each year. Monitoring reports shall describe, using narratives, plans, and color photographs, the physical characteristics of the replication area with respect to stability, soil characteristics (i.e. horizons, depths, texture, percent gravel and rock, organic matter, Munsell hue, value and chroma, consistence and evidence of hydrologic influence), survival of vegetation and plant mortality, aerial extent and distribution, species diversity and vertical stratification (i.e. herb, shrub and tree layers). Invasive species will be documented if present, monitored and removed.

b. **At least 75% of the surface area** of the replication area shall be re-established with indigenous plant species within three growing seasons. If the replication area does not meet the 75% re-vegetation requirement by the end of the second growing season after installation, the Applicant shall submit a remediation plan to the Commission for approval that will achieve, under the supervision of a Wetland Specialist, replication goals. This plan must include an analysis of why the areas have not successfully re-vegetated and how the Applicant intends to resolve the problem.

Proposed Plantings for Wetland Replication Area (6,489 SF)

Common Name	**Scientific Name**	**Number**	**Size**
Trees (n = 39)			
Red Maple (FAC)	*Acer rubrum*	13	4-5’
Yellow Birch (FAC)	*Betula alleghaniensis*	13	4-5’
Swamp White Oak (FACW)	*Quercus bicolor*	13	4-5’
Shrubs (n = 84)			
Sweet Pepperbush (FAC)	*Clethera alnifolia*	21	3 gal. pot
Highbush Blueberry (FACW)	*Vaccinium corymbosum*	21	3 gal. pot
Winterberry (FACW)	*Ilex verticillata*	21	3 gal. pot
Spicebush (FACW)	*Lindera benzoin*	21	3 gal. pot
Ground Cover (n = 50)			
Cinnamon Fern (FACW)	*Osmundastrum cinnamomea*	50	1 gal. pot
Seed Mix			
New England Wetland Plants WETMIX or equivalent		1	3 lbs

In the exercise of its discretion, the Commission should consider that the project has been designed to minimize impacts to BVW to the greatest extent practicable. The BVW replication area has been expanded from its original scope and will be replicated at a ratio greater than 1:1.

4.3 Bank and LUW Impacts

The project plans for the originally approved project (DEP File #233-1132) show the originally proposed Bank and LUW replication area within a wetland replication area. With the newly proposed design, this Bank and LUW restoration will be removed as the stormwater source for the stream is being shifted to the east to allow the stormwater to discharge into the undisturbed Buffer Zone. To justify this, the wetland replication area has been expanded well above a 1:1 ratio of BVW replication to make up for the loss of Bank and LUW.

Bank

General Performance Standards associated with filling Bank must be followed for the project to be permittable. Per the WPA 310 CMR 10.54(4), the following performance standards must be met:

(a) Where the presumption set forth in 310 CMR 10.54(3) is not overcome, any proposed work on a Bank shall not impair the following:

1. *The physical stability of the Bank;*
2. *The water carrying capacity of the existing channel within the Bank;*
3. *Ground water and surface water quality;*
4. *The capacity of the Bank to provide breeding habitat, escape cover and food for fisheries;*
5. *The capacity of the Bank to provide important wildlife habitat functions. A project or projects on a single lot, for which Notice(s) of Intent is filed on or after November 1, 1987, that (cumulatively) alter(s) up to 10% or 50 feet (whichever is less) of the length of the bank found to be significant to the protection of wildlife habitat, shall not be deemed to impair its capacity to provide important wildlife habitat functions. In the case of a bank of a river or an intermittent stream, the impact shall be measured on each side of the stream or river. Additional alterations beyond the above threshold may be permitted if they will have no adverse effects on wildlife habitat, as determined by procedures contained in 310 CMR 10.60.*
6. *Work on a stream crossing shall be presumed to meet the performance standard set forth in 310 CMR 10.54(4)(a) provided the work is performed in compliance with the Massachusetts Stream Crossing Standards by consisting of a span or embedded culvert in which, at a minimum, the bottom of a span structure or the upper surface of an embedded culvert is above the elevation of the top of the bank, and the structure spans the channel width by a minimum of 1.2 times the bankfull width. This presumption is rebuttable and may be overcome by the submittal of credible evidence from a competent source. Notwithstanding the requirement of 310 CMR 10.54(4)(a)5., the impact on bank caused by the installation of a stream crossing is exempt from the requirement to perform a habitat evaluation in accordance with the procedures contained in 310 CMR 10.60.*

The proposed project will result in the loss of 40 linear feet of Bank and will address the aforementioned regulations in the following way:

1. The physical stability of the filled Bank will be impacted since it will no longer be re-created within the replication area. To justify this, the replication area has been expanded well above a 1:1 ratio of BVW replication to make up for the loss of Bank.
2. The carrying capacity of the channel will be lost because Bank will no longer be replicated. To justify this, the wetland replication has been expanded to compensate for the loss of water carrying capacity that the Bank once provided.
3. Ground water and surface water quality will not be impacted.
4. The capacity to provide breeding habitat, escape cover and food for fisheries will not be impacted as there is no fisheries present within the existing Bank resource area.
5. A wildlife habitat analysis is yet to be performed and will be submitted to the Commission as supplemental information to address this regulation.
6. A stream crossing is not proposed as part of this project.

(b) Notwithstanding the provisions of 310 CMR 10.54(4)(a), structures may be permitted in or on a Bank when required to prevent flood damage to facilities, buildings and roads constructed prior to the effective date of 310 CMR 10.51 through 10.60 or constructed pursuant to a Notice of Intent filed prior to the effective date of 310 CMR 10.51 through 10.60 (April 1, 1983), including the renovation or reconstruction (but not substantial enlargement) of such facilities, buildings and roads, provided that the following requirements are met:

1. *The proposed protective structure, renovation or reconstruction is designed and constructed using best practical measures so as to minimize adverse effects on the characteristics and functions of the resource area;*
2. *The applicant demonstrates that there is no reasonable method of protecting, renovating or rebuilding the facility in question other than the one proposed.*

The proposed project does is not proposing impacts to prevent flood damage.

(c) Notwithstanding the provisions of 310 CMR 10.54(4)(a) or (b), no project may be permitted which will have any adverse effect on specified habitat sites of Rare Species, as identified by procedures established under 310 CMR 10.59.

The proposed project site is not located within an ACEC and therefore will not destroy or otherwise impair any portion of a BVW that is within an ACEC.

LUW
General Performance Standards associated with filling LUW must be followed for the project to be permittable. Per the WPA 310 CMR 10.56(4), the following performance standards must be met:
(a) Where the presumption set forth in 310 CMR 10.56(3) is not overcome, any proposed work within Land under Water Bodies and Waterways shall not impair the following:

1. *The water carrying capacity within the defined channel, which is provided by said land in conjunction with the banks;*

2. *Ground and surface water quality;*
3. *The capacity of said land to provide breeding habitat, escape cover and food for fisheries; and*
4. *The capacity of said land to provide important wildlife habitat functions. A project or projects on a single lot, for which Notice(s) of intent is filed on or after November 1, 1987, that (cumulatively) alter(s) up to 10% or 5,000 square feet (whichever is less) of land in this resource area found to be significant to the protection of wildlife habitat, shall not be deemed to impair its capacity to provide important wildlife habitat functions. Additional alterations beyond the above threshold may be permitted if they will have no adverse effects on wildlife habitat, as determined by procedures established under 310 CMR 10.60.*
5. *Work on a stream crossing shall be presumed to meet the performance standard set forth in 310 CMR 10.56(4)(a) provided the work is performed in compliance with the Massachusetts Stream Crossing Standards by consisting of a span or embedded culvert in which, at a minimum, the bottom of a span structure or the upper surface of an embedded culvert is above the elevation of the top of the bank, and the structure spans the channel width by a minimum of 1.2 times the bankfull width. This presumption is rebuttable and may be overcome by the submittal of credible evidence from a competent source. Notwithstanding the requirements of 310 CMR 10.56(4)(a)4., the impact on Land under Water Bodies and Waterways caused by the installation of a stream crossing is exempt from the requirement to perform a habitat evaluation in accordance with the procedures established under 310 CMR 10.60.*

The proposed project will result in the loss of 267 SF of LUW and will address the aforementioned regulations in the following way:

1. The carrying capacity of the channel will be lost because LUW will no longer be replicated. To justify this, the wetland replication has been expanded to compensate for the loss of water carrying capacity that the LUW once provided.
2. Ground water and surface water quality will not be impacted.
3. The capacity to provide breeding habitat, escape cover and food for fisheries will not be impacted as there is no fisheries present within the existing LUW resource area.
4. A wildlife habitat analysis is yet to be performed and will be submitted to the Commission as supplemental information to address this regulation.
5. A stream crossing is not proposed as part of this project.

(b) Notwithstanding the provisions of 310 CMR 10.56(4)(a), the issuing authority may issue an Order in accordance with M.G.L. c. 131, § 40 to maintain or improve boat channels within Land under Water Bodies and Waterways when said work is designed and carried out using the best practical measures so as to minimize adverse effects such as the suspension or transport of pollutants, increases in turbidity, the smothering of bottom organisms, the accumulation of pollutants by organisms or the destruction of fisheries habitat or nutrient source areas.

The proposed project does not involve work related to this regulation.

(c) Notwithstanding the provisions of 310 CMR 10.56(4)(a) or (b), no project may be permitted which will have any adverse effect on specified habitat sites of rare vertebrate or invertebrate species, as identified by procedures established under 310 CMR 10.59.

The proposed project site is not located within an ACEC and therefore will not destroy or otherwise impair any portion of a BVW that is within an ACEC.

5.0 Conclusion

The project has been designed to comply with the regulations of 310 CMR 10.00 et al and has provided a larger replication area than required to justify the loss of Bank and LUW resource areas. The applicant requests that the Commission permit the proposed work with an Order of Conditions.

If there are any questions concerning this submission, please do not hesitate to contact us.

Very truly yours,
GODDARD CONSULTING, LLC

Scott Goddard, Principal & PWS

A. General Information (continued)

6. General Project Description:

Construction of a parking lot with stormwater discharge within 100-foot buffer zone to Bordering Vegetated Wetlands. Work involves filling Bordering Vegetated Wetlands (BVW).

7a. Project Type Checklist: (Limited Project Types see Section A. 7b.)

1. ☐ Single Family Home
2. ☐ Residential Subdivision
3. ☒ Commercial/Industrial
4. ☐ Dock/Pier
5. ☐ Utilities
6. ☐ Coastal engineering Structure
7. ☐ Agriculture (e.g., cranberries, forestry)
8. ☐ Transportation
9. ☐ Other

7b. Is any portion of the proposed activity eligible to be treated as a limited project (including Ecological Restoration Limited Project) subject to 310 CMR 10.24 (coastal) or 310 CMR 10.53 (inland)?

1. ☐ Yes ☒ No

If yes, describe which limited project applies to this project. (See 310 CMR 10.24 and 10.53 for a complete list and description of limited project types)

2. Limited Project Type

If the proposed activity is eligible to be treated as an Ecological Restoration Limited Project (310 CMR10.24(8), 310 CMR 10.53(4)), complete and attach Appendix A: Ecological Restoration Limited Project Checklist and Signed Certification.

8. Property recorded at the Registry of Deeds for:

a. County	b. Certificate # (if registered land)
Worcester	
c. Book	d. Page Number
51954	371

B. Buffer Zone & Resource Area Impacts (temporary & permanent)

1. ☐ Buffer Zone Only – Check if the project is located only in the Buffer Zone of a Bordering Vegetated Wetland, Inland Bank, or Coastal Resource Area.
2. ☒ Inland Resource Areas (see 310 CMR 10.54-10.58; if not applicable, go to Section B.3, Coastal Resource Areas).

Check all that apply below. Attach narrative and any supporting documentation describing how the project will meet all performance standards for each of the resource areas altered, including standards requiring consideration of alternative project design or location.

B. Buffer Zone & Resource Area Impacts (temporary & permanent) (cont'd)

For all projects affecting other Resource Areas, please attach a narrative explaining how the resource area was delineated.

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
a. ☒ Bank	40 (1. linear feet)	0 (2. linear feet)
b. ☒ Bordering Vegetated Wetland	3,545 plus 860 prior (1. square feet)	6,489 (2. square feet)
c. ☒ Land Under Waterbodies and Waterways	267 (1. square feet) 0 (3. cubic yards dredged)	0 (2. square feet)

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
d. ☐ Bordering Land Subject to Flooding	1. square feet	2. square feet
	3. cubic feet of flood storage lost	4. cubic feet replaced
e. ☐ Isolated Land Subject to Flooding	1. square feet	
	2. cubic feet of flood storage lost	3. cubic feet replaced

f. ☐ Riverfront Area

1. Name of Waterway (if available) - **specify coastal or inland**

2. Width of Riverfront Area (check one):

☐ 25 ft. - Designated Densely Developed Areas only

☐ 100 ft. - New agricultural projects only

☐ 200 ft. - All other projects

3. Total area of Riverfront Area on the site of the proposed project: _____ square feet

4. Proposed alteration of the Riverfront Area:

a. total square feet _____ b. square feet within 100 ft. _____ c. square feet between 100 ft. and 200 ft. _____

5. Has an alternatives analysis been done and is it attached to this NOI? ☐ Yes ☐ No

6. Was the lot where the activity is proposed created prior to August 1, 1996? ☐ Yes ☐ No

3. ☐ Coastal Resource Areas: (See 310 CMR 10.25-10.35)

Note: for coastal riverfront areas, please complete **Section B.2.f**. above.

B. Buffer Zone & Resource Area Impacts **(temporary & permanent)** (cont'd)

Check all that apply below. Attach narrative and supporting documentation describing how the project will meet all performance standards for each of the resource areas altered, including standards requiring consideration of alternative project design or location.

Online Users: Include your document transaction number (provided on your receipt page) with all supplementary information you submit to the Department.

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
a. ☐ Designated Port Areas	Indicate size under Land Under the Ocean, below	
b. ☐ Land Under the Ocean	1. square feet 2. cubic yards dredged	
c. ☐ Barrier Beach	Indicate size under Coastal Beaches and/or Coastal Dunes below	
d. ☐ Coastal Beaches	1. square feet	2. cubic yards beach nourishment
e. ☐ Coastal Dunes	1. square feet	2. cubic yards dune nourishment

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
f. ☐ Coastal Banks	1. linear feet	
g. ☐ Rocky Intertidal Shores	1. square feet	
h. ☐ Salt Marshes	1. square feet	2. sq ft restoration, rehab., creation
i. ☐ Land Under Salt Ponds	1. square feet 2. cubic yards dredged	
j. ☐ Land Containing Shellfish	1. square feet	
k. ☐ Fish Runs	Indicate size under Coastal Banks, inland Bank, Land Under the Ocean, and/or inland Land Under Waterbodies and Waterways, above 1. cubic yards dredged	
l. ☐ Land Subject to Coastal Storm Flowage	1. square feet	

4. ☐ Restoration/Enhancement

If the project is for the purpose of restoring or enhancing a wetland resource area in addition to the square footage that has been entered in Section B.2.b or B.3.h above, please enter the additional amount here.

a. square feet of BVW

b. square feet of Salt Marsh

5. ☐ Project Involves Stream Crossings

a. number of new stream crossings

b. number of replacement stream crossings

C. Other Applicable Standards and Requirements

☐ This is a proposal for an Ecological Restoration Limited Project. Skip Section C and complete Appendix A: Ecological Restoration Limited Project Checklists – Required Actions (310 CMR 10.11).

Streamlined Massachusetts Endangered Species Act/Wetlands Protection Act Review

1. Is any portion of the proposed project located in **Estimated Habitat of Rare Wildlife** as indicated on the most recent Estimated Habitat Map of State-Listed Rare Wetland Wildlife published by the Natural Heritage and Endangered Species Program (NHESP)? To view habitat maps, see the *Massachusetts Natural Heritage Atlas* or go to http://maps.massgis.state.ma.us/PRI_EST_HAB/viewer.htm.

   a. ☐ Yes ☒ No

   If yes, include proof of mailing or hand delivery of NOI to:

   Natural Heritage and Endangered Species Program
   Division of Fisheries and Wildlife
   1 Rabbit Hill Road
   Westborough, MA 01581

   2017
   b. Date of map

   If *yes*, the project is also subject to Massachusetts Endangered Species Act (MESA) review (321 CMR 10.18). To qualify for a streamlined, 30-day, MESA/Wetlands Protection Act review, please complete Section C.1.c, and include requested materials with this Notice of Intent (NOI); *OR* complete Section C.2.f, if applicable. *If MESA supplemental information is not included with the NOI, by completing Section 1 of this form, the NHESP will require a separate MESA filing which may take up to 90 days to review (unless noted exceptions in Section 2 apply, see below).*

   c. Submit Supplemental Information for Endangered Species Review*

      1. ☐ Percentage/acreage of property to be altered:

         (a) within wetland Resource Area _____ percentage/acreage

         (b) outside Resource Area _____ percentage/acreage

      2. ☐ Assessor's Map or right-of-way plan of site

2. ☐ Project plans for entire project site, including wetland resource areas and areas outside of wetlands jurisdiction, showing existing and proposed conditions, existing and proposed tree/vegetation clearing line, and clearly demarcated limits of work **

   (a) ☐ Project description (including description of impacts outside of wetland resource area & buffer zone)

   (b) ☐ Photographs representative of the site

* Some projects **not** in Estimated Habitat may be located in Priority Habitat, and require NHESP review (see http://www.mass.gov/eea/agencies/dfg/dfw/natural-heritage/regulatory-review/). Priority Habitat includes habitat for state-listed plants and strictly upland species not protected by the Wetlands Protection Act.

** MESA projects may not be segmented (321 CMR 10.16). The applicant must disclose full development plans even if such plans are not required as part of the Notice of Intent process.

C. Other Applicable Standards and Requirements (cont'd)

(c) ☐ MESA filing fee (fee information available at http://www.mass.gov/dfwele/dfw/nhesp/regulatory_review/mesa/mesa_fee_schedule.htm). Make check payable to "Commonwealth of Massachusetts - NHESP" and ***mail to NHESP*** at above address

*Projects altering **10 or more acres** of land, also submit:*

(d) ☐ Vegetation cover type map of site

(e) ☐ Project plans showing Priority & Estimated Habitat boundaries

(f) OR Check One of the Following

1. ☐ Project is exempt from MESA review.
Attach applicant letter indicating which MESA exemption applies. (See 321 CMR 10.14, http://www.mass.gov/dfwele/dfw/nhesp/regulatory_review/mesa/mesa_exemptions.htm; the NOI must still be sent to NHESP if the project is within estimated habitat pursuant to 310 CMR 10.37 and 10.59.)

2. ☐ Separate MESA review ongoing. a. NHESP Tracking # b. Date submitted to NHESP

3. ☐ Separate MESA review completed.
Include copy of NHESP "no Take" determination or valid Conservation & Management Permit with approved plan.

3. For coastal projects only, is any portion of the proposed project located below the mean high water line or in a fish run?

a. ☒ Not applicable – project is in inland resource area only b. ☐ Yes ☐ No

If yes, include proof of mailing, hand delivery, or electronic delivery of NOI to either:

South Shore - Cohasset to Rhode Island border, and the Cape & Islands:

Division of Marine Fisheries -
Southeast Marine Fisheries Station
Attn: Environmental Reviewer
1213 Purchase Street – 3rd Floor
New Bedford, MA 02740-6694
Email: DMF.EnvReview-South@state.ma.us

North Shore - Hull to New Hampshire border:

Division of Marine Fisheries -
North Shore Office
Attn: Environmental Reviewer
30 Emerson Avenue
Gloucester, MA 01930
Email: DMF.EnvReview-North@state.ma.us

Also if yes, the project may require a Chapter 91 license. For coastal towns in the Northeast Region, please contact MassDEP's Boston Office. For coastal towns in the Southeast Region, please contact MassDEP's Southeast Regional Office.

C. Other Applicable Standards and Requirements (cont'd)

Online Users: Include your document transaction number (provided on your receipt page) with all supplementary information you submit to the Department.

4. Is any portion of the proposed project within an Area of Critical Environmental Concern (ACEC)?

   a. ☐ Yes ☒ No If yes, provide name of ACEC (see instructions to WPA Form 3 or MassDEP Website for ACEC locations). **Note:** electronic filers click on Website.

   b. ACEC

5. Is any portion of the proposed project within an area designated as an Outstanding Resource Water (ORW) as designated in the Massachusetts Surface Water Quality Standards, 314 CMR 4.00?

   a. ☐ Yes ☒ No

6. Is any portion of the site subject to a Wetlands Restriction Order under the Inland Wetlands Restriction Act (M.G.L. c. 131, § 40A) or the Coastal Wetlands Restriction Act (M.G.L. c. 130, § 105)?

   a. ☐ Yes ☒ No

7. Is this project subject to provisions of the MassDEP Stormwater Management Standards?

   a. ☒ Yes. Attach a copy of the Stormwater Report as required by the Stormwater Management Standards per 310 CMR 10.05(6)(k)-(q) and check if:

      1. ☐ Applying for Low Impact Development (LID) site design credits (as described in Stormwater Management Handbook Vol. 2, Chapter 3)

      2. ☐ A portion of the site constitutes redevelopment

      3. ☒ Proprietary BMPs are included in the Stormwater Management System.

   b. ☐ No. Check why the project is exempt:

      1. ☐ Single-family house

      2. ☐ Emergency road repair

      3. ☐ Small Residential Subdivision (less than or equal to 4 single-family houses or less than or equal to 4 units in multi-family housing project) with no discharge to Critical Areas.

D. Additional Information

☐ This is a proposal for an Ecological Restoration Limited Project. Skip Section D and complete Appendix A: Ecological Restoration Notice of Intent – Minimum Required Documents (310 CMR 10.12).

Applicants must include the following with this Notice of Intent (NOI). See instructions for details.

Online Users: Attach the document transaction number (provided on your receipt page) for any of the following information you submit to the Department.

1. ☒ USGS or other map of the area (along with a narrative description, if necessary) containing sufficient information for the Conservation Commission and the Department to locate the site. (Electronic filers may omit this item.)

2. ☒ Plans identifying the location of proposed activities (including activities proposed to serve as a Bordering Vegetated Wetland [BVW] replication area or other mitigating measure) relative to the boundaries of each affected resource area.

D. Additional Information (cont'd)

3. ☒ Identify the method for BVW and other resource area boundary delineations (MassDEP BVW Field Data Form(s), Determination of Applicability, Order of Resource Area Delineation, etc.), and attach documentation of the methodology.

4. ☒ List the titles and dates for all plans and other materials submitted with this NOI.

"495 Transportation Depot I" Transportation Terminal Site Plan, 21 Beaver Street, Milford, Massachusetts

Guerriere & Halnon, Inc.	Elizabeth A. Mainini-Sanchioni
b. Prepared By	c. Signed and Stamped by
9/8/2020	40'=1"
d. Final Revision Date	e. Scale

f. Additional Plan or Document Title — g. Date

5. ☐ If there is more than one property owner, please attach a list of these property owners not listed on this form.

6. ☐ Attach proof of mailing for Natural Heritage and Endangered Species Program, if needed.

7. ☐ Attach proof of mailing for Massachusetts Division of Marine Fisheries, if needed.

8. ☒ Attach NOI Wetland Fee Transmittal Form

9. ☒ Attach Stormwater Report, if needed.

E. Fees

1. ☐ Fee Exempt: No filing fee shall be assessed for projects of any city, town, county, or district of the Commonwealth, federally recognized Indian tribe housing authority, municipal housing authority, or the Massachusetts Bay Transportation Authority.

Applicants must submit the following information (in addition to pages 1 and 2 of the NOI Wetland Fee Transmittal Form) to confirm fee payment:

5406, 5407	9/18/2020, 9/18/2020
2. Municipal Check Number	3. Check date
5405	9/18/2020
4. State Check Number	5. Check date
Rte 85 Realty Corporation	
6. Payor name on check: First Name	7. Payor name on check: Last Name

F. Signatures and Submittal Requirements

I hereby certify under the penalties of perjury that the foregoing Notice of Intent and accompanying plans, documents, and supporting data are true and complete to the best of my knowledge. I understand that the Conservation Commission will place notification of this Notice in a local newspaper at the expense of the applicant in accordance with the wetlands regulations, 310 CMR 10.05(5)(a).

I further certify under penalties of perjury that all abutters were notified of this application, pursuant to the requirements of M.G.L. c. 131, § 40. Notice must be made by Certificate of Mailing or in writing by hand delivery or certified mail (return receipt requested) to all abutters within 100 feet of the property line of the project location.

1. Signature of Applicant (John Nenart, Route 85 Realty Corp.) — 2. Date: 9-18-20

3. Signature of Property Owner (same as Applicant) — 4. Date

5. Signature of Representative (Scott Goddard, Goddard Consulting, LLC) — 6. Date: 9/21/20

For Conservation Commission:
Two copies of the completed Notice of Intent (Form 3), including supporting plans and documents, two copies of the NOI Wetland Fee Transmittal Form, and the city/town fee payment, to the Conservation Commission by certified mail or hand delivery.

For MassDEP:
One copy of the completed Notice of Intent (Form 3), including supporting plans and documents, one copy of the NOI Wetland Fee Transmittal Form, and a **copy** of the state fee payment to the MassDEP Regional Office (see Instructions) by certified mail or hand delivery.

Other:
If the applicant has checked the "yes" box in any part of Section C, Item 3, above, refer to that section and the Instructions for additional submittal requirements.

The original and copies must be sent simultaneously. Failure by the applicant to send copies in a timely manner may result in dismissal of the Notice of Intent.

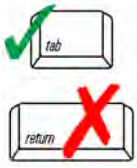
Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands

NOI Wetland Fee Transmittal Form

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

A. Applicant Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.



1. Location of Project:

21 Beaver St	Milford
a. Street Address	b. City/Town
5405	$487.50
c. Check number	d. Fee amount

2. Applicant Mailing Address:

John		Nenart	
a. First Name		b. Last Name	
Rte 85 Reality Corp			
c. Organization			
P.O. Box 444			
d. Mailing Address			
Mendon		MA	01756
e. City/Town		f. State	g. Zip Code
508-422-1050		johnn@imperialcars.com	
h. Phone Number	i. Fax Number	j. Email Address	

3. Property Owner (if different):

a. First Name		b. Last Name	
c. Organization			
d. Mailing Address			
e. City/Town		f. State	g. Zip Code
h. Phone Number	i. Fax Number	j. Email Address	

B. Fees

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Fee should be calculated using the following process & worksheet. ***Please see Instructions before filling out worksheet.***

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

Step 6/Fee Payments: To calculate the state share of the fee, divide the total fee in half and subtract $12.50. To calculate the city/town share of the fee, divide the total fee in half and add $12.50.

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands

NOI Wetland Fee Transmittal Form

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

B. Fees (continued)

Step 1/Type of Activity	Step 2/Number of Activities	Step 3/Individual Activity Fee	Step 4/Subtotal Activity Fee
2 (b)	1	$500.00	$500.00
2 (g)	1	$500.00	$500.00
Town Advertisement Fee	1	$100.00	$100.00

Step 5/Total Project Fee: $1,100.00

Step 6/Fee Payments:

Total Project Fee:	$1,100.00 (a. Total Fee from Step 5)
State share of filing Fee:	$487.50 (b. 1/2 Total Fee **less $**12.50)
City/Town share of filling Fee:	$512.50 + $100 ad fee (c. 1/2 Total Fee **plus** $12.50)

C. Submittal Requirements

a.) Complete pages 1 and 2 and send with a check or money order for the state share of the fee, payable to the Commonwealth of Massachusetts.

Department of Environmental Protection
Box 4062
Boston, MA 02211

b.) **To the Conservation Commission:** Send the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and the city/town fee payment.

To MassDEP Regional Office (see Instructions): Send a copy of the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and a **copy** of the state fee payment. (E-filers of Notices of Intent may submit these electronically.)

AFFIDAVIT OF SERVICE

Under the Massachusetts Wetlands Protection Act

I, Mitch Maslanka hereby certify under the pains and penalties of perjury that on 10/8/2020 I gave notification to abutters in Compliance with the second paragraph of Massachusetts General Law Chapter 131, Section 40, and the DEP Guide to Abutter Notification dating April 8, 1994 in connection with the following matter:

A Notice Of Intent was filed under the Massachusetts Wetlands Protection Act by John Nenart of Rte. 85 Reality Corporation with the Milford Conservation Commission on 10/7/2020 for property located at 21 Beaver Street (Map 44, lot 25A) in Milford, MA for the construction of a parking lot within the 100-foot buffer zone to Bordering Vegetated Wetlands (BVW) and for filling BVW.

The form of the notification, and the list of abutters to whom it was given, and their addresses, are attached to this Affidavit of Service.

Mitch Maslanka
(Name)

10-6-2020
(Date)

Notification to Abutters Under the Massachusetts Wetlands Protection Act

In accordance with the Massachusetts General Laws Chapter 131, Section 40 (the Wetlands Protection Act) you are hereby notified of the following:

1. The applicant's name is John Nenart
2. The applicant has filed the following application with the Milford Conservation Commission
   - ☒ A Notice of Intent, seeking permission to alter an area that maybe or may not be subject to protection under the Wetlands Protection Act and/or the Bylaw.
   - ☐ A request to amend an existing Order of Conditions.
   - ☐ A Notice of Resource Area Delineation, seeking to determine the extent of areas subject to protection under the Wetlands Protection Act and/or Bylaw.
3. The address or location of the site where the activity is proposed is: 21 Beaver Street, (map 44, lot 25A)
4. The proposed activity is construction of a parking lot in the buffer zone, storm drainage, and filling of wetlands and flood zone.
5. Copies of the above application may be examined at the Milford Conservation Commission's office, located in the Town Hall, 52 Main St, Milford, MA Copies may be obtained at the office for a fee or from the applicant.
6. Information regarding the date, time, and place of the public hearing may be obtained:
   a. by calling the Milford Conservation Commission
   b. from the applicant's representative; Goddard Consulting LLC at 1-508-393-3784.

PLEASE NOTE:

1. Notice of the public hearing including its date, time, and place will be published at least five business days in advance in the local newspaper and will be posted in the Town Hall not less than 48 hours in advance.
2. For more information about this application, the Wetlands Protection Act, or Notice of Intent Process, please contact the Conservation Commission or the Massachusetts Department of Environmental Protection (DEP) Central Office, 8 New Bond Street, Worcester, MA 01606

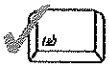
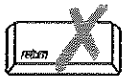
Checklist for Stormwater Report

A. Introduction

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.





A Stormwater Report must be submitted with the Notice of Intent permit application to document compliance with the Stormwater Management Standards. The following checklist is NOT a substitute for the Stormwater Report (which should provide more substantive and detailed information) but is offered here as a tool to help the applicant organize their Stormwater Management documentation for their Report and for the reviewer to assess this information in a consistent format. As noted in the Checklist, the Stormwater Report must contain the engineering computations and supporting information set forth in Volume 3 of the Massachusetts Stormwater Handbook. The Stormwater Report must be prepared and certified by a Registered Professional Engineer (RPE) licensed in the Commonwealth.

The Stormwater Report must include:

- The Stormwater Checklist completed and stamped by a Registered Professional Engineer (see page 2) that certifies that the Stormwater Report contains all required submittals.[1] This Checklist is to be used as the cover for the completed Stormwater Report.
- Applicant/Project Name
- Project Address
- Name of Firm and Registered Professional Engineer that prepared the Report
- Long-Term Pollution Prevention Plan required by Standards 4-6
- Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan required by Standard 8[2]
- Operation and Maintenance Plan required by Standard 9

In addition to all plans and supporting information, the Stormwater Report must include a brief narrative describing stormwater management practices, including environmentally sensitive site design and LID techniques, along with a diagram depicting runoff through the proposed BMP treatment train. Plans are required to show existing and proposed conditions, identify all wetland resource areas, NRCS soil types, critical areas, Land Uses with Higher Potential Pollutant Loads (LUHPPL), and any areas on the site where infiltration rate is greater than 2.4 inches per hour. The Plans shall identify the drainage areas for both existing and proposed conditions at a scale that enables verification of supporting calculations.

As noted in the Checklist, the Stormwater Management Report shall document compliance with each of the Stormwater Management Standards as provided in the Massachusetts Stormwater Handbook. The soils evaluation and calculations shall be done using the methodologies set forth in Volume 3 of the Massachusetts Stormwater Handbook.

To ensure that the Stormwater Report is complete, applicants are required to fill in the Stormwater Report Checklist by checking the box to indicate that the specified information has been included in the Stormwater Report. If any of the information specified in the checklist has not been submitted, the applicant must provide an explanation. The completed Stormwater Report Checklist and Certification must be submitted with the Stormwater Report.

[1] The Stormwater Report may also include the Illicit Discharge Compliance Statement required by Standard 10. If not included in the Stormwater Report, the Illicit Discharge Compliance Statement must be submitted prior to the discharge of stormwater runoff to the post-construction best management practices.

[2] For some complex projects, it may not be possible to include the Construction Period Erosion and Sedimentation Control Plan in the Stormwater Report. In that event, the issuing authority has the discretion to issue an Order of Conditions that approves the project and includes a condition requiring the proponent to submit the Construction Period Erosion and Sedimentation Control Plan before commencing any land disturbance activity on the site.

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands Program

Checklist for Stormwater Report

B. Stormwater Checklist and Certification

The following checklist is intended to serve as a guide for applicants as to the elements that ordinarily need to be addressed in a complete Stormwater Report. The checklist is also intended to provide conservation commissions and other reviewing authorities with a summary of the components necessary for a comprehensive Stormwater Report that addresses the ten Stormwater Standards.

Note: Because stormwater requirements vary from project to project, it is possible that a complete Stormwater Report may not include information on some of the subjects specified in the Checklist. If it is determined that a specific item does not apply to the project under review, please note that the item is not applicable (N.A.) and provide the reasons for that determination.

A complete checklist must include the Certification set forth below signed by the Registered Professional Engineer who prepared the Stormwater Report.

Registered Professional Engineer's Certification

I have reviewed the Stormwater Report, including the soil evaluation, computations, Long-term Pollution Prevention Plan, the Construction Period Erosion and Sedimentation Control Plan (if included), the Long-term Post-Construction Operation and Maintenance Plan, the Illicit Discharge Compliance Statement (if included) and the plans showing the stormwater management system, and have determined that they have been prepared in accordance with the requirements of the Stormwater Management Standards as further elaborated by the Massachusetts Stormwater Handbook. I have also determined that the information presented in the Stormwater Checklist is accurate and that the information presented in the Stormwater Report accurately reflects conditions at the site as of the date of this permit application.

Signature and Date

Checklist

Project Type: Is the application for new development, redevelopment, or a mix of new and redevelopment?

☒ New development

☐ Redevelopment

☐ Mix of New Development and Redevelopment

Checklist for Stormwater Report

Checklist (continued)

LID Measures: Stormwater Standards require LID measures to be considered. Document what environmentally sensitive design and LID Techniques were considered during the planning and design of the project:

- ☐ No disturbance to any Wetland Resource Areas
- ☐ Site Design Practices (e.g. clustered development, reduced frontage setbacks)
- ☐ Reduced Impervious Area (Redevelopment Only)
- ☐ Minimizing disturbance to existing trees and shrubs
- ☐ LID Site Design Credit Requested:
  - ☐ Credit 1
  - ☐ Credit 2
  - ☐ Credit 3
- ☐ Use of "country drainage" versus curb and gutter conveyance and pipe
- ☐ Bioretention Cells (includes Rain Gardens)
- ☐ Constructed Stormwater Wetlands (includes Gravel Wetlands designs)
- ☐ Treebox Filter
- ☐ Water Quality Swale
- ☐ Grass Channel
- ☐ Green Roof
- ☐ Other (describe): _____

Standard 1: No New Untreated Discharges

- ☒ No new untreated discharges
- ☒ Outlets have been designed so there is no erosion or scour to wetlands and waters of the Commonwealth
- ☐ Supporting calculations specified in Volume 3 of the Massachusetts Stormwater Handbook included.

Checklist for Stormwater Report

Checklist (continued)

Standard 2: Peak Rate Attenuation

☐ Standard 2 waiver requested because the project is located in land subject to coastal storm flowage and stormwater discharge is to a wetland subject to coastal flooding.

☐ Evaluation provided to determine whether off-site flooding increases during the 100-year 24-hour storm.

☒ Calculations provided to show that post-development peak discharge rates do not exceed pre-development rates for the 2-year and 10-year 24-hour storms. If evaluation shows that off-site flooding increases during the 100-year 24-hour storm, calculations are also provided to show that post-development peak discharge rates do not exceed pre-development rates for the 100-year 24-hour storm.

Standard 3: Recharge

☒ Soil Analysis provided.

☒ Required Recharge Volume calculation provided.

☐ Required Recharge volume reduced through use of the LID site Design Credits.

☒ Sizing the infiltration, BMPs is based on the following method: Check the method used.

☒ Static ☐ Simple Dynamic ☐ Dynamic Field[1]

☒ Runoff from all impervious areas at the site discharging to the infiltration BMP.

☐ Runoff from all impervious areas at the site is *not* discharging to the infiltration BMP and calculations are provided showing that the drainage area contributing runoff to the infiltration BMPs is sufficient to generate the required recharge volume.

☒ Recharge BMPs have been sized to infiltrate the Required Recharge Volume.

☐ Recharge BMPs have been sized to infiltrate the Required Recharge Volume *only* to the maximum extent practicable for the following reason:

- ☐ Site is comprised solely of C and D soils and/or bedrock at the land surface
- ☐ M.G.L. c. 21E sites pursuant to 310 CMR 40.0000
- ☐ Solid Waste Landfill pursuant to 310 CMR 19.000
- ☐ Project is otherwise subject to Stormwater Management Standards only to the maximum extent practicable.

☒ Calculations showing that the infiltration BMPs will drain in 72 hours are provided.

☐ Property includes a M.G.L. c. 21E site or a solid waste landfill and a mounding analysis is included.

[1] 80% TSS removal is required prior to discharge to infiltration BMP if Dynamic Field method is used.

Checklist for Stormwater Report

Checklist (continued)

Standard 3: Recharge (continued)

☐ The infiltration BMP is used to attenuate peak flows during storms greater than or equal to the 10-year 24-hour storm and separation to seasonal high groundwater is less than 4 feet and a mounding analysis is provided.

☐ Documentation is provided showing that infiltration BMPs do not adversely impact nearby wetland resource areas.

Standard 4: Water Quality

The Long-Term Pollution Prevention Plan typically includes the following:

- Good housekeeping practices;
- Provisions for storing materials and waste products inside or under cover;
- Vehicle washing controls;
- Requirements for routine inspections and maintenance of stormwater BMPs;
- Spill prevention and response plans;
- Provisions for maintenance of lawns, gardens, and other landscaped areas;
- Requirements for storage and use of fertilizers, herbicides, and pesticides;
- Pet waste management provisions;
- Provisions for operation and management of septic systems;
- Provisions for solid waste management;
- Snow disposal and plowing plans relative to Wetland Resource Areas;
- Winter Road Salt and/or Sand Use and Storage restrictions;
- Street sweeping schedules;
- Provisions for prevention of illicit discharges to the stormwater management system;
- Documentation that Stormwater BMPs are designed to provide for shutdown and containment in the event of a spill or discharges to or near critical areas or from LUHPPL;
- Training for staff or personnel involved with implementing Long-Term Pollution Prevention Plan;
- List of Emergency contacts for implementing Long-Term Pollution Prevention Plan.

☒ A Long-Term Pollution Prevention Plan is attached to Stormwater Report and is included as an attachment to the Wetlands Notice of Intent.

☒ Treatment BMPs subject to the 44% TSS removal pretreatment requirement and the one inch rule for calculating the water quality volume are included, and discharge:

- ☐ is within the Zone II or Interim Wellhead Protection Area
- ☐ is near or to other critical areas
- ☐ is within soils with a rapid infiltration rate (greater than 2.4 inches per hour)
- ☐ involves runoff from land uses with higher potential pollutant loads.

☐ The Required Water Quality Volume is reduced through use of the LID site Design Credits.

☒ Calculations documenting that the treatment train meets the 80% TSS removal requirement and, if applicable, the 44% TSS removal pretreatment requirement, are provided.

Checklist for Stormwater Report

Checklist (continued)

Standard 4: Water Quality (continued)

☒ The BMP is sized (and calculations provided) based on:

- ☒ The ½" or 1" Water Quality Volume or
- ☐ The equivalent flow rate associated with the Water Quality Volume and documentation is provided showing that the BMP treats the required water quality volume.

☐ The applicant proposes to use proprietary BMPs, and documentation supporting use of proprietary BMP and proposed TSS removal rate is provided. This documentation may be in the form of the propriety BMP checklist found in Volume 2, Chapter 4 of the Massachusetts Stormwater Handbook and submitting copies of the TARP Report, STEP Report, and/or other third party studies verifying performance of the proprietary BMPs.

☐ A TMDL exists that indicates a need to reduce pollutants other than TSS and documentation showing that the BMPs selected are consistent with the TMDL is provided.

Standard 5: Land Uses With Higher Potential Pollutant Loads (LUHPPLs)

☐ The NPDES Multi-Sector General Permit covers the land use and the Stormwater Pollution Prevention Plan (SWPPP) has been included with the Stormwater Report.

☒ The NPDES Multi-Sector General Permit covers the land use and the SWPPP will be submitted ***prior to*** the discharge of stormwater to the post-construction stormwater BMPs.

☐ The NPDES Multi-Sector General Permit does ***not*** cover the land use.

☐ LUHPPLs are located at the site and industry specific source control and pollution prevention measures have been proposed to reduce or eliminate the exposure of LUHPPLs to rain, snow, snow melt and runoff, and been included in the long term Pollution Prevention Plan.

☐ All exposure has been eliminated.

☐ All exposure has ***not*** been eliminated and all BMPs selected are on MassDEP LUHPPL list.

☐ The LUHPPL has the potential to generate runoff with moderate to higher concentrations of oil and grease (e.g. all parking lots with >1000 vehicle trips per day) and the treatment train includes an oil grit separator, a filtering bioretention area, a sand filter or equivalent.

Standard 6: Critical Areas

☐ The discharge is near or to a critical area and the treatment train includes only BMPs that MassDEP has approved for stormwater discharges to or near that particular class of critical area.

☐ Critical areas and BMPs are identified in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 7: Redevelopments and Other Projects Subject to the Standards only to the maximum extent practicable

☐ The project is subject to the Stormwater Management Standards only to the maximum Extent Practicable as a:

- ☐ Limited Project
- ☐ Small Residential Projects: 5-9 single family houses or 5-9 units in a multi-family development provided there is no discharge that may potentially affect a critical area.
- ☐ Small Residential Projects: 2-4 single family houses or 2-4 units in a multi-family development with a discharge to a critical area
- ☐ Marina and/or boatyard provided the hull painting, service and maintenance areas are protected from exposure to rain, snow, snow melt and runoff
- ☐ Bike Path and/or Foot Path
- ☐ Redevelopment Project
- ☐ Redevelopment portion of mix of new and redevelopment.

☐ Certain standards are not fully met (Standard No. 1, 8, 9, and 10 must always be fully met) and an explanation of why these standards are not met is contained in the Stormwater Report.

☐ The project involves redevelopment and a description of all measures that have been taken to improve existing conditions is provided in the Stormwater Report. The redevelopment checklist found in Volume 2 Chapter 3 of the Massachusetts Stormwater Handbook may be used to document that the proposed stormwater management system (a) complies with Standards 2, 3 and the pretreatment and structural BMP requirements of Standards 4-6 to the maximum extent practicable and (b) improves existing conditions.

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control

A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan must include the following information:

- Narrative;
- Construction Period Operation and Maintenance Plan;
- Names of Persons or Entity Responsible for Plan Compliance;
- Construction Period Pollution Prevention Measures;
- Erosion and Sedimentation Control Plan Drawings;
- Detail drawings and specifications for erosion control BMPs, including sizing calculations;
- Vegetation Planning;
- Site Development Plan;
- Construction Sequencing Plan;
- Sequencing of Erosion and Sedimentation Controls;
- Operation and Maintenance of Erosion and Sedimentation Controls;
- Inspection Schedule;
- Maintenance Schedule;
- Inspection and Maintenance Log Form.

☒ A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan containing the information set forth above has been included in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control (continued)

☐ The project is highly complex and information is included in the Stormwater Report that explains why it is not possible to submit the Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan with the application. A Construction Period Pollution Prevention and Erosion and Sedimentation Control has ***not*** been included in the Stormwater Report but will be submitted ***before*** land disturbance begins.

☐ The project is ***not*** covered by a NPDES Construction General Permit.

☐ The project is covered by a NPDES Construction General Permit and a copy of the SWPPP is in the Stormwater Report.

☒ The project is covered by a NPDES Construction General Permit but no SWPPP been submitted. The SWPPP will be submitted BEFORE land disturbance begins.

Standard 9: Operation and Maintenance Plan

☒ The Post Construction Operation and Maintenance Plan is included in the Stormwater Report and includes the following information:

- ☒ Name of the stormwater management system owners;
- ☒ Party responsible for operation and maintenance;
- ☒ Schedule for implementation of routine and non-routine maintenance tasks;
- ☐ Plan showing the location of all stormwater BMPs maintenance access areas;
- ☐ Description and delineation of public safety features;
- ☐ Estimated operation and maintenance budget; and
- ☒ Operation and Maintenance Log Form.

☐ The responsible party is ***not*** the owner of the parcel where the BMP is located and the Stormwater Report includes the following submissions:

- ☐ A copy of the legal instrument (deed, homeowner's association, utility trust or other legal entity) that establishes the terms of and legal responsibility for the operation and maintenance of the project site stormwater BMPs;
- ☐ A plan and easement deed that allows site access for the legal entity to operate and maintain BMP functions.

Standard 10: Prohibition of Illicit Discharges

☒ The Long-Term Pollution Prevention Plan includes measures to prevent illicit discharges;

☒ An Illicit Discharge Compliance Statement is attached;

☐ NO Illicit Discharge Compliance Statement is attached but will be submitted ***prior to*** the discharge of any stormwater to post-construction BMPs.

Stormwater Report
495 Transportation Terminal
Milford, MA

Table of Contents

SITE LOCATION & DESCRIPTION

This report was prepared on behalf of the property owner Route 85 Realty Corp. The project site is located on the west side of Beaver Street near its intersection with Route 109 in Milford, MA. The property is approximately 14.64 acres that is bordered on the east by Beaver Street, on the south by Town of Milford property, on the west by Milford Plaza, and to the north, Shell Gas Station and McDonalds. The original wooded site has been disturbed by the work previously permitted in 2016. Approximately 3/4 of the site is impacted by a large wetland on flood plain on the southerly end of the site.

PROJECT DESCRIPTION

The owner is proposing to construct a Transportation Terminal for the purpose of parking 425 vans for the purpose of daily use for deliveries from the Amazon Facility on Industrial Road. The project consists of the development of approximately 3.32 acres of the site as paved parking and includes a 600 s.f. storage building, and lighting for the parking lot.

DESCRIPTION OF EXISTING DRAINAGE

The runoff from the proposed 3.32 acre developed area currently flows overland to the large wetlands area to the south.

DESCRIPTION OF PROPOSED DRAINAGE FACILITIES

The runoff generated from the proposed development with be collected in a catch basin to drain manhole system, using HDPE pipe. A proposed 260-unit StormTech Chamber detention system will be constructed to attenuate the peak flows for the 2, 10, and 100-year storm events. Static recharge for the site will be provided in the area below the structure outlet invert. T.S.S. removal will occur within the hydrodynamic separator prior to discharged to the detention basin.

This report documents design compliance with the applicable sections of the Massachusetts Stormwater Management Standards 1-10.

Stormwater Design Parameter:

The stormwater management system was designed to control the post-development rate of peak rainfall runoff from the site by keeping it below the post-development peak rate of rainfall runoff as stated as the objective in the Massachusetts Stormwater Handbook. These calculations were performed using the HydroCAD hydraulic program, developed by applied Microcomputer System. The HydroCAD software is based upon the Soil Conservation Service, "Technical Release 55 – Urban Hydrology for Small Watersheds" and is generally accepted industry methodology.

The analysis was performed for the 2-year, 10-year, 25-year, and 100-year 24-hour storm events.

The following data was required for input:

- Watershed Area: Areas of each watershed were calculated and expressed in square feet for these calculations.
- SCS Curve Number (Cn): Based on the cover type and hydrologic soil group, a weighted curve number (CN) was determined for each of the existing watersheds utilizing Table 2-2a- *Runoff Curve Numbers For Urban Areas* and *Worksheet 2, Runoff Curve Number and Runoff* from the Soil Conservation Service Technical Release 55 – Urban Hydrology for Small Watersheds.
- Time of Concentration, Tc (Minutes): The time of concentration for each watershed was determined by finding the time necessary for runoff to travel from the hydraulically most distant point in the watershed to the point of concentration. For the proposed conditions the minimum time of 6 minutes was used for runoff to reach the most distant catch basin.
- SCS 24-Hour Storm Type: For the greater New England region, a Type III storm rainfall distribution is recommended for drainage calculations and was used for this project.
- Rainfall Precipitation: Rainfall precipitations used the HydroCad TP-40-Rain for Worcester County for the 2, 10, and 100-year storm events and are as follows:

2-year storm event:	3.2 inches
10-year storm event:	4.7 inches
100-year storm event:	6.8 inches

An on-site conventional storm drainage collection system is designed based on the "Rational Method" using Manning's equation to carry a minimum 25-year storm event without surcharge (See Pipe Sizing Attachments). The proposed drainage pipes will be High Density Polyethylene Pipe.

Standard 1: No new stormwater conveyances (e.g. outfalls) may discharge untreated stormwater directly to or cause erosion in wetlands or waters of the Commonwealth.

All Paved area runoff will sheet flow across the pavement areas, accumulate into hooded catch basins, connect with drain pipe to a hydrodynamic separator, which discharges to the StormTech detention structure. The outlet pipe will discharge to an armored riprap slope to prevent erosion. No new untreated stormwater discharges are proposed.

Standard 2: Stormwater management systems shall be designed so that the post-development peak discharge rates do not exceed pre-development peak discharge rates.

To meet Standard 2, the post-development peak discharge rate must be equal to or less than pre-development rates to prevent storm damage and downstream and offsite flooding from the 2-year thru and 100-year 24-hour storm events.

Peak discharge rates were calculated and evaluated at the same locations – at the wetland system, on the easterly side of the development.

In summary of the attached drainage analysis (HydroCAD), the peak discharge rates leaving the point of evaluation in cubic feet per second (cfs) are as follows;

	Run off		
Storm Events	Pre (cfs)	Post (cfs)	Change (cfs)
2-year	3.94	3.61	-0.33
10-year	7.64	6.22	-1.42
100-year	13.16	9.21	-3.95

Standard 3: Loss of annual recharge to ground water shall be eliminated or minimized through the use of environmentally sensitive site design, low impact development techniques, stormwater best management practices, and good operation and maintenance. At a minimum, the annual recharge from the post- development site shall approximate the annual recharge from pre-development conditions based on soil type. This standard is met when the stormwater management system is designed to infiltrate the required recharge volume as determined in accordance with the Massachusetts Stormwater Handbook.

Hydrologic Group	Volume to Recharge x Total Impervious Area
A	0.60 inches of runoff
B	**0.35 inches of runoff**
C	0.25 inches of runoff
D	0.10 inches of runoff

The required volume of recharge for post-development conditions is calculated as follows;

Proposed Increase to Impervious Area: 3.32 acres (144,619 sf)

Required Reeharge Volume
0.35" x 1' /12" x 144,619 sf = **4,218** cf (B soils)

StormTech
Total storage volume provided below overflow outlet invert @ 250.40= **7,111 cf**

Soils

Soils underlying the site are defined as map unit 260B Sudbury fine sandy loam. We have estimated the soil as hydrologic group "B" for the majority of the site based on Web Soil Survey USDA/NRCS Soil Map. The recharge under the StormTech Chambers infiltration design is based on a calculation of the B soil type.

Calculations show that during a 100-year storm event, the StormTech System will completely dewater within approximately 33.0 hours (See Drawdown calculations in the appendix) which is in compliance with the maximum dewatering time of 72 hours.

Standard 4: Stormwater management systems shall be designed to remove 80% of the average annual post-construction load of Total Suspended Solids (TSS). This standard is met when:

- ***a) Suitable practices for source control and pollution prevention are identified in a long-term pollution prevention plan, and thereafter are implemented and maintained;***
- ***b) Structural stormwater best management practices are sized to capture the required water quality volume as determined in accordance with the Massachusetts Stormwater Handbook; and***
- ***c) Pretreatment is provided in accordance with the Massachusetts Stormwater Handbook.***

The Water Quality Volume requiring 80% TSS removal, is calculated as follows:

The required water quality volume is based on 1.0". The water quality volume equals 1.0 inches of runoff times the increased impervious area of the post-development site.

Proposed Impervious Area
Total Site Impervious Area = 144,619 sf
Impervious area to be treated = **144,619 sf**

Total volume to be treated:
1.0" x 1'/12" x 144,619 sf = **12,052 cf Water Quality Volume Required**

Provided Water Quality Volume:

All stormwater flows through the catch basins, hydrodynamic separators and detention structures.

See TSS Removal Calculations in Attachment Section.

Standard 4: requires the development and implementation of suitable practices for source control and pollution prevention. These measures must be identified in a long-term pollution prevention plan.

The long-term pollution prevention plan is incorporated into the Operation and Maintenance Plan required by Standard 9.

Standard 5: For land uses with higher potential pollutant loads, source control and pollution prevention shall be implemented in accordance with the Massachusetts Stormwater Handbook to

eliminate or reduce the discharge of stormwater runoff from such land uses to the maximum extent practicable.

The proposed project is not a use with higher potential pollutant loads.

Standard 6: Stormwater discharges within the Zone II or Interim Wellhead Protection Area of a public water supply and stormwater discharges near or to any other critical area require the use of the specific source control and pollution prevention measures and the specific structural stormwater best management practices determined by the Department to be suitable for managing discharges to such areas, as provided in the Massachusetts Stormwater Handbook.

The subject property does not discharge stormwater within the Zone II of a public water supply.

Standard 7: A redevelopment project is required to meet the following Stormwater Management Standards only to the maximum extent practicable:

This Site is not a redevelopment project.

Standard 8: A plan to control construction-related impacts, including erosion, sedimentation, and other pollutant sources during construction and land disturbance activities (construction period erosion, sedimentation, and pollution prevention plan) shall be developed and implemented.

During land disturbance and construction activities, project proponents must implement controls that prevent erosion, control sediment movement, and stabilize exposed soils to prevent pollutants from moving offsite or entering wetlands or waters. Land disturbance activities include demolition, construction, clearing, excavation, grading, filling, and reconstruction.

Construction Period Pollution Prevention Plan and Erosion and Sedimentation Control.
EPA NPDES – Storm Water Pollution Prevention Plan (SWPPP)

A. Names of Persons or Entities Responsible for Plan Compliance

John Nenart
Route 85 Realty Corp.
P.O. Box 444
Mendon, MA 01756
Tel : 508-422-1050
johnn@imperialcars.com

B. Construction Period Pollution Prevention Measures

1. Inventory materials to be present on-site during construction.
2. Train employees and subcontractors in prevention and clean up procedures.
3. All materials stored on site will be stored in their appropriate containers and if possible, under a roof or covered.
4. Follow manufacturer's recommendation for disposal of used containers.
5. Store only enough products on site to do the job.

6. On site equipment, fueling and maintenance measures:
   a. Inspect on-site vehicles and equipment daily for leaks.
   b. Conduct all vehicle and equipment maintenance and refueling in front of building, away from storm drains and Wetlands.
   c. Perform major repairs and maintenance off site.
   d. Use drip pans, drip cloths or absorbent pads when replacing spent fuels.
   e. Collect spent fuels and remove from site, per Local and State regulations.
   f. Maintain a clean construction entrance; install a crushed stone apron where truck traffic is frequent to reduce soil compaction constant sweeping is required and limit tracking of sediment into streets, sweeping street when silt is observed on street.
7. A temporary concrete washout station and equipment wash station shall be located on the site. Concrete washout station and equipment wash station shall not be within the 100' wetland buffer. Areas shall be surrounded with a silt fence to contain materials and provide ease of cleanup.
8. Stock pile materials, and maintain Erosion Control around the materials where it can easily be accessed. Maintain easy access to clean up materials to include brooms, mops, rags gloves, goggles, sand, sawdust, plastic and metal trash containers.
9. Clean up spills.
   a. Never hose down "dirty" pavement or impermeable surfaces where fluids have spilled. Use dry cleanup methods (sawdust, cat litter and/or rags and absorbent pads).
   b. Sweep up dry materials immediately. Never wash them away or bury them.
   c. Clean up spills on dirt areas by digging up and properly disposing of contaminated soil in a certified container and notify a certified hauler for removal.
   d. Report significant spills to the Fire Department.

10. It is the responsibility of the site superintendent or employees designated by the Applicant to inspect erosion control and repair as needed, also to inspect all on site vehicles for leaks and check all containers on site that may contain hazardous materials daily.

C. Site Development Plans
   1. See Site Plan set "Platinum Park" Transportation Terminal, Milford, Massachusetts" dated May 29, 2019, prepared by Guerriere & Halnon, Inc.

D. Construction Erosion and Sedimentation Control Plan;
   1. See Site Plan set "Platinum Park" Transportation Terminal, Milford, Massachusetts" dated May 29, 2019, prepared by Guerriere & Halnon, Inc.

E. Plans
   1. Construction Sequencing Plan
      a. A NPDES NOI shall be filed with the EPA.
      b. Record Order of Conditions - The site superintendent shall be aware of all the Conditions contained within the Order including inspection schedules.
      c. Install DEP File # Sign.
      d. Prior to any work on the site including tree/brush clearing, the approved limit of clearing as well as the location of the proposed erosion control devices (such as silt fence/straw bales, etc.) must be staked on the ground under the direction of a Massachusetts registered Professional Land Surveyor.
      e. Install erosion control barrier at locations depicted on the plans.

f. Erosion control to be inspected by either the design engineer (or agent) or an erosion control monitor appointed by the Town of Milford, MA.
g. Erosion control devices shall be stored on the site to be used in case of an emergency (large storm).
h. Perform tree/brush removal.
i. Strip off top and subsoil. Stockpile material to be reused away from any drainage inlet or protected wetland areas, remove excess material from the site. Install and maintain erosion control barrier around stockpile.
j. Rough grade site, maintaining temporary low areas/sediment traps for sediment accumulation and away from the wetlands and prevent sedimentation from migrating from the site.
k. Construct detention basin, outlets/outfalls and install pipes, manholes and catch basins. Stabilize side slopes with loam, seed and mulch.
l. Install underground utilities; protect all open drainage structures with erosion/siltation control devices, and rope off any areas susceptible to heavy vehicle damage.
m. Prepare compacted parking lot base.
n. Loam and seed (mulch as required) disturbed areas of site other than immediately adjacent to the parking lot.
o. Install binder course of bituminous asphalt.
p. Install curbing and final pavement wearing course.
q. Finish grade - loam and seed and landscaping.
r. Maintain all erosion control devices until site is stabilized, final inspections are performed, and a Certificate of Compliance is issued by the Conservation Commission.
s. The Contractor shall be responsible to schedule any required inspections of his/her work.

2. Construction Waste Management Plan
   a. Dumpster for trash and bulk waste collection shall be provided separately for construction.
   b. Recycle materials whenever possible (paper, plaster cardboard, metal cans). Separate containers for material are recommended.
   c. Segregate and provide containers for disposal options for waste.
   d. Do not bury waste and debris on site.
   e. Certified haulers will be hired to remove the dumpster container waste as needed. Recycling products will also be removed off site weekly.

F. Operation and Maintenance of Erosion and Sedimentation Controls

The operation and maintenance of sedimentation control shall be the responsibility of the contractor. The inspection and maintenance of the storm water component shall be performed as noted below. The contractor shall, at all times have erosion control in place. The contractor, based on future weather reports shall prepare and inspect all erosion control devices; cleaning, repairing and upgrading is a priority so that the devices perform as per design. Inspect the site during rain events. **Don't stay away from the site.** At a minimum, there should be inspection to assure the devices are not clogged or plugged, or that devices have not been destroyed or damaged during the rain event. After a storm event inspection is required to clean and repair any damage components. Immediate repair is required.

G. Inspection and Maintenance Schedules

1. Inspection must be conducted at least once every 7 days and within 24 hours prior to and after the end of a storm event 0.5 inches or greater.
2. Inspection frequency can be reduced to once a month if:
   a. The site is temporarily stabilized.
   b. Runoff is unlikely due to winter conditions, when site is covered with snow or ice.
3. Inspections must be conducted by qualified personnel, "qualified personnel" means a person knowledgeable in the principles and practice of erosion and sediment controls and who possess the skills to assess the conditions and take measures to maintain and ensure proper operation, also to conclude if the erosion control methods selected are effective.
4. For each inspection, the inspection report must include:
   a. The inspection date.
   b. Names, titles of personnel making the inspection.
   c. Weather information for the period since the last inspection.
   d. Weather information at the time of the inspection.
   e. Locations of discharges of sediment from the site, if any.
   f. Locations of BMP's that need to be maintained.
   g. Locations where additional BMP's may be required.
   h. Corrective action required or any changes to the SWPPP that may be necessary.
5. Qualified personnel shall inspect the following in-place work;

Inspection Schedule:

Erosion Control	Weekly
Catch Basins	Weekly
Temporary Sedimentation Traps/Basins	Weekly

Please Note: Special inspections shall also be made after a significant rainfall event.

Maintenance Schedule

Erosion Control Devices Failure	Immediately
Temporary Sedimentation Traps/Basins	As needed

Please Note: Special maintenance shall also be made after a significant rainfall event.

H. Inspection and Maintenance Log Form.
   1. See Construction Phase Inspection and Maintenance Form attached

Standard 9: A Long –Term Operation and Maintenance (O&M) Plan shall be developed and implemented to ensure that storm water management systems function as designed.

The following shall serve as the (O&M) Plan required by Standard 9, as well as the Long-Term Pollution Prevention Plan required by Standard 4.

A. Names of Persons or Entities Responsible for Plan Compliance;

John Nenart
Route 85 Realty Corp.
P.O. Box 444
Mendon, MA 01756
Tel: 508-422-1050
Email: johnn@imperialcars.com

B. Good housekeeping practices
1. Maintain site, landscaping and vegetation.
2. Sweep and pick up litter on pavements and grounds.
3. Deliveries shall be monitored by owners or representative to ensure that if any spillage occurs, it shall be contained and cleaned up immediately.
4. Maintain pavement and curbing in good repair.

C. Requirements for routine inspections and maintenance of stormwater BMPs
1. Plans: The storm water Operation and Maintenance Plan shall consist of all Plans, documents and all local state and federal approvals as required for the subject property.
2. Record Keeping:
   a. Maintain a log of all operation and maintenance activities for at least three years following construction, including inspections, repairs, replacement and disposal (for disposal, the log shall indicate the type of material and the disposal location);

3. Descriptions and Designs: The Best Management Practices (BMP) incorporated into the design include the following;
   a. Deep sump catch basins with hoods installed to promote TSS Removal of solids and control floatable pollutants. This BMP has a design rate of 25% TSS Removal.
   b. Hydrodynamic Separator - installed to promote TSS Removal of solids. This BMP has a design rate of 65% TSS Removal.
   c. Infiltration Basin –has a design rate of 80% TSS Removal. Refer to TSS Removal Worksheet included in the Attachments.
   d. Spill Containment Kit to contain and clean-up spills that could occur on site.

4. BMP Maintenance: After construction it is the responsibility of the owner to perform maintenance. The cleaning of the components of the stormwater management system shall generally be as follows:
   a. Pavement: The owner shall keep the pavement swept with a mechanical sweeper or hand swept semi-annually at a minimum.
   b. Catch Basins: Shall be cleaned by excavating, pumping or vacuuming. The sediment shall be disposed of off-site by the Owner. Inspect quarterly, remove silt when ¼ full.
   c. Hydrodynamic Separator shall be cleaned by pumping. The sediment shall be disposed of off-site by the Owner. Inspect quarterly, remove silt when ¼ full.
   d. StormTech Chambers: Inspect for proper function after every major storm event during the first 3 months of operation, inspect/remove debris twice per year afterward.

5. Access Provisions: All of the components of the storm water system will be accessible by the Owner

D. Spill prevention and response plans
   1. Train employees and subcontractors in prevention and clean up procedures.
   2. All materials stored on site will be stored in their appropriate containers under a roof or in the approved underground storage tanks.
   3. Follow manufactnrer's recommendation for disposal of used containers.
   4. On site equipment, fueling and maintenance measures:
      a. Inspect on-site vehicles and equipment daily for leaks.
      b. Conduct all vehicle and equipment maintenance off Site and refueling in one location, away from storm drains and wetlands.
   5. Clean up spills.
      a. Never hose down "dirty" pavement or impermeable surfaces where fluids have spilled. Use dry clean-up methods (sawdust, cat litter and/or rags and absorbent pads).
      b. Sweep up dry materials immediately. Never wash them away or bury them.
      c. Clean up spills on dirt areas by digging up and properly disposing of contaminated soil.
      d. Report significant spills to the Fire Department, Conservation Commission and Board of Health.

E. Provisions for maintenance of lawns, gardens, and other landscaped areas
Dispose of clippings outside of the 100-foot buffer zone to the adjacent wetland and away from storm drainage and use 0% phosphate fertilizer.

F. Requirements for storage and use of herbicides, and pesticides
The application of herbicides or pesticides will be done by professional certified contractor.

G. Provisions for solid waste management
   1. Waste Management Plan
      a. Recycle materials whenever possible (paper, plaster cardboard, metal cans). Separate containers for material are recommended.
      b. Do not bury waste and debris on site.
      c. Certified haulers will be hired to remove the dumpster container waste as needed. Recycling products will also be removed off site weekly.

H. Snow disposal and plowing plans
Snow storage is adequate around the site for large storm events, see site plan

I. Winter Road Salt and/or Sand Use and Storage restrictions
No sand, salt, or chemicals for de-icing will be stored outside.

J. Pavement sweeping schedules
Sweeping, the act of cleaning pavement can be done by mechanical sweepers, vacuum sweeper or hand sweeper. The quantity of sand is a direct correlation with the treatment of ice and snow and the types of chemicals and spreaders that are being used on site to manage snow. If a liquid de-icer such as calcium chloride is used as a pretreatment to new events the amount of sand is minimized. Sweeping for this site should be done semi-annually at a minimum. Collecting the particulate before it enters tbe catch basins is cheaper and more environmentally friendly than in a catch basin mixing with oils and greases in the surface water runoff in catch basins.

K. Provisions for prevention of illicit discharges to the stormwater management system

The discharge into the stormwater system is not being violated, see attachment for illicit discharges compliance.

L. Training the staff or personnel involved with implementing Long-Term Pollution Prevention Plan
The owner shall develop policies and procedures for containing the illicit spilling of oils, soda, beer, paper and litter. These wastes provide a degrading of the water quality. The placement of signs and trash barrels with lids around the site would contribute to a clean water quality site condition.

M. List of Emergency contacts for implementing Long-Term Pollntion Prevention Plan:

John Nenart
Route 85 Realty Corp.
P.O. Box 444
Mendon, MA 01756
Tel: 508-422-1050
johnn@imperialcars.com

Standard 10: All illicit discharges to the stormwater management system are prohibited.

Standard 10 prohibits illicit discharges to stormwater management systems. The stormwater management system is the system for conveying, treating, and infiltrating stormwater on site, including stormwater best management practices and any pipes intended to transport stormwater to the ground water, a surface water, or municipal separate storm sewer system. Illicit discharges to the stormwater management system are discharges that are not entirely comprised of stormwater. Notwithstanding the foregoing, an illicit discharge does not include discharges from the following activities or facilities: firefighting, water line flushing, landscape irrigation, uncontaminated ground water, potable water sources, foundation drains, air conditioning condensation, footing drains, individual resident car washing, flows from riparian habitats and wetlands, dechlorinated water from swimming pools, water used for street washing and water used to clean residential buildings without detergents.

Illicit Discharge Compliance Statement

It is the intent of the Owner, Route 85 Realty Corp., P.O. Box 444, Mendon, MA 01756 to prevent illicit discharges to the stormwater management system, including wastewater discharges and discharges of stormwater contaminated by contact with process wastes, raw materials, toxic pollutants, hazardous substances, oil, or grease. There will be no connection to the storm water system to inadvertently direct other types of liquids, chemicals or solids into the storm drainage system. The Owner will also promote a clean Green Environment by mitigating spills onto pavements; oils, soda, chemicals, pet waste, debris and litter.

Respectfully Acknowledged,

_____

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:25,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Worcester County, Massachusetts, Southern Part
Survey Area Data: Version 12, Sep 12, 2019

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jul 28, 2019—Aug 15, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

TSS REMOVAL CALCULATIONS

INSTRUCTIONS:

1. Sheet is nonautomated. Print sheet and complete using hand calculations. Column A and B: See MassDEP Structural BMP Table
2. The calculations must be completed using the Column Headings specified in Chart and Not the Excel Column Headings
3. To complete Chart Column D, multiple Column B value within Row x Column C value within Row
4. To complete Chart Column E value, subtract Column D value within Row from Column C within Row
5. Total TSS Removal = Sum All Values in Column D

Non-automated: Mar. 4, 2008

Location: 495 Transportation Terminal, Milford, MA

TSS Removal Calculation Worksheet

A BMP[1]	B TSS Removal Rate[1]	C Starting TSS Load*	D Amount Removed (B*C)	E Remaining Load (C-D)
Deep Sump and Hooded Catch Basin	0.25	1.00	0.25	0.75
8' Diameter Barracuda	0.50	0.75	0.375	0.375
StormTech Chambers Infiltration	0.80	0.375	0.30	0.075

Total TSS Removal = 93%

Separate Form Needs to be Completed for Each Outlet or BMP Train

Project: G-8293
Prepared By: Robert Poxon
Date: 12/26/2019

*Equals remaining load from previous BMP (E) which enters the BMP

Non-automated TSS Calculation Sheet must be used if Proprietary BMP Proposed

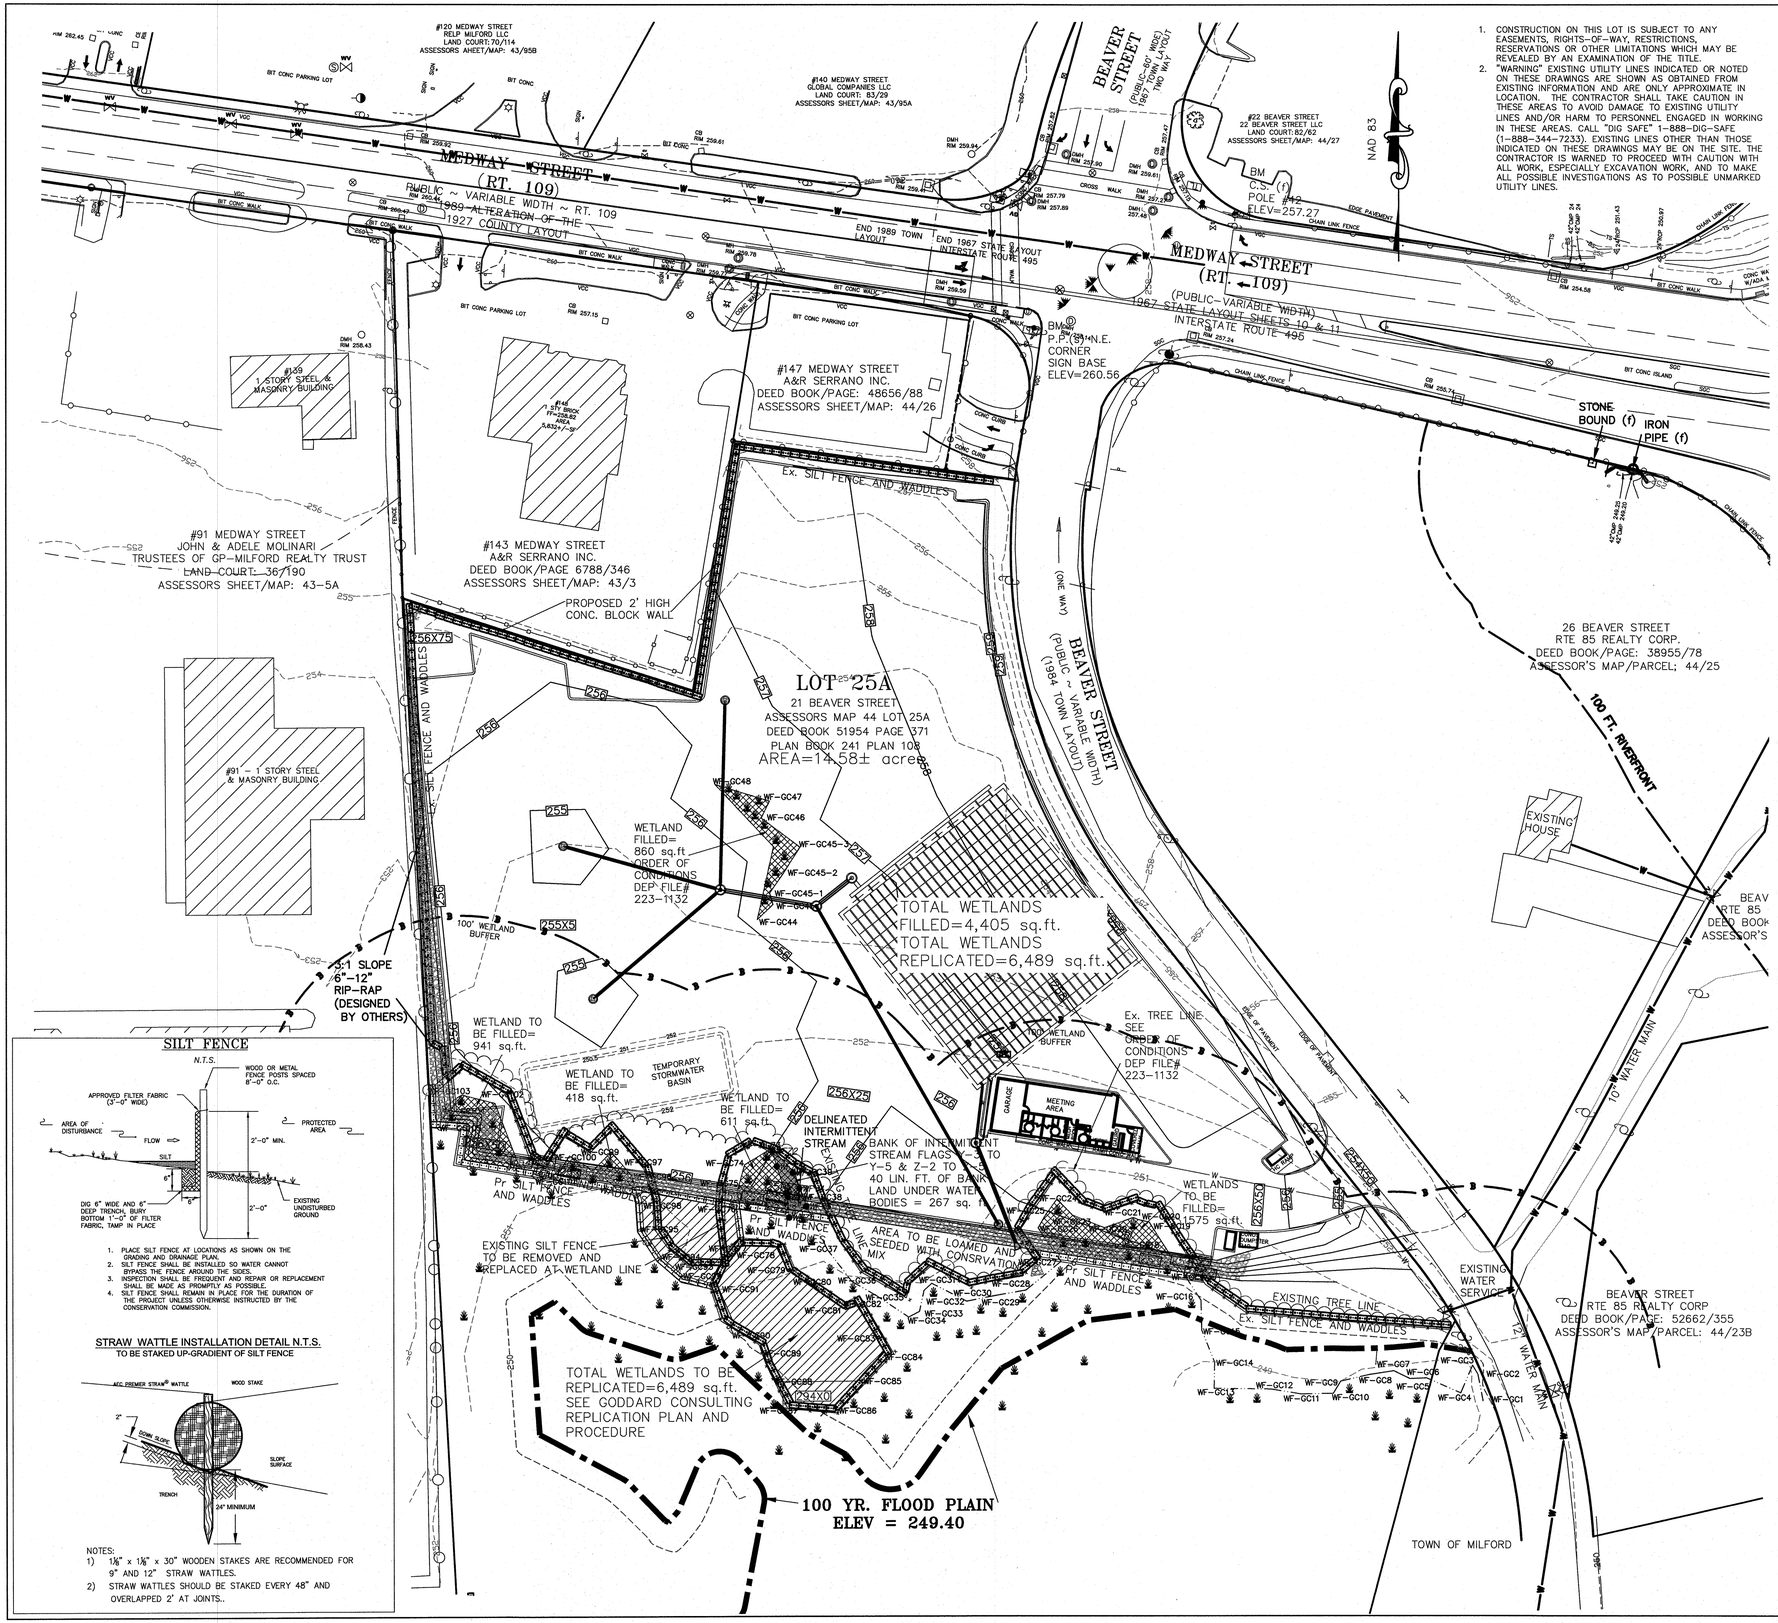
SHEET 4 OF 9

G-8616-1



1. CONSTRUCTION ON THIS LOT IS SUBJECT TO ANY EASEMENTS, RIGHTS-OF-WAY, RESTRICTIONS, RESERVATIONS OR OTHER LIMITATIONS WHICH MAY BE REVEALED BY AN EXAMINATION OF THE TITLE.
2. "WARNING" EXISTING UTILITY LINES INDICATED OR NOTED ON THESE DRAWINGS ARE SHOWN AS OBTAINED FROM EXISTING INFORMATION AND ARE ONLY APPROXIMATE IN LOCATION. THE CONTRACTOR SHALL TAKE CAUTION IN THESE AREAS TO AVOID DAMAGE TO EXISTING UTILITY LINES AND/OR HARM TO PERSONNEL ENGAGED IN WORKING IN THESE AREAS. CALL "DIG SAFE" 1-888-DIG-SAFE (1-888-344-7233). EXISTING LINES OTHER THAN THOSE INDICATED ON THESE DRAWINGS MAY BE ON THE SITE. THE CONTRACTOR IS WARNED TO PROCEED WITH CAUTION WITH ALL WORK, ESPECIALLY EXCAVATION WORK, AND TO MAKE ALL POSSIBLE INVESTIGATIONS AS TO POSSIBLE UNMARKED UTILITY LINES.

BVW AND BANK INSTALLATION PROCEDURES

SUPERVISION: ALL WORK WITHIN THE REPLICATION AREA SHALL BE SUPERVISED BY A QUALIFIED WETLAND SCIENTIST. THE SUPERVISOR SHALL SUBMIT MONITORING REPORTS TO THE CONSERVATION COMMISSION AS DESCRIBED BELOW. REPORTS SHALL CONTAIN DETAILS OF ALL WORK PERFORMED AND PHOTOGRAPHS OF COMPLETED CONDITIONS.

TIMING: THE PREPARATION/EXCAVATION OF THE REPLICATION AREA AND IMPACT AREA WILL START AFTER THE APPEAL PERIOD FOR THE ORDER OF CONDITIONS HAS LAPSED. THE PLANTING OF THE REPLICATION AREA SHALL BE ACCOMPLISHED DURING THE GROWING SEASON IN THE FALL OF 2017 (IF POSSIBLE) OR SPRING OF 2018.

STEP 1: EXCAVATION OF IMPACT AREA. AN EXCAVATOR SHALL REMOVE THE EXISTING SOILS WITHIN THE BVW IMPACT AREA. EXCAVATED SOILS WILL BE STORED OUTSIDE ALL JURISDICTIONAL AREAS AND UTILIZED IF NECESSARY WITHIN THE REPLICATION AREA (IF ADEQUATE HYDRIC AND ORGANIC SOILS ARE NOT EXPOSED WITHIN THE REPLICATION AREA DURING THE EXCAVATION PROCESS, THESE STORED SOILS WILL BE UTILIZED).

STEP 2: EROSION CONTROL BARRIERS. EROSION CONTROL BARRIERS IN THE FORM OF STAKED SILTATION FENCE AND MULCH SOCK (OR SIMILAR INVASIVE-FREE BARRIER) SHALL BE PLACED WITHIN THE REPLICATION AREA WITHIN FLAGS 78-91 TO PREVENT IMPACT TO THE ADJACENT WETLAND AREA. THESE ECB'S WILL REMAIN IN PLACE AND BE MAINTAINED UNTIL THE AREA IS COMPLETELY STABILIZED.

STEP 3: PLANT REMOVAL. VEGETATION WITHIN THE REPLICATION AREA SHALL BE CLEARED AND REMOVED OUT OF JURISDICTIONAL AREAS.

STEP 4: EXCAVATION OF REPLICATION AREA. PRIOR TO ANY SOIL EXCAVATION, A STORAGE AREA FOR THE SOIL SHALL BE PREPARED; SOIL WILL NOT BE STORED IN BUFFER ZONE. AN EXCAVATOR SHALL REMOVE EXISTING SOILS TO THE ELEVATION OF THAT OF THE ADJACENT NON-IMPACETED WETLAND AREA ALONG FLAGS 78-91 AND TO A DEPTH AT WHICH REDOXIMORPHIC FEATURES BECOME VISIBLE AT THE SOIL SURFACE. A WETLAND SCIENTIST WILL BE ON SITE DURING THE EXCAVATION PROCESS.

STEP 5: BANK CREATION. A CHANNEL FROM ONE END OF THE REPLICATION AREA TO THE OTHER SHALL BE CREATED AT A SIMILAR BANK SIZE AND WIDTH OF THE AREA WHICH WILL BE IMPACTED.

STEP 6: PLANTING. THE VEGETATION SELECTED FOR THE REPLICATION AREA INCLUDES SPECIES THAT ARE NATIVE TO THE SITE AND AREA ALSO LOCATED WITHIN THE ADJACENT BVW. PRECISE CITING OF PLANTS MAY BE DETERMINED BY THE WETLAND SCIENTIST IN THE FIELD PRIOR TO INSTALLATION. SHRUBS SHALL BE SPACED 8' ON CENTER AND TREES 15' ON CENTER. A WETLAND SEED MIX WILL BE SPREAD THROUGHOUT THE AREA.

A. SEASONAL MONITORING REPORTS SHALL BE PREPARED FOR THE REPLICATION AREA BY A QUALIFIED WETLAND SCIENTIST FOR A PERIOD OF 2 ADDITIONAL YEARS AFTER INSTALLATION. THIS MONITORING PROGRAM WILL CONSIST OF EARLY SUMMER AND EARLY FALL INSPECTIONS, AND WILL INCLUDE PHOTOGRAPHS AND DETAILS ABOUT THE VITALITY OF THE REPLICATION AREA. MONITORING REPORTS SHALL BE SUBMITTED TO THE COMMISSION BY DECEMBER 30TH OF EACH YEAR. MONITORING REPORTS SHALL DESCRIBE, USING NARRATIVE, PLANS AND COLOR PHOTOGRAPHS, THE PHYSICAL CHARACTERISTICS OF THE REPLICATION AREA WITH RESPECT TO STABILITY, SOIL CHARACTERISTICS, SURVIVAL OF VEGETATION AND PLAN MORTALITY, AERIAL EXTENT AND DISTRIBUTION, SPECIES DIVERSITY AND VERTICAL STRATIFICATION (I.E. HERB, SHRUB AND TREE LAYERS).

B. AT LEAST 75% OF THE SURFACE AREA OF THE REPLICATION AREA SHALL BE RE-ESTABLISHED WITH INDIGENOUS PLANT SPECIES WITHIN TWO GROWING SEASONS. IF THE REPLICATION AREA DOES NOT MEET THE 75% RE-VEGEATION REQUIREMENT BY THE END OF THE SECOND GROWING SEASON AFTER INSTALLATION, THE APPLICANT SHALL SUBMIT A REMEDIATION PLAN TO THE COMMISSION FOR APPROVAL THAT WILL ACHIEVE, UNDER THE SUPERVISION OF A WETLAND SPECIALIST, REPLICATION GOALS. THIS PLAN MUST INCLUDE AN ANALYSIS OF WHY THE AREAS HAVE NOT SUCCESSFULLY RE-VEGETATED AND HOW THE APPLICANT INTENDS TO RESOLVE THE PROBLEM.

STEP 7: AS-BUILT SURVEY. UPON MEETING THE CRITERIA FOR 75% COVER OF INDIGENOUS SPECIES AFTER TWO GROWING SEASONS, THE REPLICATION AREAS WILL BE SURVEYED FOR AS-BUILT CONDITIONS. THE AS-BUILT PLAN WILL BE SUBMITTED TO THE CONSERVATION COMMISSION ALONG WITH A REQUEST FOR A CERTIFICATE OF COMPLIANCE.

NOT TO SCALE

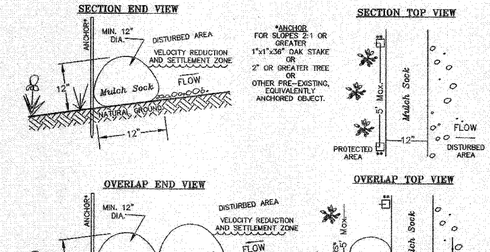
TRASH ENCLOSURE

SCALE: 1/4"=1'-0"



COMPONENTS:

OUTSIDE CASING: 100% organic hessian.

FILLER INGREDIENT: *Mulch*
- A blend of coarse and fine compost and shredded wood.
- Particle sizes: 100% passing a 3" screen; 90–100% passing a 1" screen; 70–100% passing a 0.75" screen; 30–75% passing a 0.25" screen.
- Weight: Approx. 850 lbs./cu.yd. (Ave. 30 lbs./l.f.)

***Mulch Sock* INSTALLATION:**

With the newest technology and equipment, sections can be constructed on site in lengths from 1' to 100'.

Sections can also be delivered to the site in lengths from 1' to 8'.

The flexibility of *Mulch Sock* allows it to conform to any contour or terrain while holding a slightly oval shape at 12" high by 18" wide.

Where section ends meet, there shall be an overlap of 6" or greater. Both sides shall be anchored (oak stakes, trees, etc.) to stabilize the union. No additional anchors are required on slopes less than 2:1. **Additional anchors are required at 5' intervals (max.) on the downslope or protected side on slopes greater than 2:1 to prevent movement.

Mulch Sock

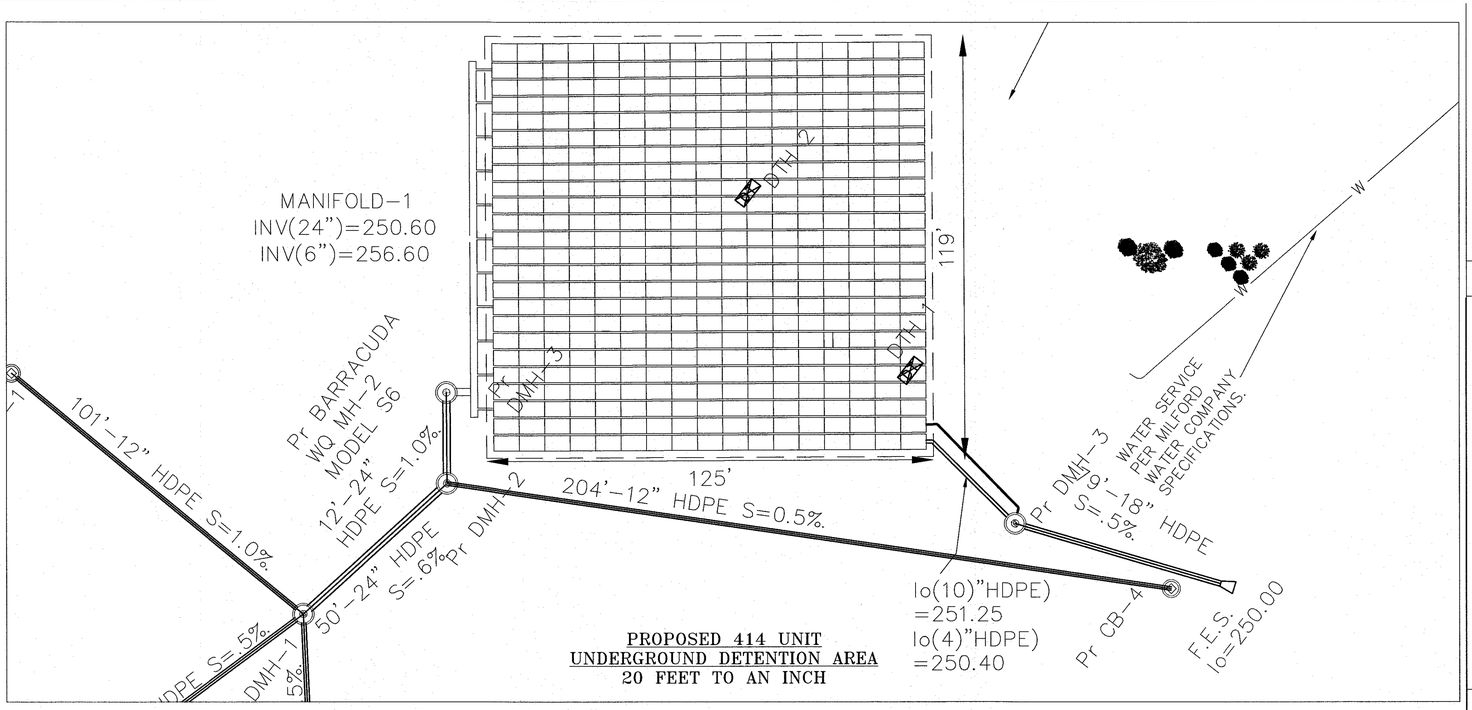
SHEET 7 OF 9

G-8616-1

G-8616-1



PROPOSED 414 UNIT
UNDERGROUND DETENTION AREA
20 FEET TO AN INCH

ACCEPTABLE FILL MATERIALS: STORMTECH SC-740 CHAMBER SYSTEMS

MATERIAL LOCATION	DESCRIPTION	AASHTO M43 DESIGNATION[1]	COMPACTION/DENSITY REQUIREMENT
D FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISH GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THIS LAYER.	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE (B) LAYER TO 18" [457 mm] ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THIS LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES. MOST PAVEMENT SUB-BASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTION AFTER 12" [305 mm] OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 6" [152 mm] LIFTS TO A MIN. 95% STANDARD PROCTOR DENSITY. ROLLER GROSS VEHICLE WEIGHT NOT TO EXCEED 12,000 lbs [53 kN]. DYNAMIC FORCE NOT TO EXCEED 20,000 lbs [89 kN].
B EMBEDMENT STONE SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE (A) LAYER TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE, NOMINAL SIZE DISTRIBUTION BETWEEN 3/4 - 2 INCH [19 - 51 mm]	3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED.
A FOUNDATION STONE BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE, NOMINAL SIZE DISTRIBUTION BETWEEN 3/4 - 2 INCH [19 - 51 mm]	3, 35, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A 95% STANDARD PROCTOR DENSITY[2].

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".

2. AS AN ALTERNATE TO PROCTOR TESTING AND FIELD DENSITY MEASUREMENTS ON OPEN GRADED STONE, STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" [229 mm] (MAX) LIFTS USING TWO FULL COVERAGES WITH AN APPROPRIATE COMPACTOR.

OFFICE OF PLANNING
AND ENGINEERING

Michael Dean, P.E.
Town Engineer

November 13, 2020

Mr. Michael Giampietro, Chairman
Conservation Commission
52 Main Street
Milford, MA, 01757

Re: Notice of Intent for **26 Beaver Street - Proposed Transportation Terminal**
DEP **File # 223-** _____

Dear Mr. Giampietro:

I have reviewed the Notice of Intent filing for 26 Beaver Street (lots 23B, 23C & 25). The submittal is for a Proposed Transportation Terminal. The applicant is Route 85 Realty Corp., P.O. Box 444, Mendon, MA 01756.

The Parcels consists of 5.86 Acres, Zoned as Highway Industrial B (IB), located on the eastern side of Beaver Street adjacent to Route 495. The parcels refer to the Town Assessors Map 44, Block 0, Lots 23B, 23C & 25.

This project was recently in front of the Commission regarding the determination of the presence of a River / Riverfront. The project was issued a negative determination, therefore there is no presence of a River and in turn there is no Riverfront associated with the project.

The resource areas associated with the parcel are: Bordering Vegetated Wetlands, Bank and 100Year Flood Plain. The resource areas where delineated and re-evaluated by Goddard Consulting, LLC.

Following a review of the above referenced documents I offer the following comments:

1. Erosion control measures **are** shown on the plan; however, the detail **does not** include **Silt Fence** with Mulch Sock. Silt Fence should be added to the details.

2. Since the original submittal, the drainage analysis / design has been revised along with a final set of design plans.

I recommend the issuance of an Order of Conditions for the project.

Sincerely,

Michael Dean, P.E.
Town Engineer

Re: Notice of Intent
26 Beaver Street, MA 01757
Map 44, Parcels 25, 23C, 23B

Dear Milford Conservation Commission:

Goddard Consulting, LLC is pleased to submit this Notice of Intent (NOI) on behalf of Rte 85 Realty Corporation, for the property known as 26 Beaver Street in Milford, MA. The applicant proposes the construction of a parking lot and drainage within the 100-foot Buffer Zone to Bordering Vegetated Wetlands (BVW). This application is being filed under the Massachusetts Wetlands Protection Act (the WPA), Regulations 310 CMR 10.00 et. al.

Seven hard copies and a digital version of this application have been submitted for your review. A list of enclosed documents is as follows:

- NOI Application (WPA Form 3)
- Wetlands Fee Transmittal Form
- Copy of Checks
- Affidavit of Service, Notification to Abutters, Certified Abutters List
- Wetland Border Report, Goddard Consulting, LLC. 4/24/2020
- USGS of Site, Goddard Consulting, LLC. 3/4/2020
- Orthoview of Site, Goddard Consulting, LLC. 3/4/2020
- Stormwater Report for "495 Transportation Terminal II", Milford, MA, Guerriere & Halnon, Inc., 3/2/2020
- Site Plans: *"495 Transportation Depot II" Transportation Terminal Site Plan, 26 Beaver Street, Milford, Massachusetts,* Guerriere & Halnon, Inc., Revised 9/8/2020

Existing Conditions

The site of the proposed project consists of three parcels: Map: 44 Lot: 25 (2.74 acres), Lot: 23C (0.83 acres), and Lot: 23B (2.00 acres), totaling approximately 5.57 acres. Lot 25 has a vast lawn area with a vacant single-family home (see **Photo 1**). A non-jurisdictional isolated wetland was flagged within the maintained grass area near Medway Street with series A1-18 and is vegetated with sedges, rushes and steeplebush (all wetland species). During the site inspection, this wetland had indicators of hydrology such as standing water (1-inch of water), stained leaves and hydric soils. No physical connection (via land, water or culvert) to the adjacent Bordering Vegetated Wetland (BVW) was observed and therefore is considered isolated.

Photo 1: The existing single-family home on Lot 25 stands in the middle of a vast lawn.

According to the current USGS map, a presumptive perennial stream originates from a culvert at the northeastern corner of the parcel by Medway Street (see **Photo 2**). A narrow strip of BVW was delineated on each side of the stream. The stream flows through the lawn and continues into the adjacent parcel of land, Lot 23C, into a narrow grove of woody vegetation (partially BVW) along the northeastern edge of the parcel boundary. Lot 23C is narrow in shape and consists of the stream, BVW, and a driveway that connects to Beaver Street. The stream flows between the end of the driveway and a chain link fence (which marks the edge of the property). Beyond the fence is highway verge (lawn) and the on-ramp to Route 495. The stream and thin strip of surrounding BVW continues parallel to Route 495 until it spills into a large flooded swamp that encompasses the eastern and southern portions of Lot 23B. The northwestern portion of Lot 23B is an upland forest, littered with garbage, and dominant in oak, white pine, rose, honeysuckle, black birch, witch hazel, Canada mayflower, and princess pine.

The USGS mapped perennial stream has been a topic of discussion with the Milford Conservation Commission (the Commission) as part of an RDA submittal from June 16, 2020. Since the canal was human-made and built as a result of Route 495 and nearby development, the stream should not be considered natural. According to 310 CMR 10.58(2)(g):

Human-made canals (e.g., the Cape Cod Canal and canals diverted from rivers in Lowell and Holyoke) and mosquito ditches associated with coastal rivers do not have riverfront areas.

Due to the regulation stated above and the evidence presented as part of the RDA application, it is presumed that there is no Riverfront Area (RA) on Lot 25, 23C, and 23B. Although the Commission has not made a formal determination on whether the stream has RA, the Milford

Town Council has provided a report that agrees with the findings in the RDA and the applicant anticipated this issue will be resolved at the next public meeting, with a finding of a no RA status.

According to the Mass GIS data layers for NHESP, this site is not located within Estimated and/or Priority Habitat of Rare Wildlife and has no mapped potential or certified vernal pools. The site is not located in an ACEC. There is a Zone AE FEMA Flood Zone located along the BVW boundary on Lot 23C and on portions of upland on Lot 23B. The resource area, Bordering Land Subject to Flooding (BLSF), extends from the delineated wetland line up to the 100-year FEMA flood elevation (249.40).

Photo 2: The stream discharges from the double piped culvert below Medway Street. The stream flows through the lawn and eventually enters a narrow grove of woody vegetation on Lot 23C.

Project Summary and Regulatory Compliance

The proposed project will construct a parking lot (283 spaces) and two stormwater discharges within the WPA's 100-foot Buffer Zone to BVW and will comply with the regulations set forth in the WPA. The existing house will be razed, and mature trees will be cleared on the upland portions of Lot 23C and 23B, creating open space for the construction of the parking lot. The upland will be graded to the desired elevations for the construction of the parking lot, which is designed to direct stormwater into underground infiltration systems. During large rainstorms, excess stormwater from the underground infiltration systems will discharge out of two pipes, onto rip rap, towards the southern and southeastern edge of the upland on Lot 23B. Rip rap is proposed along the all edges of parking lot that are immediately adjacent to resource areas.

No work in the wetland resource areas (BVW & BLSF) are proposed. Construction will not adversely impact the resource areas considering there will be appropriate erosion control barriers (silt fence and mulch sock) placed at the limit of work.

Conclusion

Goddard Consulting believes that the proposed project will not have any adverse impacts on the interests identified in M.G.L c. 131 section 40. The project meets all regulatory compliance standards under the WPA, therefore Goddard Consulting respectfully requests that the Commission issues an Order of Conditions approving the proposed project. Please feel free to contact us if you have any questions.

Very truly yours,
Goddard Consulting, LLC

Scott Goddard,
Principal & PWS

A. General Information (continued)

6. General Project Description:

Construction of a parking lot and drainage within the 100-foot Buffer Zone to Bordering Vegetated Wetlands.

7a. Project Type Checklist: (Limited Project Types see Section A. 7b.)

1. ☐ Single Family Home
2. ☐ Residential Subdivision
3. ☒ Commercial/Industrial
4. ☐ Dock/Pier
5. ☐ Utilities
6. ☐ Coastal engineering Structure
7. ☐ Agriculture (e.g., cranberries, forestry)
8. ☐ Transportation
9. ☐ Other

7b. Is any portion of the proposed activity eligible to be treated as a limited project (including Ecological Restoration Limited Project) subject to 310 CMR 10.24 (coastal) or 310 CMR 10.53 (inland)?

1. ☐ Yes ☒ No

If yes, describe which limited project applies to this project. (See 310 CMR 10.24 and 10.53 for a complete list and description of limited project types)

2. Limited Project Type

If the proposed activity is eligible to be treated as an Ecological Restoration Limited Project (310 CMR10.24(8), 310 CMR 10.53(4)), complete and attach Appendix A: Ecological Restoration Limited Project Checklist and Signed Certification.

8. Property recorded at the Registry of Deeds for:

a. County	b. Certificate # (if registered land)
Worcester	
c. Book	d. Page Number
38955, 52720, 52662	78, 316, 355

B. Buffer Zone & Resource Area Impacts (temporary & permanent)

1. ☒ Buffer Zone Only – Check if the project is located only in the Buffer Zone of a Bordering Vegetated Wetland, Inland Bank, or Coastal Resource Area.
2. ☐ Inland Resource Areas (see 310 CMR 10.54-10.58; if not applicable, go to Section B.3, Coastal Resource Areas).

Check all that apply below. Attach narrative and any supporting documentation describing how the project will meet all performance standards for each of the resource areas altered, including standards requiring consideration of alternative project design or location.

B. Buffer Zone & Resource Area Impacts (temporary & permanent) (cont'd)

For all projects affecting other Resource Areas, please attach a narrative explaining how the resource area was delineated.

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
a. ☐ Bank	1. linear feet	2. linear feet
b. ☐ Bordering Vegetated Wetland	1. square feet	2. square feet
c. ☐ Land Under Waterbodies and Waterways	1. square feet 3. cubic yards dredged	2. square feet

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
d. ☐ Bordering Land Subject to Flooding	1. square feet	2. square feet
	3. cubic feet of flood storage lost	4. cubic feet replaced
e. ☐ Isolated Land Subject to Flooding	1. square feet	
	2. cubic feet of flood storage lost	3. cubic feet replaced

f. ☐ Riverfront Area

1. Name of Waterway (if available) - **specify coastal or inland**

2. Width of Riverfront Area (check one):

☐ 25 ft. - Designated Densely Developed Areas only

☐ 100 ft. - New agricultural projects only

☐ 200 ft. - All other projects

3. Total area of Riverfront Area on the site of the proposed project: _____ square feet

4. Proposed alteration of the Riverfront Area:

a. total square feet _____ b. square feet within 100 ft. _____ c. square feet between 100 ft. and 200 ft. _____

5. Has an alternatives analysis been done and is it attached to this NOI? ☐ Yes ☐ No

6. Was the lot where the activity is proposed created prior to August 1, 1996? ☐ Yes ☐ No

3. ☐ Coastal Resource Areas: (See 310 CMR 10.25-10.35)

Note: for coastal riverfront areas, please complete **Section B.2.f**. above.

C. Other Applicable Standards and Requirements

☐ This is a proposal for an Ecological Restoration Limited Project. Skip Section C and complete Appendix A: Ecological Restoration Limited Project Checklists – Required Actions (310 CMR 10.11).

Streamlined Massachusetts Endangered Species Act/Wetlands Protection Act Review

1. Is any portion of the proposed project located in **Estimated Habitat of Rare Wildlife** as indicated on the most recent Estimated Habitat Map of State-Listed Rare Wetland Wildlife published by the Natural Heritage and Endangered Species Program (NHESP)? To view habitat maps, see the *Massachusetts Natural Heritage Atlas* or go to http://maps.massgis.state.ma.us/PRI_EST_HAB/viewer.htm.

   a. ☐ Yes ☒ No

   If yes, include proof of mailing or hand delivery of NOI to:

   Natural Heritage and Endangered Species Program
   Division of Fisheries and Wildlife
   1 Rabbit Hill Road
   Westborough, MA 01581

   2017
   b. Date of map

   If *yes*, the project is also subject to Massachusetts Endangered Species Act (MESA) review (321 CMR 10.18). To qualify for a streamlined, 30-day, MESA/Wetlands Protection Act review, please complete Section C.1.c, and include requested materials with this Notice of Intent (NOI); *OR* complete Section C.2.f, if applicable. *If MESA supplemental information is not included with the NOI, by completing Section 1 of this form, the NHESP will require a separate MESA filing which may take up to 90 days to review (unless noted exceptions in Section 2 apply, see below).*

   c. Submit Supplemental Information for Endangered Species Review*

      1. ☐ Percentage/acreage of property to be altered:

         (a) within wetland Resource Area _____ percentage/acreage

         (b) outside Resource Area _____ percentage/acreage

      2. ☐ Assessor's Map or right-of-way plan of site

2. ☐ Project plans for entire project site, including wetland resource areas and areas outside of wetlands jurisdiction, showing existing and proposed conditions, existing and proposed tree/vegetation clearing line, and clearly demarcated limits of work **

   (a) ☐ Project description (including description of impacts outside of wetland resource area & buffer zone)

   (b) ☐ Photographs representative of the site

* Some projects **not** in Estimated Habitat may be located in Priority Habitat, and require NHESP review (see http://www.mass.gov/eea/agencies/dfg/dfw/natural-heritage/regulatory-review/). Priority Habitat includes habitat for state-listed plants and strictly upland species not protected by the Wetlands Protection Act.

** MESA projects may not be segmented (321 CMR 10.16). The applicant must disclose full development plans even if such plans are not required as part of the Notice of Intent process.

C. Other Applicable Standards and Requirements (cont'd)

(c) ☐ MESA filing fee (fee information available at http://www.mass.gov/dfwele/dfw/nhesp/regulatory_review/mesa/mesa_fee_schedule.htm). Make check payable to "Commonwealth of Massachusetts - NHESP" and ***mail to NHESP*** at above address

*Projects altering **10 or more acres** of land, also submit:*

(d) ☐ Vegetation cover type map of site

(e) ☐ Project plans showing Priority & Estimated Habitat boundaries

(f) OR Check One of the Following

1. ☐ Project is exempt from MESA review.
Attach applicant letter indicating which MESA exemption applies. (See 321 CMR 10.14, http://www.mass.gov/dfwele/dfw/nhesp/regulatory_review/mesa/mesa_exemptions.htm; the NOI must still be sent to NHESP if the project is within estimated habitat pursuant to 310 CMR 10.37 and 10.59.)

2. ☐ Separate MESA review ongoing.
a. NHESP Tracking # _____ b. Date submitted to NHESP _____

3. ☐ Separate MESA review completed.
Include copy of NHESP "no Take" determination or valid Conservation & Management Permit with approved plan.

3. For coastal projects only, is any portion of the proposed project located below the mean high water line or in a fish run?

a. ☒ Not applicable – project is in inland resource area only b. ☐ Yes ☐ No

If yes, include proof of mailing, hand delivery, or electronic delivery of NOI to either:

South Shore - Cohasset to Rhode Island border, and the Cape & Islands:

Division of Marine Fisheries -
Southeast Marine Fisheries Station
Attn: Environmental Reviewer
836 South Rodney French Blvd.
New Bedford, MA 02744
Email: DMF.EnvReview-South@state.ma.us

North Shore - Hull to New Hampshire border:

Division of Marine Fisheries -
North Shore Office
Attn: Environmental Reviewer
30 Emerson Avenue
Gloucester, MA 01930
Email: DMF.EnvReview-North@state.ma.us

Also if yes, the project may require a Chapter 91 license. For coastal towns in the Northeast Region, please contact MassDEP's Boston Office. For coastal towns in the Southeast Region, please contact MassDEP's Southeast Regional Office.

Massachusetts Department of Environmental Protection

C. Other Applicable Standards and Requirements (cont'd)

Online Users: Include your document transaction number (provided on your receipt page) with all supplementary information you submit to the Department.

4. Is any portion of the proposed project within an Area of Critical Environmental Concern (ACEC)?

   a. ☐ Yes ☒ No If yes, provide name of ACEC (see instructions to WPA Form 3 or MassDEP Website for ACEC locations). **Note:** electronic filers click on Website.

   b. ACEC

5. Is any portion of the proposed project within an area designated as an Outstanding Resource Water (ORW) as designated in the Massachusetts Surface Water Quality Standards, 314 CMR 4.00?

   a. ☐ Yes ☒ No

6. Is any portion of the site subject to a Wetlands Restriction Order under the Inland Wetlands Restriction Act (M.G.L. c. 131, § 40A) or the Coastal Wetlands Restriction Act (M.G.L. c. 130, § 105)?

   a. ☐ Yes ☒ No

7. Is this project subject to provisions of the MassDEP Stormwater Management Standards?

   a. ☒ Yes. Attach a copy of the Stormwater Report as required by the Stormwater Management Standards per 310 CMR 10.05(6)(k)-(q) and check if:

      1. ☐ Applying for Low Impact Development (LID) site design credits (as described in Stormwater Management Handbook Vol. 2, Chapter 3)

      2. ☒ A portion of the site constitutes redevelopment

      3. ☒ Proprietary BMPs are included in the Stormwater Management System.

   b. ☐ No. Check why the project is exempt:

      1. ☐ Single-family house

      2. ☐ Emergency road repair

      3. ☐ Small Residential Subdivision (less than or equal to 4 single-family houses or less than or equal to 4 units in multi-family housing project) with no discharge to Critical Areas.

D. Additional Information

☐ This is a proposal for an Ecological Restoration Limited Project. Skip Section D and complete Appendix A: Ecological Restoration Notice of Intent – Minimum Required Documents (310 CMR 10.12).

Applicants must include the following with this Notice of Intent (NOI). See instructions for details.

Online Users: Attach the document transaction number (provided on your receipt page) for any of the following information you submit to the Department.

1. ☒ USGS or other map of the area (along with a narrative description, if necessary) containing sufficient information for the Conservation Commission and the Department to locate the site. (Electronic filers may omit this item.)

2. ☒ Plans identifying the location of proposed activities (including activities proposed to serve as a Bordering Vegetated Wetland [BVW] replication area or other mitigating measure) relative to the boundaries of each affected resource area.

F. Signatures and Submittal Requirements

I hereby certify under the penalties of perjury that the foregoing Notice of Intent and accompanying plans, documents, and supporting data are true and complete to the best of my knowledge. I understand that the Conservation Commission will place notification of this Notice in a local newspaper at the expense of the applicant in accordance with the wetlands regulations, 310 CMR 10.05(5)(a).

I further certify under penalties of perjury that all abutters were notified of this application, pursuant to the requirements of M.G.L. c. 131, § 40. Notice must be made by Certificate of Mailing or in writing by hand delivery or certified mail (return receipt requested) to all abutters within 100 feet of the property line of the project location.

P.O.A. Rte 85 Realty Corp. — 1. Signature of Applicant (John Nenart, Rte 85 Realty Corp)

9-23-20 — 2. Date

3. Signature of Property Owner (if different)

4. Date

5. Signature of Representative (Scott Goddard, Goddard Consulting, LLC)

9/23/20 — 6. Date

For Conservation Commission:
Two copies of the completed Notice of Intent (Form 3), including supporting plans and documents, two copies of the NOI Wetland Fee Transmittal Form, and the city/town fee payment, to the Conservation Commission by certified mail or hand delivery.

For MassDEP:
One copy of the completed Notice of Intent (Form 3), including supporting plans and documents, one copy of the NOI Wetland Fee Transmittal Form, and a **copy** of the state fee payment to the MassDEP Regional Office (see Instructions) by certified mail or hand delivery.

Other:
If the applicant has checked the "yes" box in any part of Section C, Item 3, above, refer to that section and the Instructions for additional submittal requirements.

The original and copies must be sent simultaneously. Failure by the applicant to send copies in a timely manner may result in dismissal of the Notice of Intent.

B. Fees

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Fee should be calculated using the following process & worksheet. ***Please see Instructions before filling out worksheet.***

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

Step 6/Fee Payments: To calculate the state share of the fee, divide the total fee in half and subtract $12.50. To calculate the city/town share of the fee, divide the total fee in half and add $12.50.

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands

AFFIDAVIT OF SERVICE

Under the Massachusetts Wetlands Protection Act

(to be submitted to the Massachusetts Department of Environmental Protection and the Conservation Commission)

I, Mitch Maslanka hereby certify under the pains and penalties of perjury that on 10-8-2020 I gave notification to abutters in Compliance with the second paragraph of Massachusetts General Law Chapter 131, Section 40, and the DEP Guide to Abutter Notification dating April 8, 1994 in connection with the following matter:

A Notice Of Intent was filed under the Massachusetts Wetlands Protection Act by John Nenart of RTE 85 Realty Corp. with the Milford Conservation Commission on 10-7-2020 for property located at 26 Beaver Street, (Map 44, Parcels 25, 23C, 23B) in Milford, MA for the construction of a parking lot within the 100-foot Buffer Zone to Bordering Vegetated Wetlands.

The form of the notification, and the list of abutters to whom it was given, and their addresses, are attached to this Affidavit of Service.

Mitch Maslanka
(Name)

10-6-2020
(Date)

Notification to Abutters Under the Massachusetts Wetlands Protection Act

In accordance with the Massachusetts General Laws Chapter 131, Section 40 (the Wetlands Protection Act) you are hereby notified of the following:

1. The applicant's name is John Nenart of RTE 85 Realty Corp.
2. The applicant has filed the following application with the Milford Conservation Commission
   - ☒ A Notice of Intent, seeking permission to alter an area that is subject to protection under the Wetlands Protection Act.
   - ☐ A request to amend an existing Order of Conditions.
   - ☐ A Notice of Resource Area Delineation, seeking to determine the extent of areas subject to protection under the Wetlands Protection Act and/or Bylaw.
3. The address or location of the site where the activity is proposed is: 26 Beaver Street, (map 44, lots 25, 23C, 23B).
4. The proposed activity is construction of a parking lot and storm drainage within the 100-foot buffer zone to Bordering Vegetated Wetlands.
5. Copies of the above application may be examined at the Milford Conservation Commission's office, located in the Town Hall, 52 Main St, Milford, MA. Copies may be obtained at the office for a fee or from the applicant's representative; Goddard Consulting LLC at 1-508-393-3784.
6. Information regarding the date, time, and place of the public hearing may be obtained:
   a. by calling the Milford Conservation Commission
   b. from the applicant's representative; Goddard Consulting LLC at 1-508-393-3784.

PLEASE NOTE:

1. Notice of the public hearing including its date, time, and place will be published at least five business days in advance in the local newspaper and will be posted in the Town Hall not less than 48 hours in advance.
2. For more information about this application, the Wetlands Protection Act, or Notice of Intent Process, please contact the Conservation Commission or the Massachusetts Department of Environmental Protection (DEP) Central Office, 8 New Bond Street, Worcester, MA 01606

Re: Wetland Border Report and Riverfront Analysis
Beaver St. Milford

Dear 85 Realty Corp:

On April 7, 2020 during no snow and un-frozen ground conditions the wetland resources were delineated on land located at the above referenced site (refer to enclosed locus maps). The wetland border was flagged using the criteria in the most recent edition of MA Wetland Protection Act (WPA) and Regulations 310 CMR 10.00 et al. Hydric soil indicators, vegetation changes, hydrological indicators, and topography were all considered for delineation purposes.

One Bordering Vegetated Wetland and one potentially isolated wetland were delineated in the field. The potentially isolated wetland was flagged with series A1-18. This area is located within a maintained grass area near Medway Street and is vegetated with sedges, rushes and steeplebush (all wetland species). During the site inspection this wetland had indicators of hydrology such as standing water (1-inch of water), stained leaves and hydric soils. No physical connection (via land, water or culvert) to the adjacent Bordering Vegetated Wetland (BVW) was observed and therefore is considered isolated.

The BVW located on site was flagged with series GC1-128. This wetland is dominant in red maple, buckthorn, winterberry, arrow-wood, spicebush, sweet pepperbush, high bush blueberry, poison ivy and wetland ferns. The adjacent forested upland is dominant in oak, white pine, rose, honeysuckle, black birch, witch hazel, Canada Mayflower and princess pine. Department of Environmental Protection BVW field data forms were documented at wetland flag # GC-58 and B6 (see attached forms). An upland island was delineated out of the "GC" wetland with series B1-35. This upland area is dominant in white pine, oak, birch and witch hazel.

According to the current USGS map (see Figure 1 and 2) a mapped perennial stream is located in the northern and eastern sections of the site. The most northern section of this stream channel, near Medway Street within a maintained lawn area, appears to be man-made and hand dug due to its linear orientation and consistency in channel depth, height and elevation. Today this dug channel connects to a flooded swamp in the eastern section of the site, west of Route 495.

The attached historic USGS Maps and Aerial Photographs enclosed in this report indicate that the on-site river shown on the most recent USGS map was manipulated during and after the construction of Route 495. As shown in the attached figures, no river was present in the eastern portion of the site in 1942 and/or 1953. It was not until after the construction of Route 495 in the

late 60's that the water associated with this historical river was re-directed onto the site under Route 495. It is after the construction of Route 495 that a perennial river is mapped on the USGS maps (see figures 3-7).

Furthermore, according to 310CMR10.58(2)(g) "Human-made canals and mosquito ditches associated with coastal rivers do not have riverfront areas." As stated earlier in this report the northern channel on site appears to be man-made. Since this northern portion of the channel is human-made and the eastern channel is a direct, man-made result of the construction of Route 495 (as proven above with historic USGS maps) the streams on site should not be considered natural and/or perennial and would not have a 200-ft Riverfront Area associated with them. To further support this, a stream stats analysis was performed for the northern section of the stream and the eastern section of the stream (see attached). The results calculated show that the northern section of the stream has a watershed of 0.38 acers with a 0.007 cubic feet predicted flow rate at the 99% flow duration. The eastern section of the stream has a 0.40 acer watershed with a 0.008 cubic feet predicted flow rate at the 99% flow duration. These measurements are below the required .50 acer watershed and 0.01 cubic flow rate identified in the regulations for perennial streams in section 310CMR10.58(2)1(C).

According to the Mass GIS data layers for NHESP, this site is not located within Estimated and/or Priority Habitat of Rare Wildlife and has no mapped potential or certified vernal pools. The site is not located in an ACEC; however, is located in a Zone II area and a jurisdictional FEMA Flood Zone; so that the resource area Bordering Land Subject to Flooding (BLSF) is located from the delineated wetland line up to the 100-year FEMA flood elevation.

The Wetlands Protection Act takes jurisdiction over BVW and BLSF resources; but does not take jurisdiction over isolated wetlands unless they qualify as the resource area Isolated Land Subject to Flooding (which is an area able to hold ¼ acer foot of water with a minimum depth of 6-inches). The isolated wetland on site is small and shallow and cannot hold ¼ acre foot of water and therefore; is not jurisdictional. In addition, the BVW resource area has a jurisdictional 100-foot Buffer Zone. In comparison, the BLSF resource area does not have a buffer zone. Any work within any resource area and/or the 100-foot BVW buffer zone requires a Request for Determination (RDA) or Notice of Intent (NOI) be filed with the Conservation Commission.

Very truly yours,

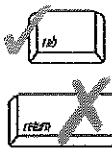
Checklist for Stormwater Report

A. Introduction

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.



A Stormwater Report must be submitted with the Notice of Intent permit application to document compliance with the Stormwater Management Standards. The following checklist is NOT a substitute for the Stormwater Report (which should provide more substantive and detailed information) but is offered here as a tool to help the applicant organize their Stormwater Management documentation for their Report and for the reviewer to assess this information in a consistent format. As noted in the Checklist, the Stormwater Report must contain the engineering computations and supporting information set forth in Volume 3 of the Massachusetts Stormwater Handbook. The Stormwater Report must be prepared and certified by a Registered Professional Engineer (RPE) licensed in the Commonwealth.

The Stormwater Report must include:

- The Stormwater Checklist completed and stamped by a Registered Professional Engineer (see page 2) that certifies that the Stormwater Report contains all required submittals.[1] This Checklist is to be used as the cover for the completed Stormwater Report.
- Applicant/Project Name
- Project Address
- Name of Firm and Registered Professional Engineer that prepared the Report
- Long-Term Pollution Prevention Plan required by Standards 4-6
- Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan required by Standard 8[2]
- Operation and Maintenance Plan required by Standard 9

In addition to all plans and supporting information, the Stormwater Report must include a brief narrative describing stormwater management practices, including environmentally sensitive site design and LID techniques, along with a diagram depicting runoff through the proposed BMP treatment train. Plans are required to show existing and proposed conditions, identify all wetland resource areas, NRCS soil types, critical areas, Land Uses with Higher Potential Pollutant Loads (LUHPPL), and any areas on the site where infiltration rate is greater than 2.4 inches per hour. The Plans shall identify the drainage areas for both existing and proposed conditions at a scale that enables verification of supporting calculations.

As noted in the Checklist, the Stormwater Management Report shall document compliance with each of the Stormwater Management Standards as provided in the Massachusetts Stormwater Handbook. The soils evaluation and calculations shall be done using the methodologies set forth in Volume 3 of the Massachusetts Stormwater Handbook.

To ensure that the Stormwater Report is complete, applicants are required to fill in the Stormwater Report Checklist by checking the box to indicate that the specified information has been included in the Stormwater Report. If any of the information specified in the checklist has not been submitted, the applicant must provide an explanation. The completed Stormwater Report Checklist and Certification must be submitted with the Stormwater Report.

---

[1] The Stormwater Report may also include the Illicit Discharge Compliance Statement required by Standard 10. If not included in the Stormwater Report, the Illicit Discharge Compliance Statement must be submitted prior to the discharge of stormwater runoff to the post-construction best management practices.

[2] For some complex projects, it may not be possible to include the Construction Period Erosion and Sedimentation Control Plan in the Stormwater Report. In that event, the issuing authority has the discretion to issue an Order of Conditions that approves the project and includes a condition requiring the proponent to submit the Construction Period Erosion and Sedimentation Control Plan before commencing any land disturbance activity on the site.

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands Program

Checklist for Stormwater Report

B. Stormwater Checklist and Certification

The following checklist is intended to serve as a guide for applicants as to the elements that ordinarily need to be addressed in a complete Stormwater Report. The checklist is also intended to provide conservation commissions and other reviewing authorities with a summary of the components necessary for a comprehensive Stormwater Report that addresses the ten Stormwater Standards.

Note: Because stormwater requirements vary from project to project, it is possible that a complete Stormwater Report may not include information on some of the subjects specified in the Checklist. If it is determined that a specific item does not apply to the project under review, please note that the item is not applicable (N.A.) and provide the reasons for that determination.

A complete checklist must include the Certification set forth below signed by the Registered Professional Engineer who prepared the Stormwater Report.

Registered Professional Engineer's Certification

I have reviewed the Stormwater Report, including the soil evaluation, computations, Long-term Pollution Prevention Plan, the Construction Period Erosion and Sedimentation Control Plan (if included), the Long-term Post-Construction Operation and Maintenance Plan, the Illicit Discharge Compliance Statement (if included) and the plans showing the stormwater management system, and have determined that they have been prepared in accordance with the requirements of the Stormwater Management Standards as further elaborated by the Massachusetts Stormwater Handbook. I have also determined that the information presented in the Stormwater Checklist is accurate and that the information presented in the Stormwater Report accurately reflects conditions at the site as of the date of this permit application.

Registered Professional Engineer Block and Signature

Signature and Date

Checklist

Project Type: Is the application for new development, redevelopment, or a mix of new and redevelopment?

☒ New development

☐ Redevelopment

☐ Mix of New Development and Redevelopment

Checklist for Stormwater Report

Checklist (continued)

LID Measures: Stormwater Standards require LID measures to be considered. Document what environmentally sensitive design and LID Techniques were considered during the planning and design of the project:

- ☐ No disturbance to any Wetland Resource Areas
- ☐ Site Design Practices (e.g. clustered development, reduced frontage setbacks)
- ☐ Reduced Impervious Area (Redevelopment Only)
- ☐ Minimizing disturbance to existing trees and shrubs
- ☐ LID Site Design Credit Requested:
  - ☐ Credit 1
  - ☐ Credit 2
  - ☐ Credit 3
- ☐ Use of "country drainage" versus curb and gutter conveyance and pipe
- ☐ Bioretention Cells (includes Rain Gardens)
- ☐ Constructed Stormwater Wetlands (includes Gravel Wetlands designs)
- ☐ Treebox Filter
- ☐ Water Quality Swale
- ☐ Grass Channel
- ☐ Green Roof
- ☐ Other (describe): _____

Standard 1: No New Untreated Discharges

- ☒ No new untreated discharges
- ☒ Outlets have been designed so there is no erosion or scour to wetlands and waters of the Commonwealth
- ☐ Supporting calculations specified in Volume 3 of the Massachusetts Stormwater Handbook included.

Checklist for Stormwater Report

Checklist (continued)

Standard 2: Peak Rate Attenuation

☐ Standard 2 waiver requested because the project is located in land subject to coastal storm flowage and stormwater discharge is to a wetland subject to coastal flooding.

☐ Evaluation provided to determine whether off-site flooding increases during the 100-year 24-hour storm.

☒ Calculations provided to show that post-development peak discharge rates do not exceed pre-development rates for the 2-year and 10-year 24-hour storms. If evaluation shows that off-site flooding increases during the 100-year 24-hour storm, calculations are also provided to show that post-development peak discharge rates do not exceed pre-development rates for the 100-year 24-hour storm.

Standard 3: Recharge

☒ Soil Analysis provided.

☒ Required Recharge Volume calculation provided.

☐ Required Recharge volume reduced through use of the LID site Design Credits.

☒ Sizing the infiltration, BMPs is based on the following method: Check the method used.

☒ Static ☐ Simple Dynamic ☐ Dynamic Field[1]

☒ Runoff from all impervious areas at the site discharging to the infiltration BMP.

☐ Runoff from all impervious areas at the site is *not* discharging to the infiltration BMP and calculations are provided showing that the drainage area contributing runoff to the infiltration BMPs is sufficient to generate the required recharge volume.

☒ Recharge BMPs have been sized to infiltrate the Required Recharge Volume.

☐ Recharge BMPs have been sized to infiltrate the Required Recharge Volume *only* to the maximum extent practicable for the following reason:

- ☐ Site is comprised solely of C and D soils and/or bedrock at the land surface
- ☐ M.G.L. c. 21E sites pursuant to 310 CMR 40.0000
- ☐ Solid Waste Landfill pursuant to 310 CMR 19.000
- ☐ Project is otherwise subject to Stormwater Management Standards only to the maximum extent practicable.

☒ Calculations showing that the infiltration BMPs will drain in 72 hours are provided.

☐ Property includes a M.G.L. c. 21E site or a solid waste landfill and a mounding analysis is included.

[1] 80% TSS removal is required prior to discharge to infiltration BMP if Dynamic Field method is used.

Checklist for Stormwater Report

Checklist (continued)

Standard 3: Recharge (continued)

☐ The infiltration BMP is used to attenuate peak flows during storms greater than or equal to the 10-year 24-hour storm and separation to seasonal high groundwater is less than 4 feet and a mounding analysis is provided.

☐ Documentation is provided showing that infiltration BMPs do not adversely impact nearby wetland resource areas.

Standard 4: Water Quality

The Long-Term Pollution Prevention Plan typically includes the following:

- Good housekeeping practices;
- Provisions for storing materials and waste products inside or under cover;
- Vehicle washing controls;
- Requirements for routine inspections and maintenance of stormwater BMPs;
- Spill prevention and response plans;
- Provisions for maintenance of lawns, gardens, and other landscaped areas;
- Requirements for storage and use of fertilizers, herbicides, and pesticides;
- Pet waste management provisions;
- Provisions for operation and management of septic systems;
- Provisions for solid waste management;
- Snow disposal and plowing plans relative to Wetland Resource Areas;
- Winter Road Salt and/or Sand Use and Storage restrictions;
- Street sweeping schedules;
- Provisions for prevention of illicit discharges to the stormwater management system;
- Documentation that Stormwater BMPs are designed to provide for shutdown and containment in the event of a spill or discharges to or near critical areas or from LUHPPL;
- Training for staff or personnel involved with implementing Long-Term Pollution Prevention Plan;
- List of Emergency contacts for implementing Long-Term Pollution Prevention Plan.

☒ A Long-Term Pollution Prevention Plan is attached to Stormwater Report and is included as an attachment to the Wetlands Notice of Intent.

☐ Treatment BMPs subject to the 44% TSS removal pretreatment requirement and the one inch rule for calculating the water quality volume are included, and discharge:

- ☐ is within the Zone II or Interim Wellhead Protection Area
- ☐ is near or to other critical areas
- ☐ is within soils with a rapid infiltration rate (greater than 2.4 inches per hour)
- ☐ involves runoff from land uses with higher potential pollutant loads.

☐ The Required Water Quality Volume is reduced through use of the LID site Design Credits.

☒ Calculations documenting that the treatment train meets the 80% TSS removal requirement and, if applicable, the 44% TSS removal pretreatment requirement, are provided.

Checklist for Stormwater Report

Checklist (continued)

Standard 4: Water Quality (continued)

☒ The BMP is sized (and calculations provided) based on:

- ☒ The ½" or 1" Water Quality Volume or
- ☐ The equivalent flow rate associated with the Water Quality Volume and documentation is provided showing that the BMP treats the required water quality volume.

☐ The applicant proposes to use proprietary BMPs, and documentation supporting use of proprietary BMP and proposed TSS removal rate is provided. This documentation may be in the form of the propriety BMP checklist found in Volume 2, Chapter 4 of the Massachusetts Stormwater Handbook and submitting copies of the TARP Report, STEP Report, and/or other third party studies verifying performance of the proprietary BMPs.

☐ A TMDL exists that indicates a need to reduce pollutants other than TSS and documentation showing that the BMPs selected are consistent with the TMDL is provided.

Standard 5: Land Uses With Higher Potential Pollutant Loads (LUHPPLs)

☐ The NPDES Multi-Sector General Permit covers the land use and the Stormwater Pollution Prevention Plan (SWPPP) has been included with the Stormwater Report.

☒ The NPDES Multi-Sector General Permit covers the land use and the SWPPP will be submitted ***prior to*** the discharge of stormwater to the post-construction stormwater BMPs.

☐ The NPDES Multi-Sector General Permit does ***not*** cover the land use.

☐ LUHPPLs are located at the site and industry specific source control and pollution prevention measures have been proposed to reduce or eliminate the exposure of LUHPPLs to rain, snow, snow melt and runoff, and been included in the long term Pollution Prevention Plan.

☐ All exposure has been eliminated.

☐ All exposure has ***not*** been eliminated and all BMPs selected are on MassDEP LUHPPL list.

☒ The LUHPPL has the potential to generate runoff with moderate to higher concentrations of oil and grease (e.g. all parking lots with >1000 vehicle trips per day) and the treatment train includes an oil grit separator, a filtering bioretention area, a sand filter or equivalent.

Standard 6: Critical Areas

☐ The discharge is near or to a critical area and the treatment train includes only BMPs that MassDEP has approved for stormwater discharges to or near that particular class of critical area.

☐ Critical areas and BMPs are identified in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 7: Redevelopments and Other Projects Subject to the Standards only to the maximum extent practicable

☐ The project is subject to the Stormwater Management Standards only to the maximum Extent Practicable as a:

- ☐ Limited Project
- ☐ Small Residential Projects: 5-9 single family houses or 5-9 units in a multi-family development provided there is no discharge that may potentially affect a critical area.
- ☐ Small Residential Projects: 2-4 single family houses or 2-4 units in a multi-family development with a discharge to a critical area
- ☐ Marina and/or boatyard provided the hull painting, service and maintenance areas are protected from exposure to rain, snow, snow melt and runoff
- ☐ Bike Path and/or Foot Path
- ☐ Redevelopment Project
- ☐ Redevelopment portion of mix of new and redevelopment.

☐ Certain standards are not fully met (Standard No. 1, 8, 9, and 10 must always be fully met) and an explanation of why these standards are not met is contained in the Stormwater Report.

☐ The project involves redevelopment and a description of all measures that have been taken to improve existing conditions is provided in the Stormwater Report. The redevelopment checklist found in Volume 2 Chapter 3 of the Massachusetts Stormwater Handbook may be used to document that the proposed stormwater management system (a) complies with Standards 2, 3 and the pretreatment and structural BMP requirements of Standards 4-6 to the maximum extent practicable and (b) improves existing conditions.

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control

A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan must include the following information:

- Narrative;
- Construction Period Operation and Maintenance Plan;
- Names of Persons or Entity Responsible for Plan Compliance;
- Construction Period Pollution Prevention Measures;
- Erosion and Sedimentation Control Plan Drawings;
- Detail drawings and specifications for erosion control BMPs, including sizing calculations;
- Vegetation Planning;
- Site Development Plan;
- Construction Sequencing Plan;
- Sequencing of Erosion and Sedimentation Controls;
- Operation and Maintenance of Erosion and Sedimentation Controls;
- Inspection Schedule;
- Maintenance Schedule;
- Inspection and Maintenance Log Form.

☒ A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan containing the information set forth above has been included in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control (continued)

☐ The project is highly complex and information is included in the Stormwater Report that explains why it is not possible to submit the Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan with the application. A Construction Period Pollution Prevention and Erosion and Sedimentation Control has ***not*** been included in the Stormwater Report but will be submitted ***before*** land disturbance begins.

☐ The project is ***not*** covered by a NPDES Construction General Permit.

☐ The project is covered by a NPDES Construction General Permit and a copy of the SWPPP is in the Stormwater Report.

☒ The project is covered by a NPDES Construction General Permit but no SWPPP been submitted. The SWPPP will be submitted BEFORE land disturbance begins.

Standard 9: Operation and Maintenance Plan

☒ The Post Construction Operation and Maintenance Plan is included in the Stormwater Report and includes the following information:

- ☒ Name of the stormwater management system owners;
- ☒ Party responsible for operation and maintenance;
- ☒ Schedule for implementation of routine and non-routine maintenance tasks;
- ☐ Plan showing the location of all stormwater BMPs maintenance access areas;
- ☐ Description and delineation of public safety features;
- ☐ Estimated operation and maintenance budget; and
- ☒ Operation and Maintenance Log Form.

☐ The responsible party is ***not*** the owner of the parcel where the BMP is located and the Stormwater Report includes the following submissions:

- ☐ A copy of the legal instrument (deed, homeowner's association, utility trust or other legal entity) that establishes the terms of and legal responsibility for the operation and maintenance of the project site stormwater BMPs;
- ☐ A plan and easement deed that allows site access for the legal entity to operate and maintain BMP functions.

Standard 10: Prohibition of Illicit Discharges

☒ The Long-Term Pollution Prevention Plan includes measures to prevent illicit discharges;

☒ An Illicit Discharge Compliance Statement is attached;

☐ NO Illicit Discharge Compliance Statement is attached but will be submitted ***prior to*** the discharge of any stormwater to post-construction BMPs.

SITE LOCATION & DESCRIPTION

This report was prepared on behalf of the property owner Route 85 Realty Corp. The project site is located on the east side of Beaver Street near its intersection with Route 109 in Milford, MA. The property is approximately 5.65 acres that is bordered on the west by Beaver Street, on the south by Town of Milford property, on the east by Route 495 and to the north, by Route 109. The site contains an existing abandoned residential dwelling surrounded by grassed areas, and the discontinued Old Beaver Street.

PROJECT DESCRIPTION

The owner is proposing to construct a Transportation Terminal for the purpose of parking 430 vans for the purpose of daily use for deliveries from the Amazon Facility on Industrial Road. The project consists of the development of approximately 3.42 acres of the site as paved parking, stormwater structures and lighting for the parking lot.

DESCRIPTION OF EXISTING DRAINAGE

The runoff from the site currently flows overland to the large wetlands area to the south.

DESCRIPTION OF PROPOSED DRAINAGE FACILITIES

The runoff generated from the proposed development with be collected in a catch basin to drain manhole system, using HDPE pipe. A proposed 414-unit StormTech Chamber detention system will be constructed to attenuate the peak flows for the 2, 10, and 100-year storm events. Static recharge for the site will be provided in the area below the structure outlet invert. T.S.S. removal will occur within the hydrodynamic separator prior to discharged to the infiltration basin.

This report documents design compliance with the applicable sections of the Massachusetts Stormwater Management Standards 1-10.

Stormwater Design Parameter:

The stormwater management system was designed to control the post-development rate of peak rainfall runoff from the site by keeping it below the post-development peak rate of rainfall runoff as stated as the objective in the Massachusetts Stormwater Handbook. These calculations were performed using the HydroCAD hydraulic program, developed by applied Microcomputer System. The HydroCAD software is based upon the Soil Conservation Service, "Technical Release 55 – Urban Hydrology for Small Watersheds" and is generally accepted industry methodology.

The analysis was performed for the 2-year, 10-year, and 100-year 24-hour storm events.

The following data was required for input:

- Watershed Area: Areas of each watershed were calculated and expressed in square feet for these calculations.
- SCS Curve Number (Cn): Based on the cover type and hydrologic soil group, a weighted curve number (CN) was determined for each of the existing watersheds utilizing Table 2-2a- *Runoff Curve Numbers For Urban Areas* and *Worksheet 2, Runoff Curve Number and Runoff* from the Soil Conservation Service Technical Release 55 – Urban Hydrology for Small Watersheds.
- Time of Concentration, Tc (Minutes): The time of concentration for each watershed was determined by finding the time necessary for runoff to travel from the hydraulically most distant point in the watershed to the point of concentration. For the proposed conditions the minimum time of 6 minutes was used for runoff to reach the most distant catch basin.
- SCS 24-Hour Storm Type: For the greater New England region, a Type III storm rainfall distribution is recommended for drainage calculations and was used for this project.
- Rainfall Precipitation: Rainfall precipitations used the HydroCad TP-40-Rain for Worcester County for the 2, 10, and 100-year storm events and are as follows:

2-year storm event:	3.2 inches
10-year storm event:	4.7 inches
100-year storm event:	6.8 inches

An on-site conventional storm drainage collection system is designed based on the "Rational Method" using Manning's equation to carry a minimum 25-year storm event without surcharge (See Pipe Sizing Attachments). The proposed drainage pipes will be High Density Polyethylene Pipe.

Standard 1: No new stormwater conveyances (e.g. outfalls) may discharge untreated stormwater directly to or cause erosion in wetlands or waters of the Commonwealth.

All Paved area runoff will sheet flow across the pavement areas, accumulate into hooded catch basins, connect with drain pipe to a hydrodynamic separator, which discharges to the StormTech detention structure. The outlet pipe will discharge to an armored riprap slope to prevent erosion. No new untreated stormwater discharges are proposed.

Standard 2: Stormwater management systems shall be designed so that the post-development peak discharge rates do not exceed pre-development peak discharge rates.

To meet Standard 2, the post-development peak discharge rate must be equal to or less than pre-development rates to prevent storm damage and downstream and offsite flooding from the 2-year thru and 100-year 24-hour storm events.

Peak discharge rates were calculated and evaluated at the same locations – at the wetland system, on the easterly side of the development.

In summary of the attached drainage analysis (HydroCAD), the peak discharge rates leaving the point of evalnation in cubic feet per second (cfs) are as follows;

	Run off		
Storm Events	Pre (cfs)	Post (cfs)	Change (cfs)
2-year	0.72	0.01	-0.71
10-year	2.45	1.56	-0.83
100-year	6.37	6.13	-0.24

Standard 3: Loss of annual recharge to ground water shall be eliminated or minimized through the use of environmentally sensitive site design, low impact development techniques, stormwater best management practices, and good operation and maintenance. At a minimum, the annual recharge from the post- development site shall approximate the annual recharge from pre-development conditions based on soil type. This standard is met when the stormwater management system is designed to infiltrate the required recharge volume as determined in accordance with the Massachusetts Stormwater Handbook.

Hydrologic Group	Volume to Recharge x Total Impervious Area
A	**0.60 inches of runoff**
B	**0.35 inches of runoff**
C	0.25 inches of runoff
D	0.10 inches of runoff

The required volume of recharge for post-development conditions is calculated as follows;

Proposed Increase to Impervious Area: 3.42 acres (148,975 sf)

Required Recharge Volume

0.35" x 1' /12" x 74,488 sf = 2,173 cf (B soils)
0.60" x 1'/12" x 74,487 sf = 3,724 cf (A soils)
Total Recharge Volume = 5,897 cf.

StormTech
Total storage volume provided below overflow outlet invert @ 250.90= **23,292 cf**

Soils

Soils underlying the site are defined as map unit 260B Sudbury fine sandy loam, hydrologic group B for 50% of the site, and Merrimac fine sandy loam, hydrologic soil group A for 50% of the site. These determinations have been made based on Web Soil Survey USDA/NRCS Soil Map. The recharge under the StormTech Chambers infiltration design is based on a calculation of both the A and B soil types. Rawls Rates are 1.02 in/hr and 2.41 in/hr.

Calculations show that during a 100-year storm event, the StormTech System will completely dewater within approximately 17.5 hours (See Drawdown calculations in the appendix) which is in compliance with the maximum dewatering time of 72 hours.

Standard 4: Stormwater management systems shall be designed to remove 80% of the average annual post-construction load of Total Suspended Solids (TSS). This standard is met when:

- ***a) Suitable practices for source control and pollution prevention are identified in a long-term pollution prevention plan, and thereafter are implemented and maintained;***
- ***b) Structural stormwater best management practices are sized to capture the required water quality volume as determined in accordance with the Massachusetts Stormwater Handbook; and***
- ***c) Pretreatment is provided in accordance with the Massachusetts Stormwater Handbook.***

The Water Quality Volume requiring 80% TSS removal, is calculated as follows:

The required water quality volume is based on 1.0". The water quality volume equals 1.0 inches of runoff times the increased impervious area of the post-development site.

Proposed Impervious Area
Total Site Impervious Area = 148,975 sf
Impervious area to be treated = **148,975 sf**

Total volume to be treated:
1.0" x 1'/12" x 148,975 sf = **12,414 cf Water Quality Volume Required**

Provided Water Quality Volume:

All stormwater flows through the catch basins, hydrodynamic separators and infiltration structures with an infiltration volume of 23,292 cf.

See TSS Removal Calculations in Attachment Section.

Standard 4: requires the development and implementation of suitable practices for source control and pollution prevention. These measures must be identified in a long-term pollution prevention plan.

The long-term pollution prevention plan is incorporated into the Operation and Maintenance Plan required by Standard 9.

Standard 5: For land uses with higher potential pollutant loads, source control and pollution prevention shall be implemented in accordance with the Massachusetts Stormwater Handbook to eliminate or reduce the discharge of stormwater runoff from such land uses to the maximum extent practicable.

The proposed project is a use with higher potential pollutant loads.

Standard 6: Stormwater discharges within the Zone II or Interim Wellhead Protection Area of a public water supply and stormwater discharges near or to any other critical area require the use of the specific source control and pollution prevention measures and the specific structural stormwater best management practices determined by the Department to be suitable for managing discharges to such areas, as provided in the Massachusetts Stormwater Handbook.

The subject property does not discharge stormwater within the Zone II of a public water supply.

Standard 7: A redevelopment project is required to meet the following Stormwater Management Standards only to the maximum extent practicable:

This Site is not a redevelopment project.

Standard 8: A plan to control construction-related impacts, including erosion, sedimentation, and other pollutant sources during construction and land disturbance activities (construction period erosion, sedimentation, and pollution prevention plan) shall be developed and implemented.

During land disturbance and construction activities, project proponents must implement controls that prevent erosion, control sediment movement, and stabilize exposed soils to prevent pollutants from moving offsite or entering wetlands or waters. Land disturbance activities include demolition, construction, clearing, excavation, grading, filling, and reconstruction.

Construction Period Pollution Prevention Plan and Erosion and Sedimentation Control.
EPA NPDES – Storm Water Pollution Prevention Plan (SWPPP)

A. Names of Persons or Entities Responsible for Plan Compliance

John Nenart
Route 85 Realty Corp.
P.O. Box 444
Mendon, MA 01756
Tel : 508-422-1050
johnn@imperialcars.com

B. Construction Period Pollution Prevention Measures

1. Inventory materials to be present on-site during construction.
2. Train employees and subcontractors in prevention and clean up procedures.
3. All materials stored on site will be stored in their appropriate containers and if possible, under a roof or covered.
4. Follow manufacturer's recommendation for disposal of used containers.
5. Store only enough products on site to do the job.

6. On site equipment, fueling and maintenance measures:
   a. Inspect on-site vehicles and equipment daily for leaks.
   b. Conduct all vehicle and equipment maintenance and refueling in front of building, away from storm drains and Wetlands.
   c. Perform major repairs and maintenance off site.
   d. Use drip pans, drip cloths or absorbent pads when replacing spent fuels.
   e. Collect spent fuels and remove from site, per Local and State regulations.
   f. Maintain a clean construction entrance; install a crushed stone apron where truck traffic is frequent to reduce soil compaction constant sweeping is required and limit tracking of sediment into streets, sweeping street when silt is observed on street.
7. A temporary concrete washout station and equipment wash station shall be located on the site. Concrete washout station and equipment wash station shall not be within the 100' wetland buffer. Areas shall be surrounded with a silt fence to contain materials and provide ease of cleanup.
8. Stock pile materials, and maintain Erosion Control around the materials where it can easily be accessed. Maintain easy access to clean up materials to include brooms, mops, rags gloves, goggles, sand, sawdust, plastic and metal trash containers.
9. Clean up spills.
   a. Never hose down "dirty" pavement or impermeable surfaces where fluids have spilled. Use dry cleanup methods (sawdust, cat litter and/or rags and absorbent pads).
   b. Sweep up dry materials immediately. Never wash them away or bury them.
   c. Clean up spills on dirt areas by digging up and properly disposing of contaminated soil in a certified container and notify a certified hauler for removal.
   d. Report significant spills to the Fire Department.

10. It is the responsibility of the site superintendent or employees designated by the Applicant to inspect erosion control and repair as needed, also to inspect all on site vehicles for leaks and check all containers on site that may contain hazardous materials daily.

C. Site Development Plans
   1. See Site Plan set "495 Transportation Terminal II", Milford, Massachusetts" dated March 2, 2020, prepared by Guerriere & Halnon, Inc.

D. Construction Erosion and Sedimentation Control Plan;
   1. See Site Plan set "495 Transportation Terminal II, Milford, Massachusetts" dated , March 2, 2020 prepared by Guerriere & Halnon, Inc.

E. Plans
   1. Construction Sequencing Plan
      a. A NPDES NOI shall be filed with the EPA.
      b. Record Order of Conditions - The site superintendent shall be aware of all the Conditions contained within the Order including inspection schedules.
      c. Install DEP File # Sign.
      d. Prior to any work on the site including tree/brush clearing, the approved limit of clearing as well as the location of the proposed erosion control devices (such as silt fence/straw bales, etc.) must be staked on the ground under the direction of a Massachusetts registered Professional Land Surveyor.
      e. Install erosion control barrier at locations depicted on the plans.

f. Erosion control to be inspected by either the design engineer (or agent) or an erosion control monitor appointed by the Town of Milford, MA.
g. Erosion control devices shall be stored on the site to be used in case of an emergency (large storm).
h. Perform tree/brush removal.
i. Strip off top and subsoil. Stockpile material to be reused away from any drainage inlet or protected wetland areas, remove excess material from the site. Install and maintain erosion control barrier around stockpile.
j. Rough grade site, maintaining temporary low areas/sediment traps for sediment accumulation and away from the wetlands and prevent sedimentation from migrating from the site.
k. Construct detention basin, outlets/outfalls and install pipes, manholes and catch basins. Stabilize side slopes with loam, seed and mulch.
l. Install underground utilities; protect all open drainage structures with erosion/siltation control devices, and rope off any areas susceptible to heavy vehicle damage.
m. Prepare compacted parking lot base.
n. Loam and seed (mulch as required) disturbed areas of site other than immediately adjacent to the parking lot.
o. Install binder course of bituminous asphalt.
p. Install curbing and final pavement wearing course.
q. Finish grade - loam and seed and landscaping.
r. Maintain all erosion control devices until site is stabilized, final inspections are performed, and a Certificate of Compliance is issued by the Conservation Commission.
s. The Contractor shall be responsible to schedule any required inspections of his/her work.

2. Construction Waste Management Plan
   a. Dumpster for trash and bulk waste collection shall be provided separately for construction.
   b. Recycle materials whenever possible (paper, plaster cardboard, metal cans). Separate containers for material are recommended.
   c. Segregate and provide containers for disposal options for waste.
   d. Do not bury waste and debris on site.
   e. Certified haulers will be hired to remove the dumpster container waste as needed. Recycling products will also be removed off site weekly.

F. Operation and Maintenance of Erosion and Sedimentation Controls

The operation and maintenance of sedimentation control shall be the responsibility of the contractor. The inspection and maintenance of the storm water component shall be performed as noted below. The contractor shall, at all times have erosion control in place. The contractor, based on future weather reports shall prepare and inspect all erosion control devices; cleaning, repairing and upgrading is a priority so that the devices perform as per design. Inspect the site during rain events. **Don't stay away from the site.** At a minimum, there should be inspection to assure the devices are not clogged or plugged, or that devices have not been destroyed or damaged during the rain event. After a storm event inspection is required to clean and repair any damage components. Immediate repair is required.

G. Inspection and Maintenance Schedules

1. Inspection must be conducted at least once every 7 days and within 24 hours prior to and after the end of a storm event 0.5 inches or greater.
2. Inspection frequency can be reduced to once a month if:
   a. The site is temporarily stabilized.
   b. Runoff is unlikely due to winter conditions, when site is covered with snow or ice.
3. Inspections must be conducted by qualified personnel, "qualified personnel" means a person knowledgeable in the principles and practice of erosion and sediment controls and who possess the skills to assess the conditions and take measures to maintain and ensure proper operation, also to conclude if the erosion control methods selected are effective.
4. For each inspection, the inspection report must include:
   a. The inspection date.
   b. Names, titles of personnel making the inspection.
   c. Weather information for the period since the last inspection.
   d. Weather information at the time of the inspection.
   e. Locations of discharges of sediment from the site, if any.
   f. Locations of BMP's that need to be maintained.
   g. Locations where additional BMP's may be required.
   h. Corrective action required or any changes to the SWPPP that may be necessary.
5. Qualified personnel shall inspect the following in-place work;

Inspection Schedule:

Erosion Control	Weekly
Catch Basins	Weekly
Temporary Sedimentation Traps/Basins	Weekly

Please Note: Special inspections shall also be made after a significant rainfall event.

Maintenance Schedule

Erosion Control Devices Failure	Immediately
Temporary Sedimentation Traps/Basins	As needed

Please Note: Special maintenance shall also be made after a significant rainfall event.

H. Inspection and Maintenance Log Form.
   1. See Construction Phase Inspection and Maintenance Form attached

Standard 9: A Long –Term Operation and Maintenance (O&M) Plan shall be developed and implemented to ensure that storm water management systems function as designed.

The following shall serve as the (O&M) Plan required by Standard 9, as well as the Long-Term Pollution Prevention Plan required by Standard 4.

A. Names of Persons or Entities Responsible for Plan Compliance;

John Nenart
Route 85 Realty Corp.
P.O. Box 444
Mendon, MA 01756
Tel: 508-422-1050
Email: johnn@imperialcars.com

B. Good housekeeping practices
1. Maintain site, landscaping and vegetation.
2. Sweep and pick up litter on pavements and grounds.
3. Deliveries shall be monitored by owners or representative to ensure that if any spillage occurs, it shall be contained and cleaned up immediately.
4. Maintain pavement and curbing in good repair.

C. Requirements for routine inspections and maintenance of stormwater BMPs
1. Plans: The storm water Operation and Maintenance Plan shall consist of all Plans, documents and all local state and federal approvals as required for the subject property.
2. Record Keeping:
   a. Maintain a log of all operation and maintenance activities for at least three years following construction, including inspections, repairs, replacement and disposal (for disposal, the log shall indicate the type of material and the disposal location);

3. Descriptions and Designs: The Best Management Practices (BMP) incorporated into the design include the following;
   a. Deep sump catch basins with hoods installed to promote TSS Removal of solids and control floatable pollutants. This BMP has a design rate of 25% TSS Removal.
   b. Hydrodynamic Separator - installed to promote TSS Removal of solids. This BMP has a design rate of 50% TSS Removal.
   c. Infiltration Basin –has a design rate of 80% TSS Removal. Refer to TSS Removal Worksheet included in the Attachments.
   d. Spill Containment Kit to contain and clean-up spills that could occur on site.

4. BMP Maintenance: After construction it is the responsibility of the owner to perform maintenance. The cleaning of the components of the stormwater management system shall generally be as follows:
   a. Pavement: The owner shall keep the pavement swept with a mechanical sweeper or hand swept semi-annually at a minimum.
   b. Catch Basins: Shall be cleaned by excavating, pumping or vacuuming. The sediment shall be disposed of off-site by the Owner. Inspect quarterly, remove silt when ¼ full.
   c. Hydrodynamic Separator shall be cleaned by pumping. The sediment shall be disposed of off-site by the Owner. Inspect quarterly, remove silt when ¼ full.
   d. StormTech Chambers: Inspect for proper function after every major storm event during the first 3 months of operation, inspect/remove debris twice per year afterward.

5. Access Provisions: All of the components of the storm water system will be accessible by the Owner

D. Spill prevention and response plans
   1. Train employees and subcontractors in prevention and clean up procedures.
   2. All materials stored on site will be stored in their appropriate containers under a roof or in the approved underground storage tanks.
   3. Follow manufacturer's recommendation for disposal of used containers.
   4. On site equipment, fueling and maintenance measures:
      a. Inspect on-site vehicles and equipment daily for leaks.
      b. Conduct all vehicle and equipment maintenance off Site and refueling in one location, away from storm drains and wetlands.
   5. Clean up spills.
      a. Never hose down "dirty" pavement or impermeable surfaces where fluids have spilled. Use dry clean-up methods (sawdust, cat litter and/or rags and absorbent pads).
      b. Sweep up dry materials immediately. Never wash them away or bury them.
      c. Clean up spills on dirt areas by digging up and properly disposing of contaminated soil.
      d. Report significant spills to the Fire Department, Conservation Commission and Board of Health.

E. Provisions for maintenance of lawns, gardens, and other landscaped areas
Dispose of clippings outside of the 100-foot buffer zone to the adjacent wetland and away from storm drainage and use 0% phosphate fertilizer.

F. Requirements for storage and use of herbicides, and pesticides
The application of herbicides or pesticides will be done by professional certified contractor.

G. Provisions for solid waste management
   1. Waste Management Plan
      a. Recycle materials whenever possible (paper, plaster cardboard, metal cans). Separate containers for material are recommended.
      b. Do not bury waste and debris on site.
      c. Certified haulers will be hired to remove the dumpster container waste as needed. Recycling products will also be removed off site weekly.

H. Snow disposal and plowing plans
Snow storage is adequate around the site for large storm events, see site plan

I. Winter Road Salt and/or Sand Use and Storage restrictions
No sand, salt, or chemicals for de-icing will be stored outside.

J. Pavement sweeping schedules
Sweeping, the act of cleaning pavement can be done by mechanical sweepers, vacuum sweeper or hand sweeper. The quantity of sand is a direct correlation with the treatment of ice and snow and the types of chemicals and spreaders that are being used on site to manage snow. If a liquid de-icer such as calcium chloride is used as a pretreatment to new events the amount of sand is minimized. Sweeping for this site should be done semi-annually at a minimum. Collecting the particulate before it enters the catch basins is cheaper and more environmentally friendly than in a catch basin mixing with oils and greases in the surface water runoff in catch basins.

K. Provisions for prevention of illicit discharges to the stormwater management system

The discharge into the stormwater system is not being violated, see attachment for illicit discharges compliance.

L. Training the staff or personnel involved with implementing Long-Term Pollution Prevention Plan
The owner shall develop policies and procedures for containing the illicit spilling of oils, soda, beer, paper and litter. These wastes provide a degrading of the water quality. The placement of signs and trash barrels with lids around the site would contribute to a clean water quality site condition.

M. List of Emergency contacts for implementing Long-Term Pollution Prevention Plan:

John Nenart
Route 85 Realty Corp.
P.O. Box 444
Mendon, MA 01756
Tel: 508-422-1050
johnn@imperialcars.com

Standard 10: All illicit discharges to the stormwater management system are prohibited.

Standard 10 prohibits illicit discharges to stormwater management systems. The stormwater management system is the system for conveying, treating, and infiltrating stormwater on site, including stormwater best management practices and any pipes intended to transport stormwater to the ground water, a surface water, or municipal separate storm sewer system. Illicit discharges to the stormwater management system are discharges that are not entirely comprised of stormwater. Notwithstanding the foregoing, an illicit discharge does not include discharges from the following activities or facilities: firefighting, water line flushing, landscape irrigation, uncontaminated ground water, potable water sources, foundation drains, air conditioning condensation, footing drains, individual resident car washing, flows from riparian habitats and wetlands, dechlorinated water from swimming pools, water used for street washing and water used to clean residential buildings without detergents.

Attachment
Illicit Discharge Compliance Statement

It is the intent of the Applicant, John M. Nenart, Route 85 Realty Corp, P.O. Box 444, Mendon MA 01756, 508-422-1050, to control illicit disposal into the storm drainage system. There will be no connection to the storm water system to inadvertently direct other types of liquids, chemicals or solids into the storm drainage system. The Applicant will also promote a clean Green Environment by mitigating spills onto pavements; oils, soda, chemicals, pet waste, debris and litter.

Respectfully Acknowledged,

John M. Nenart

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:25,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Worcester County, Massachusetts, Southern Part
Survey Area Data: Version 12, Sep 12, 2019

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jul 28, 2019—Aug 15, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Hydrologic Soil Group

Map unit symbol	Map unit name	Rating	Acres in AOI	Percent of AOI
3A	Scarboro and Walpole soils, 0 to 3 percent slopes	B/D	6.9	31.0%
51A	Swansea muck, 0 to 1 percent slopes	B/D	1.6	7.1%
254B	Merrimac fine sandy loam, 3 to 8 percent slopes	A	2.1	9.4%
260A	Sudbury fine sandy loam, 0 to 3 percent slopes	B	2.8	12.5%
260B	Sudbury fine sandy loam,3 to 8 percent slopes	B	7.8	35.1%
625C	Hinckley-Urban land complex, 0 to 15 percent slopes	A	0.7	3.2%
651	Udorthents, smoothed	A	0.4	1.7%
Totals for Area of Interest			**22.3**	**100.0%**

Description

Hydrologic soil groups are based on estimates of runoff potential. Soils are assigned to one of four groups according to the rate of water infiltration when the soils are not protected by vegetation, are thoroughly wet, and receive precipitation from long-duration storms.

The soils in the United States are assigned to four groups (A, B, C, and D) and three dual classes (A/D, B/D, and C/D). The groups are defined as follows:

Group A. Soils having a high infiltration rate (low runoff potential) when thoroughly wet. These consist mainly of deep, well drained to excessively drained sands or gravelly sands. These soils have a high rate of water transmission.

Group B. Soils having a moderate infiltration rate when thoroughly wet. These consist chiefly of moderately deep or deep, moderately well drained or well drained soils that have moderately fine texture to moderately coarse texture. These soils have a moderate rate of water transmission.

Group C. Soils having a slow infiltration rate when thoroughly wet. These consist chiefly of soils having a layer that impedes the downward movement of water or soils of moderately fine texture or fine texture. These soils have a slow rate of water transmission.

Group D. Soils having a very slow infiltration rate (high runoff potential) when thoroughly wet. These consist chiefly of clays that have a high shrink-swell potential, soils that have a high water table, soils that have a claypan or clay layer at or near the surface, and soils that are shallow over nearly impervious material. These soils have a very slow rate of water transmission.

If a soil is assigned to a dual hydrologic group (A/D, B/D, or C/D), the first letter is for drained areas and the second is for undrained areas. Only the soils that in their natural condition are in group D are assigned to dual classes.

Rating Options

Aggregation Method: Dominant Condition

Component Percent Cutoff: None Specified

Tie-break Rule: Higher

TSS REMOVAL CALCULATIONS

INSTRUCTIONS:

Non-automated: Mar. 4, 2008

1. Sheet is nonautomated. Print sheet and complete using hand calculations. Column A and B: See MassDEP Structural BMP Table
2. The calculations must be completed using the Column Headings specified in Chart and Not the Excel Column Headings
3. To complete Chart Column D, multiple Column B value within Row x Column C value within Row
4. To complete Chart Column E value, subtract Column D value within Row from Column C within Row
5. Total TSS Removal = Sum All Values in Column D

Location: 495 Transportation Terminal II, Milford, MA

TSS Removal Calculation Worksheet

A BMP[1]	B TSS Removal Rate[1]	C Starting TSS Load*	D Amount Removed (B*C)	E Remaining Load (C-D)
Deep Sump and Hooded Catch Basin	0.25	1.00	0.25	0.75
8' Diameter Barracuda	0.50	0.75	0.375	0.375
StormTech Chambers Infiltration	0.80	0.375	0.30	0.075

Total TSS Removal = 93%

Separate Form Needs to be Completed for Each Outlet or BMP Train

Project: G-8293

Prepared By: Robert Poxon

Date: 3/2/2020

*Equals remaining load from previous BMP (E) which enters the BMP

Non-automated TSS Calculation Sheet must be used if Proprietary BMP Proposed

1. From MassDEP Stormwater Handbook Vol. 1

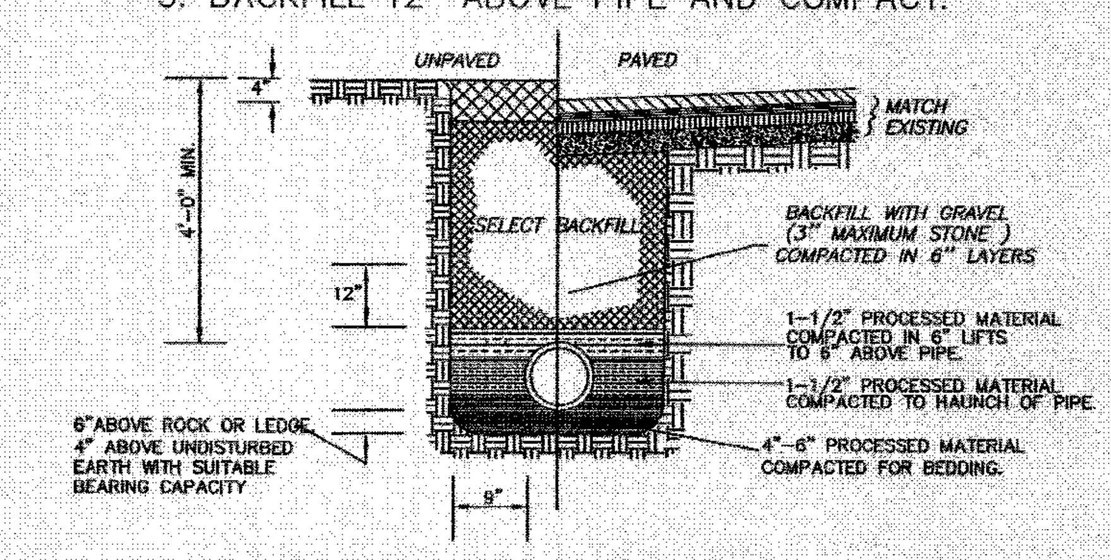
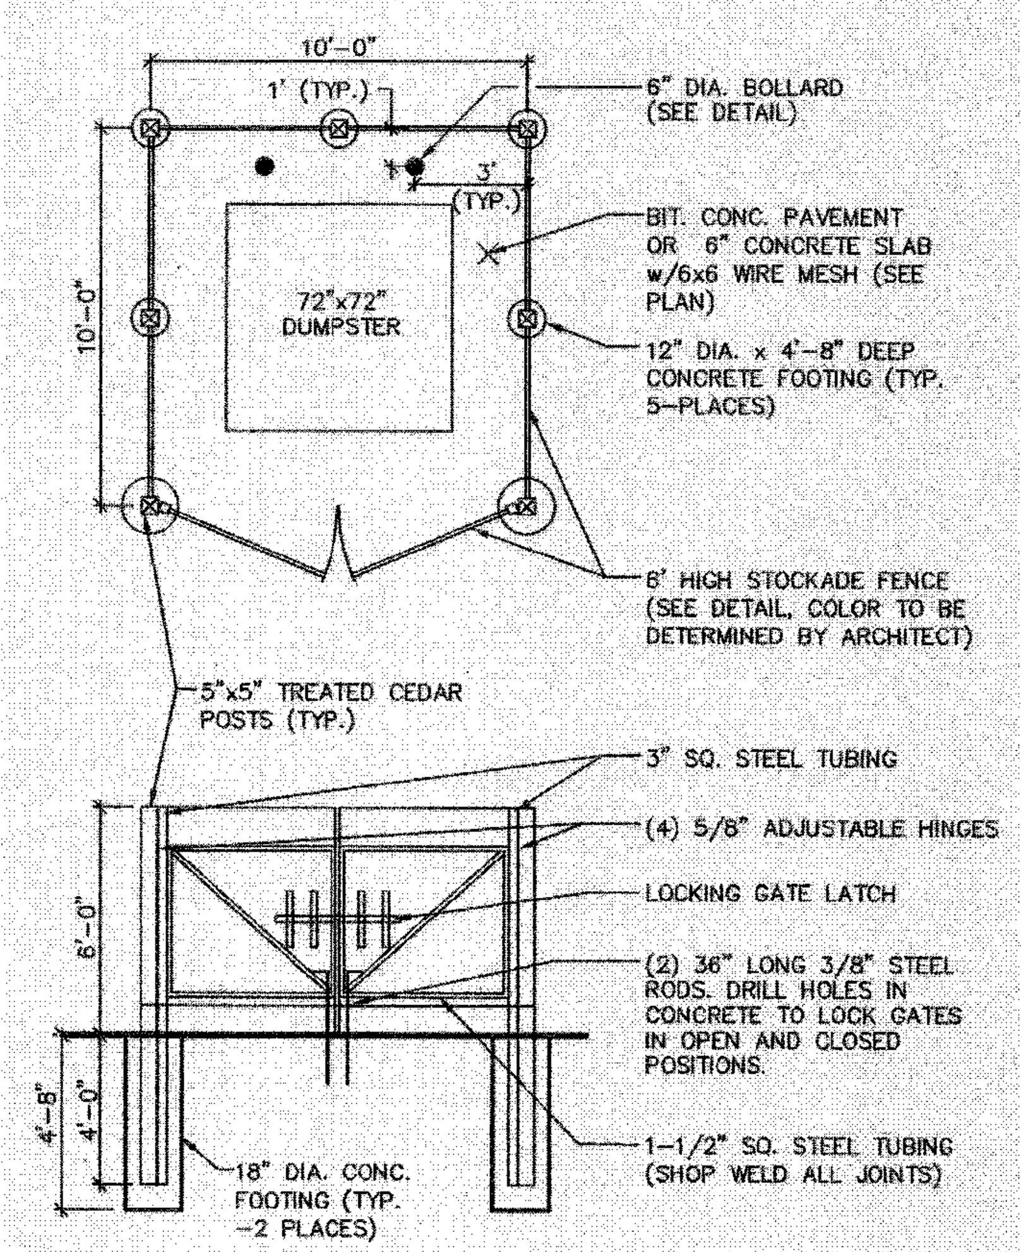
3. BACKFILL 12" ABOVE PIPE AND COMPACT.



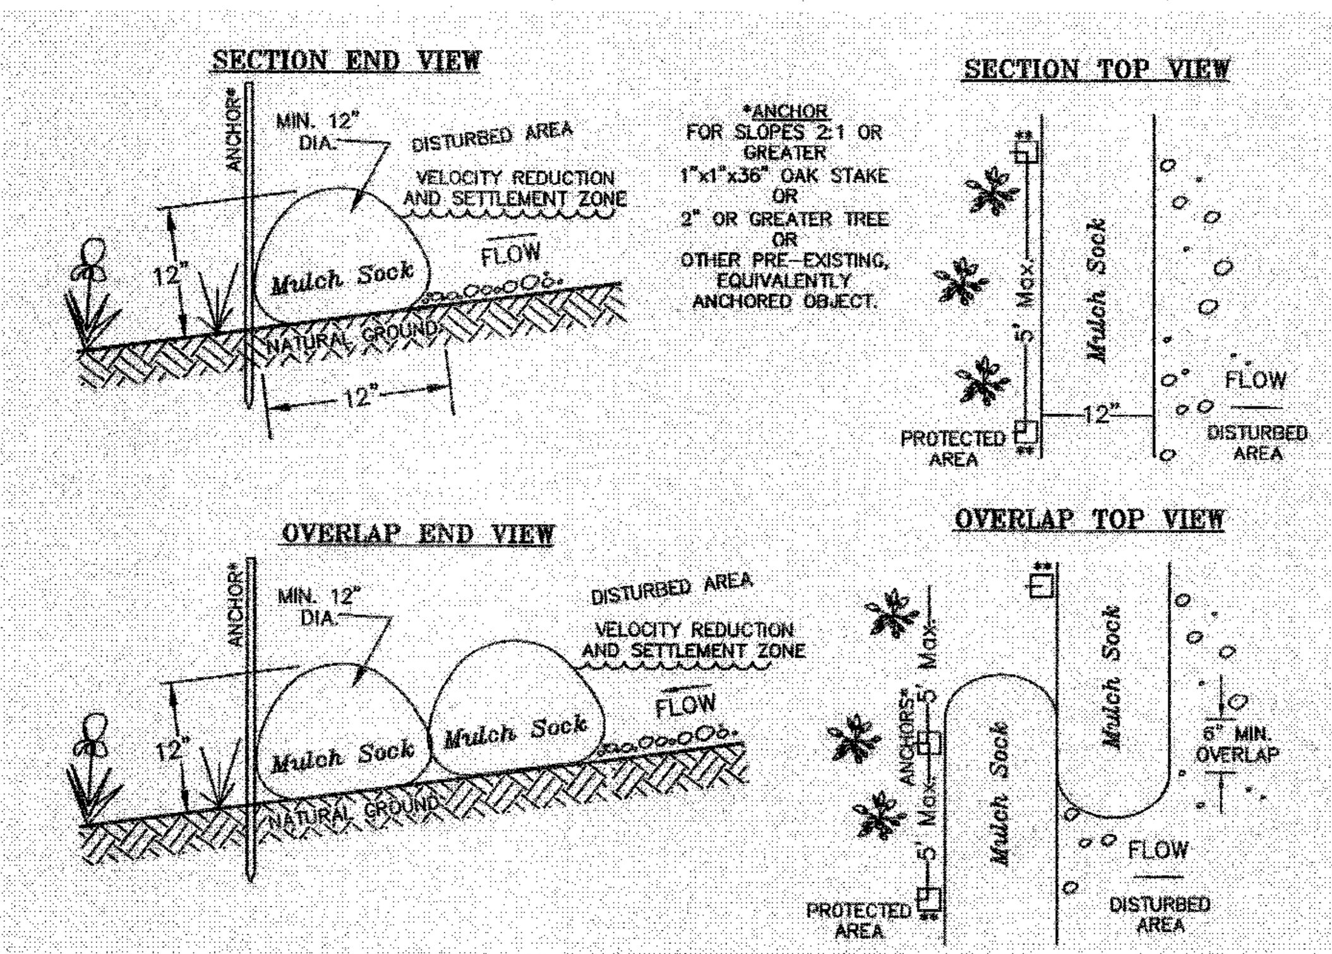
TYPICAL H.D.P.E. TRENCH SECTION

NOT TO SCALE



TRASH ENCLOSURE

SCALE: 1/4"=1'-0"



COMPONENTS:

OUTSIDE CASING: 100% organic hessian.

FILLER INGREDIENT: *Mulch*

- A blend of coarse and fine compost and shredded wood.
- Particle sizes: 100% passing a 3" screen; 90–100% passing a 1" screen; 70–100% passing a 0.75" screen; 30–75% passing a 0.25" screen.
- Weight: Approx. 850 lbs./cu.yd. (Ave. 30 lbs./l.f.)

***Mulch Sock* INSTALLATION:**

With the newest technology and equipment, sections can be constructed on site in lengths from 1' to 100'.

Sections can also be delivered to the site in lengths from 1' to 8'.

The flexibility of *Mulch Sock* allows it to conform to any contour or terrain while holding a slightly oval shape at 12" high by 18" wide.

Where section ends meet, there shall be an overlap of 6" or greater. Both sides shall be anchored (oak stakes, trees, etc.) to stabilize the union. No additional anchors are required on slopes less that 2:1. **Additional anchors are required at 5' intervals (max.) on the downslope or protected side on slopes greater than 2:1 to prevent movement.

ACCEPTABLE FILL MATERIALS: STORMTECH SC-740 CHAMBER SYSTEMS

MATERIAL LOCATION	DESCRIPTION	AASHTO M43 DESIGNATION[1]	COMPACTION/DENSITY REQUIREMENT
(D) FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER.	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
(C) FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 18" [457 mm] ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	[illegible]	BEGIN COMPACTION AFTER 12" [305 mm] OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 6" [152 mm] LIFTS TO A MIN. 95% STANDARD PROCTOR DENSITY. [illegible]
(B) EMBEDMENT STONE SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE NOMINAL SIZE DISTRIBUTION BETWEEN 3/4 - 2 INCH [19 - 51 mm]	3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED.
(A) FOUNDATION STONE BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE NOMINAL SIZE DISTRIBUTION BETWEEN 3/4 - 2 INCH [19 - 51 mm]	3, 357, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A 95% STANDARD PROCTOR DENSITY[2].

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".

2. AS AN ALTERNATE TO PROCTOR TESTING AND FIELD DENSITY MEASUREMENTS ON OPEN GRADED STONE, STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" [229 mm] (MAX) LIFTS USING TWO FULL COVERAGES WITH AN APPROPRIATE COMPACTOR.

STORMTECH ACCEPTABLE FILL MATERIALS

SC-740 CHAMBER
CHAMBERS SHALL MEET ASTM F 2418-09 "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".

THE INSTALLED CHAMBER SYSTEM SHALL PROVIDE THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS SECTION 12.12 FOR EARTH AND LIVE LOADS, WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCE.

Re: **3 Gordon Drive (Lot 17)**
Notice of Intent – DEP File #223- _____

Dear Mr. Giampietro:

The submittal is for a Notice of Intent for the installation of an inground pool, retaining wall and associated grading, the applicant is the new home owner of 3 Gordon Drive, Thiago Silva, 3 Gordon Drive, Milford, MA 01757.

Following a review of the submitted documents, I offer the following comments:

1. The retaining wall shown on the plan has already been constructed and is with in the 100-foot buffer zone. The filing of this NOI will bring the work associated with the retaining wall into compliance.

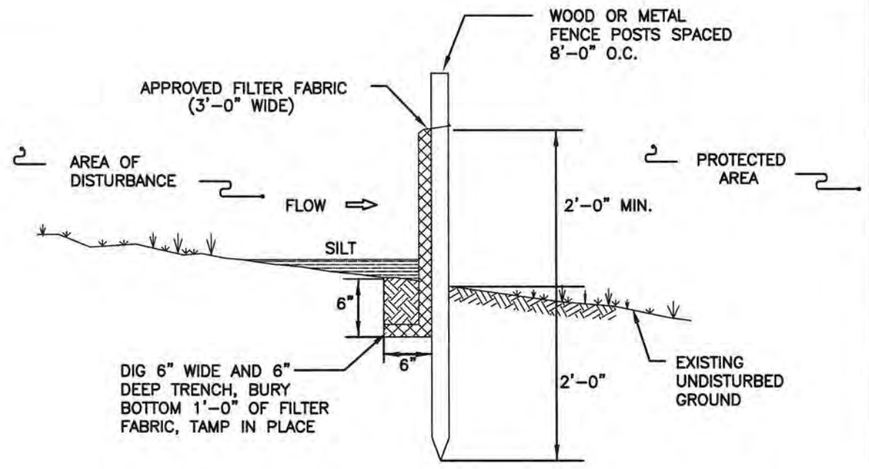
2. Haybales or mulch sock should be added to the erosion control detail.

I recommend item number two (above) be addressed; I recommend the issuance of an Order of Conditions.

Sincerely,

Michael Dean, P.E.
Town Engineer

MINIMUM ZONING REQUIREMENTS	
ZONING DISTRICT	RC
AREA	45,000S.F.
FRONT YARD SETBACK	30
SIDE YARD SETBACK	20
REAR YARD SETBACK	30



1. PLACE SILT FENCE AT LOCATIONS AS SHOWN ON THE PLAN.
2. SILT FENCE SHALL BE INSTALLED SO WATER CANNOT BYPASS THE FENCE AROUND THE SIDES.
3. INSPECTION SHALL BE FREQUENT AND REPAIR OR REPLACEMENT SHALL BE MADE AS PROMPTLY AS POSSIBLE.
4. SILT FENCE SHALL REMAIN IN PLACE FOR THE DURATION OF THE PROJECT UNLESS OTHERWISE INSTRUCTED BY THE CONSERVATION COMMISSION.

Re: 420- 426- 434 East Main Street - **Notice of Intent**
DEP File # 223- 1174

Dear Mr. Giampietro:

The submittal is a **Notice of Intent (NOI)**, the Applicant is Milford Stone Company, Inc., Joseph F. Shay Jr., Southborough, MA. The NOI is associated with the Gravel / Stone mining operation that has been in existence for many years (2002 – 2003).

Most of the work shown on the plans is "after-the-fact" work, as most of the work has already taken place. The unregulated work has resulted in disturbances to the resource areas on site. This filing is to correct the disturbances and will eventually bring the site in to conformance, in terms of the Wetlands Protection Act. The site is also under a Consent Order / Decree, Commonwealth of Massachusetts (Plaintiff) vs. Milford Stone Company, Inc. (Defendant).

Disturbances include, but not limited to:

a. Bank associated with a stream Approximately 130 linear feet (L.F.)
b. Bordering Vegetated Wetlands (BVW)- "**Permanently Alerted**" Approximately 25,167 Square Feet (S.F) – an additional 12,332 S.F. Temporarily altered by sediment and an additional area of 54,167 S.F. by placed fill for a total of 91,666 of altered / disturbed BVW.

c. Isolated land Subject to flooding (ILSF) – Approximately 496 S.F. has been altered.

Due to the large amount of disturbance to the Resource Areas and the complexity of the restoration process, I recommend the Commission hire a Professional Wetlands Scientist / Environmental Consultant to review the entire submittal and to work closely with the Town and the Applicant to ensure the proper conditions are placed in the Order of Conditions to ensure proper permitting, inspections during restoration and post restoration. All Expenses are to be paid for by the applicant.

Sincerely,

Michael Dean, P.E.
Town Engineer

Re: Notice of Intent (NOI) Filing – 429 East Main Street
Applicant: Milford Stone Company, Inc.

Dear Commission Members:

Enclosed please find two (2) copies of the WPA – NOI Form with required attachments and two (2) copies of supporting plans filed under the Massachusetts Wetlands Protection Act a on behalf of the Applicant and Owner for the above referenced property. The applicant is seeking an after-the-fact Order of Conditions for a gravel/stone mining facility to include existing and future operations within the Buffer Zone to BVW. The applicant also proposes the restoration and replacement of altered BVW, ILSF and Bank, and the replacement of an existing stream crossing in accordance with the Mass. Stream Crossing Standards.

The filing is comprised of:

1. The WPA Form 3 -NOI Form with required attachments;
2. The NOI Wetland Fee Transmittal Form and photocopy of checks;
3. Notification to Abutters letter with Milford Assessor's Abutter list;
4. WPA filing fee check to the Town of Milford in the amount of $1,712.50;
5. Legal ad fee check to Town of Milford in the amount of $85.00;
6. Wetland Resource Evaluation, 429 East Main Street, Milford, MA, prepared by EcoTec, Inc., dated 11/19/19;
7. U.S. District Court for the District of Mass. – Consent Decree
8. Site Plans prepared by McClure Engineering, Inc., dated 11/25/19;

One (1) copy of the filing has also been sent certified mail/return receipt to the DEP Central Regional Office.

We look forward to discussing this project with the Commission at the December 18, 2019 public hearing. If you have any questions, please feel free to contact me at any time.

Sincerely,

Scott Jordan
